THE HUNTINGDON GLOBE, A DEMOCRATIC FAMILY JOURNAL, DEVOTED TO LOCAL AND GENERAL NEWS, &C.

for the Farmer.

Advantages of Draining. Much as has been written on this subject, its importance is not yet fully appreciated.-We do not assert that all lands absolutely require draining, yet full one-half do, and nearly all would be benefitted by it. Here and there, a new farm, whose soil is full of the partly decayed roots of trees, is drained more or less by them. But when these roots shall have perished, the soil will settle compactly together and render artificial draining important. On some farms the subsoil is gravelly; allowing the surface water to pass off easily; and here, of course, no other drainage is necessary. But more frequently, the subsoil is a cold, stiff clay, preventing the escape of water, and making draining essential to good husbandry. Travel where we may we see thousands of acres, abounding in all the natural elements of fertility, yet of little practical value because surcharged with surplus water. We see this, too, in portions of the country, where the farmers are intelligent and industrious, and might be presumed to be awake to whatever concerns their real interests .--Is there not room for improvement here, in American agriculture? Instead of urging farmers to "plant one acre more," we should first exhort them to drain one acre more.-And this we would do, not as a mere echo of Scotch and English notions, but as a principle which live Yankees have worked out for themselves, and proved to be of great importance in American husbandry.

It is easy to ascertain what land needs draining. In case of doubt, dig several holes in different parts of the field or garden under consideration, at a time when the surface soil is moderately dry and fit to plow. If water collects in the course of a day, and stands in these pits, it may be taken for granted that the land would be benefitted by draining.

It is a weighty argument for draining, that it relieves the ground of surplus water early in the spring, and so enables the work of the farmer and gardener to commence earlier than it otherwise could. It also makes that work easier and pleasanter. When the ground is undrained, it cannot become dry except by evaporation, or by the oozing away of the water, particle by particle, through a long reach of stiff soil into some natural outlet .-Meanwhile, the farmer must sit with folded hands in comparative idleness, knowing that by the time his land had become dry, his work will accumulate and press upon him with a burden he can hardly bear. It would not be strange if some of that work should be left undone, or be slighted. Let but suitable drains be cut through that land, and the melting snows and drenching rains would speedily find their way in these channels and leave the ground dry and warm, and ready for tillage several weeks earlier than fields not so treated. It would tend to relieve farm life of a great objection to it, in many minds, viz: that it imposes such hurrying and exhausting labors at particular seasons, and especially in spring. It would enable the farmer to get certain crops into the ground earlier, and so make sure of a vigorous growth before the drouths of mid-summer, and of maturity before the frosts of autumn. The farmer at the extreme north, who sometimes repines at the shortness of the growing season, and the coldness of his soil, would thus practically gain almost a degree of south latitude without the necessity of selling his farm and moving his household goods.

Intitude without the necessity of selling his farm and moving his household goods.

Draining is beneficial to the farmer and gardener, also, in that it relieves the ground of surplus water during the cold season, from November to April. Every farmer knows that his wheat and grass are injured by standing in water in the spring of the year. The receipt gand thawing of water about the roots of these crops, tend to heave them out of the ground, and when the winter is over, the soil which has lain charged with water is left in a cold, sour state, which the halmiest summer succeeding cannot fully restore to a warm and healthy condition. The orchardist on such land finds his young trees either killed outright or badly stunted and moss grown. His peaches, grapes, and other choice fruits, if they live, do nothing more. But when the ground is well drained, wheat passes through the winter safely—unless too much exposed to the winds—and grass lands retain their smooth surface, free from sorrel and mosses, and fruit and ornamental trees and vines, otherwise tender, come out in spring unscathed.

Draining renders the ground more porous at all seasons of the year, and enables the roots of trees and plants to descend deeper into the earth, and so to find more nourishment. In lands undrained, only a few inches of the top soil are light and dry. The subsible being habitually wet, the particles adhere firmly together, like tough mortar, ren-fidely and light posents to the first will almost to the first will almost to the first part of the first particles adhere firmly together, like tough mortar, ren-fidely and light losens the bowels will strugtlist and dury in the largest and build it to with united with end being habitually wet, the particles and build it to with united with the business of the year. The liven be within the stand, and the wide it is fattly. For the diseases the work of the top said the winter is over, the said that the winter is over, the said that the winter is over, the said that the winter is over, the said

soil being habitually wet, the particles adhere firmly together, like tough mortar, rendering it almost impossible for the roots to penetrate them. And if they could do so, of what benefit would it be? They would find not only few of the elements of growth, but also many elements noxious to vegetable life. In dry weather, too, soils of this description bake, and crack open in large fissures, allowing the heat to penetrate among the roots of trees and plants. On the other hand, in properly drained ground, the water leaches through the soil and subsoil into the drains, leaving behind it a thousand minute pores or channels throughout its whole extent, and making it comparatively friable, light and warm. The cold stagnant water having been abstracted from the bottom soil, and that soil rendered porous by the process, roots of trees

and plants push into it at once, and find there THE NEW YORK STEAM SAWa wide field for forage. It is an annexation of new territory, over which they rejoice to spread themselves. Defiance, now, to the dog-star! The roots are not confined to a few inches of surface-soil: their mouths are down near to the nether springs. The drains carried off the excess of water in the wet season, but by rendering the subsoil porous, the moisture more easily rises again to the surface when it is wanted, in the dry season. This is one of the most beautiful and important results of draining. Contrary to the fears of some, draining is beneficial to land in time of drouth, hardly less than in the wet season. Paradoxical as it may at first seem. the best way to prevent land from becoming too dry, is to drain it! This benefit will undoubtedly be the more apparent, if the draining is accompanied with thorough subsoiling or trenching. yet it will be obvious without it.

Draining also facilitates the work of enriching land. Manure applied to the surface. instead of being washed off by the rains and lost, is carried downward, and its juices incorporated with the soil. Yet it is not carried beyond the reach of the plants-it seldom, if ever, descends three feet-nor is it borne away through the drains. The increased benefit which land so treated derives from the atmosphere and from the rains and dews, is worthy of much consideration. The soil is in the best state for imbibing and retaining the fertilizing gases with which the air may at any time be charged.

The benefit to the health of the inhabitants, arising from the draining of land, is a matter of great importance. But upon this, as well as some other points, we cannot now dwell. The late Mr. Downing's recipe for successful gardening, was: trench, trench, TRENCH! A recipe for success in all agricultural operations, should begin with, drain, drain, DRAIN! -Cor. Scientific American.

The Housekeeper.

Best Lemon Pie.

I send a recipe for the best Lemon Pie is ever was my good fortune to taste.

The juice and grated rind of one lemon, one cup of water, one table spoonful of corn starch, one cup of sugar, one egg and a piece | Do you want Stationery? of butter the size of a small egg for one pie. | Do you want Gold Pens? Boil the water, wet the corn starch with a little cold water and stir it in; when it boils up, pour it on the sugar and butter; after it cools, add the egg and lemon; bake with an under and upper crust.

RECIPE FOR MAKING SOFT GINGERBREAD .young lady friend of ours hands us the following recipe for publication. We had the pleasure, a short time since, of devouring generous slice, presented to us by the lady herself, and, in the language of the celebrated German orator, Von Crutz, we can say,

butter; one cup cream or milk; one teaspoonful soda; one table-spoonful ginger; one nutmeg; three eggs; and flour enough to make it thick as pound cake.

THE LIVER INVIGORATOR! PREPARED BY DR. SANFORD.—Compounded cuttively from GUMS is one of the best purgative and Liver medicines now before the public, that acts as a Cathartic easier, milder, and more effectual than any other medicine known. It is not only a Cathartic but a Liver remedy, acting first on the Liver to eject its morbid matter, the on the bowels and stomach to carry off that matter; thus accomplishing two purposes effectually, without any of the painful feeling experienced in the operations of most Cathartics. It strengthens the system at the same time that it purges it; and when taken daily in moderate doses will strengthen and build it up with unusual rapidity.

orbents.

We take pleasure in recommending this medicine as a preventive for Fever and Ague, Chill Fever, and all Fevers of a Billious Type. It operates with certainty, and thou-sands are willing to testify to its wonderful virtues. All who use it are giving their unanimous testimony in its

uvor.
AF Mix water in the mouth with the Invigorator and Mix water in the mouth with the Invigorator and swallow both together.

The Liver Invigorator is a Scientific Medical Discovery, and is daily working cures, almost too great to believe.—
It cures as if by magic, even the first dose giving benefit, and seldom more than one bottle is required to cure any kind of LIVER Complaint, from the worst JAUNDICE or DYSPIERSIA to a common Heanache, all of which are the results of a DISEASED LIVER.

PRICE. ONE DOLLAR A BOTTLE.

DR. SANFORD. Proprietor, 343 Broadway, New York.—

MILL AND MACHINE COMPANY, CAPITAL, TWO HUNDRED AND FIFTY THOUSAND

CAPITAL, TWO HUNDRED AND FIFTY THOUSAND DOLLARS.
This company has been organized with the above capital for the purpose of supplying the demand for the COMBINATION PORTABLE STEAM SAW-MILL, and other improved machinery.

They have purchased the entire machinery business heretofore carried on by J. M. Emerson & Co., also the Montgomery Works at Yonkers, on the Hudson, near this city, and with the experience and facilities combined in its organization are prepared to furnish machinery of all kinds at more liberal rates, than has ever been offered at any other establishment.

other establishment.

The Combination Saw-Mill was patented October, 1856

The Combination Saw-Mill was patented October, 1856, and is now generally acknowledged to be the cheapest, and most practical, and efficient lumber manufacturing machine in the world. A number of them are in successful operation in different sections of the country, Canada, Cuba, and South America, and wherever their merits have been tested they are being adopted by lumber manufacturers in preference to all other mills.

The following letter expresses the general opinion of those who are using the Combination Mill:

Messas. Emerson & Co.—Gentlemen: I have tried the saw-mill purchased of you, and will say that it performs well, and more than meets my expectations. I am well pleased with its performance. I set it up on a small stream that afforded constant water about as thick as my little finger, which was much more than sufficient to supply the boiler. We are able to cut 3,000 feet of beautiful lumber in 12 hours, with something less than one cord of wood.—It is the very thing we have so much needed in our county It is the very thing we have so much needed in our county for a long time. With a little trouble and expense, we are able to move it from five to ten miles per day, and set it up in the heart of the timber, which saves the great burden of hauling the logs a long distance to the mill.

Yours respectfully,

Jesse Kerr, Jr.,

Louisville, Tonnessee

Yours respectfully,

Yours respectfully,

JESSE KERR, Jr.,

Louisville, Tennessee.

The company has purchased Lund's Patent Feed Arrangement, which is illustrated and described in the Scientific American for October 24. This adds greatly to the efficiency of the mill.

THE COMBINATION MILL,

With all the recent improvements and steem, power of 15.

with all the recent improvements, and steam power of 15 horses, is capable of sawing from 3,000 to 4,000 feet in 12 hours, and is sold for \$1,650.

THE NEW YORK CIRCULAR SAW-MILL THE NEW YORK CIRCULAR SAW-MILL Is manufactured only by this company. It, is of superior contruction, and sold for 25 per cent. less than other mills of no greater capacity. A mill with 36 to 54-inch saw can be sold for \$450 to \$500, and with a 20-horse engine and boiler is sold for \$2,200.

Steam Engines and Boilers; Engines of from I to 100 horse power; Locomotive, Tabular, Flue and Cylinder Boilers furnished at greatly reduced prices from former questions.

protations.

Drawings, with plans and specifications for buildings Drawings, with plans and specifications for buildings and machinery, furnished gratis to our customers.

Competent mechanics are sent out to put up and set in operation our machinery, when required.

We also manufacture Shingle Machines, Planing Machines, Sugar-Mills, and Machinery in general.

Special attention paid to getting up Shafting and Pullies for manufactories, and all kinds of mill-wright work.

This company are selling in great numbers a Patent Conical Burr. Stone Mill, for flour, corn meal, and all kinds of feed which is propagated by experienced millers, both in ficed, which is pronounced by experienced millers, both in this country and Europe, the best mill ever constructed. It will grind more grain in the same time, and with half the power, of any mill of the same price in the market. We also furnish other styles of Grist-Mills, when required.

J. M. EMERSON & CO., Agents, Jan. 13, 1858.

Cheap Store of The Property

BLAST AGAIN!—The subscribers take this method of informing their friends and the public generally, that they have rebuilt the Huntingdon Foundary, and are now in successful operation, and are prepared to furnish Castings of overy description, of best quality and workmanship, on short notice, and on reasonable terms. Farmers are invited to call and examine are Blockles. reasonable terms. Farmers are invited to call and examine our Ploughs. We are manufacturing the Hunter Plough. This plough took the first premium at the Huntingdon county Agricultural Fair last fall. Also, Hunter's celebrated Cutter Ploughs, which can't be beat—together with the Keystone, Hillside and Barshear ploughs. We have on hand and are manufacturing Stoves—such as Cook, Parlor, and Office stoves for wood or coal. Hollow ware, consisting of Kettles, Boilers, Skillets, &c., all of which we will sell cheap for cash or in exchange for country produce. Old metal taken for castings. By a strict attention to business, and a desire to please, we hope to receive a liberal share of public patronage.

J. M. CUNNINGHAM & BRO.

Huntingdon, April 30, 1856.

THE HUNTINGDON FOUNDRY IN

PRANKLIN HOUSE, Huntingdon, Respectfully informs his friends and the travelling public generally, that he has leased the "Franklin House," for several years occupied by C. Couts, and that he will be pleased to receive the calls of all who may favor him with their patronage. His table will be furnished with the best the market affords, and every attention will be given to make those who stop with him feel at home.

Huntingdon, April 8, 1857.

CPECIAL NOTICE.—LOVE & Mc-PECIAL NOTICE.—LOVE & McDIVITT would respectfully inform their numerous
customers and the public generally that, notwithstanding
the "pressure of the times," they still continue to deaf
out, at their old stand in Market Square, all kinds of Groceries, Confectionaries, Fruits, Tobacco, Segars of every
grade from Half Spanish to the genuine Principe, La National, &c., &c., at greatly reduced prices. Having learned
from past experience, that the credit system is a dangerous
one to all parties, we have determined to reduce our business to cash or its equivalent, and shall be able to sell on
the most reasonable terms, as our stock has been purchased at the lowest cash prices. Call and see us, friends.

LOVE & McDIVITT.

Huntingdon. Dec. 16, 1857.

Huntingdon, May 16, 1855.

TATCHES, CLOCKS, AND ATCHES, CLOCKS, AND
JEWELRY. The subscriber, thankful to
his friends and patrons, and to the public generally, for their patronage, still continues to carry on at the
same stand, one door east of Mr. C. Conts' Hotel, Market
street, Huntingdon, where he will attend to all wno will
favor him with their custom; and also keeps on hand a
good assortment of Watches, Clocks, Jewelry, &c., &c., all
of which he is determined to sell at low prices. Clocks,
Watches and Jewelry of all kinds will be repaired at short
notice, and having made arrangements with a good worknotice, and having made arrangements with a good work-man, all repairs will be done in a neat and durable manner, and any person having articles for repairing, shall have them done at the promised time. By paying strict atten-tion to business, and selling at low prices, he hopes to retion to business, and sening as a considered a share of public patronage.

JOSEPH REIGGER.

All LINE from Mount Union to CHAMBERSBURG. The undersigned still continues to run a tri-weekly line of stages over the road between Mount Union and Chambersburg. Good horses and confortable stages have been placed on the route, and experienced and trusts drivers will experienced. tortable stages have been placed on the route, and experienced and trusty drivers will superintend the running of the Coaches. The proprietor of the line is desirous that it be maintained, and he therefore carnestly calls upon the public generally to patronise it, confident that it will be for their mutual advantage. Every attention necessary will be given, and the running of the stages will be regular.

lar.

189 Stages leave Mt. Union at 5 o'clock, p. m., every Tuesday, Thursday and Saturday—returning on Mondays, Wednesdays and Fridays; arriving at Mount Union in time for the cars. Stages stop at Shirleysburg, Orbisonia, Shade Gap, Burnt Cabins, Fannetsburg, Itorse Valley, Strasburg, and Keefer's store.

199 Fare through \$3,00; to intermediate points in proportion. August 22, 1855-tf.

THE HUNTINGDON MILL.—The undersigned owners of the Huntingdon Mill inform the farmers and the public generally that they now have their new mill in running order, with all the modern improvements in the Water Wheels and Machinery.

They have put in five of the Improved Jouval Turbine Water Wheels, and can grind in all stages of water, and during the coldest weather any and all kinds of grain.

They are prepared to sell, and have on hand for sale at all times at Market rates all kinds of Flour, Feed, and Stuffs; and Farmers can laye their own grain ground and all times at Market rates all kinds of Flour, Feed, and Stuffs; and Farmers can have their own grain ground and take it back in a return load, or they can be furnished in exchange at a moment's notice, an equal quantity of Flour and Bran, or chopped feed.

Their smut machine is of improved manufacture, and they will insure a "a full turn out" of superior quality to every bushel of grain left at their mill.

FISHER & McMURTRIE.

Huntingdon, Dec. 8, 1856.

Huntingdon, for the sale of GOLD and SILVER WATCHES, JEWELRY, &c.

His stock is entirely new and of the best quality, and will be disposed of at fair prices.

The public generally are requested to call and examine or themselves.

Repairing of Watches, Clocks, and Jewelry, done in the mest manner on short notice.

JOHN FRISCH. pest manner on short notice. Huntingdon, Oct. 1, 1856. REATEST DISCOVERY OF THE

IMPORTANT TO TOBACCO CHEWERS!! DR. GUSTAV LINNARD'S
Taste Restorative Troches, the Great Substitute for Tobacco. It is a well known and incontrovertable fact that the use of Tobacco is the promoting cause of many of the most severe MENTAL AND PHYSICAL DISORDERS to which the

vere MENTAL AND PHYSICAL DISORDERS to which the race of man is subject, as careful analysis and long and painful experience have clearly proven that it contains certain narcotic and poisonous properties most dangerous in their effects, which by entering into the blood derange the functions and operations of the Heart, causing many to suppose that organ to be seriously decased.

TOBACO affects also the entire nervous system, manifesting itself—as all who have used the noxious weed will bear testimony—in Lassitude, Nervous Irritability, Water Brash, Dyspensia, and many other disorders of a similar bear testimony—in Lassitude, Nervous Irritability Brash, Dyspepsia, and many other disorders of a

THE TASTE RESTORATIVE TROCHES are designed to THE TASTE RESTORATIVE TROCHES are designed to counteract these baneful influences, and have proved completely successful in a multitude of cases, and wherever used. Being harmless in themselves they exert a beneficial effect upon the entire system, restoring the taste which has become vitiated or destroyed by great indulgence, completely removing the irritation and accompanying tickling sensation of the Throat—which are always consequent upon abstaining from the use of Tobacco, and by giving a healthy tone to the Stomach, invigorate the whole system. Persons who are irretrievably undermining their constitutions and shortening their lives, should use these Troches immediately and throw off the injurious and unpleasant habit of Tobacco Chewing.

These Troches or Lozenges are put up in a convenient and portable form at the low price of 50 Cents per Box.—A liberal discount to the Trade.

Prepared solely by the undersigned to whom all orders should to addressed.
