The Grops of the Present Year.

The New York Courier and Enquirer, in a recent article, estimated the agricultural products of the United States for this year, by adding the average annual increase to the Patent Office returns of 1855, (the figures in each case showing millions,) to be as fol-

These calculations, however, are considered by some of our exchanges, entirely too high for their respective localities. The year has by no means been one of unmixed prosperity to the American farmers. The freshets, the rust, the weevil, and the general unfavorableness of the season, have operated disastrously upon wheat. Spring wheat has been almost an entire failure. Pennsylvania seems to have been more fortunate with her crop than almost any other State. In nearly the whole Northwest, and in Virginia and North Carolina, the crop is said to fall far below the yield per acre last year; but throughout the whole country the number of acres sown is much greater. The Prairie Farmer estimates that Illinois will not export more than 6,000,000 bushels of the crop of the present year; Iowa less than \$1,000,000 -perhaps less than \$500,000 bushels; Wisconsin not more than three-fifths as much as of the crop of 1857; and that Indiana will export in about the same proportion as Wis-

· In the oat crop there has been a very great falling off from last year. In some States it has been almost entirely ruined by the rust, a disease never before known to attack oats. It is supposed the corn crop will be at least a light average.

The grain trade of Chicago, however, has been unusually active. We notice by the Chicago Times of August 24, that the reccipts up to that time, during the present season, had been 270,112 barrels Flour, 6,-243,973 bushels Wheat, 5,243,698 bushels Corn, and 1,732,040 bushels Oats, a total of 14,570,271 bushels of grain. The receipts up to a corresponding period last year were, 156,000 barrels Flour, 3,000,000 bushels Wheat, 5,900,000 bushels Corn, and 633,000 bushels Oats, making a total of 10,313,000 bushels of grain, and showing an increase in the receipts of this year over those of last year, of 4,267,271 bushels. The shipments at this time last year amounted to 7,915,000 bushels, while 13,162,024 have been forwarded this season.

The cotton crop, in several quarters, does ent of the Charleston Courier writes as fol-

"Columbus, Ga., Augst 21.-The crop prospect has changed in all of this section within the last ten days. I now hear much complaint of rust and boll worm, both of which are said to be doing much injury. A gentleman of high standing, whose word,

no one who knows him, can doubt, tells a 'Worm' story that lays all 'Fish and Snake' stories in the shade. He says that from 110 acres of cotton, he had picked, in two days, 130,000 boll worms! He did not count every worm, but counted those taken from a certain number of rows, and made the estimate in favor of the worms. Had he taken the rows most against them, the figures would stand 180,000 worms.

" His hands averaged one thousand worms a day. He expected twelve hundred pounds of cotton per acre, from this field! Now, he doubts getting six hundred pounds per acre. If he is so badly used, others must be considerably damaged. I look upon the boll worm as the greatest enemy of the crop, and if these are becoming general, look out for howls from the prairies and the rich bottoms of the West. The four million men are out of the ring now, and I doubt if the three and a half million estimates will be reached.— The Upland crop of Georgia will doubtless be a good one. I look for large receipts at Savannah and Charleston."

As to the crops abroad, it has been well ascertained that the wheat crop of France is equal to that of a good ordinary year, and it is supposed that it will be unnecessary for her to make any importations for her consumption. The prospects in Ireland, as a general thing, indicate good crops. In England, a fair average crop seems to be expected. In some important grain-growing portions of the continent, there is supposed to

be a considerably diminished bulk of grain. The whole crop of the agricultural world appears to be a moderate one, not rising to an unusually fine yield anywhere, and falling considerably below it in many places; but at the same time there is no large region where the crops are absolutely of a very bad charac-

The following is from the Forida Home Companion :- "During the last three weeks, the editor of this paper has set all the types, made up the forms, worked press, folded the papers and mailed them, and attended to all his editorial duties, besides superintending the 'getting out' of timbers and shingles for two houses, putting up two hundred and twenty feet of palings, and regularly conducting the business of a general commission merchant. In fact, we have nearly had our

RIOTS IN IRELAND .-- A Dublin telegram says that serious riots have broken out in Kilkenny, and that infuriated mobs are traversing the country, smashing reaping, and other agricultural machines, and assailing their owners. The magistrates held a meeting and resolved to petition the government for an additional police and military force.— Soldiers were subsequently sent to Kilkenny, and at the latest dates, tranquility prevailA Terrible Story.

Seventy-four cows, four valuable horses, one mule, four calves and two goats were destroyed on the 18th ult,, near Cincinnati, by a fire in extensive dairy stables. Two horses, two cows, one mule, two goats and two calves, only, escaped, but they are so badly burned that it will be humane to kill them. The scene in the stables in the midst of the conflagration was most pitcously and indescribably harrowing. The live stock were tied in their stalls. When the flames first commenced, the poor animals snorted and bellowed with hideous and frantic force. As the heat increased, their cries and groans and furious struggles became agonizing.— Some threw themselves headlong upon the floor or leaped upright at full length with frenzied energy, and vented their agony in fearful screams.

The horses broke from their halters, and dashed through the consuming blaze in desperate dismay. The tortured and suffocating cows tore away their horns and rushed through the blazing piles, and encountered each other in destructive collision, their flesh broiling and cracking in the heat with sickening effect upon the sense of human beings who gazed horror-stricken upon the wretched scene of suffering, without power to mitigate the agony of the tortured brutes. The yells and despairing cries of the different classes of animals commingled with horrid concert, and broke through the roar of flames and crackling timbers upon the still night air, and were borne away in terrifying echoes, to the ears of persons two miles distant from the dreadful scene.

Two or three horses, and as many cows, plunged through the flames and burst in wild affright through the sides of the consuming structure, and fell headlong, whining with misery, upon the ground outside, sprang again to their feet, and sped with frenzied fury across the fields, until they dropped lifeless from sheer exhaustion. Some rolled upon the floor of the stable, screaming with immitigable pain, until suffocated and destroyed by the fierce heat. Their contortions, their awful wails of distress, infinitely more piteous and harrowing than those of human beings in the dire extremity of torture, are described by those who gazed spell-bound upon the terrible spectacle, as surpassing the power of human imagination to conceive.— The flesh of the carcasses quivered, and blazed and broiled all night, and filled the atmosphere with a sickening effluvia.

Some of the cows stood upright at their stalls, their flesh barbecued; others were without heads, others without limbs; in one instance four or five carcasses laid together with their horns interlocked, forming a cir-

cle. It was a ghastly scene to contemplate. KILLED ON THE RAILROAD.—We learn from the Altoona Tribune, that on Sunday evening 12th, ult. as the locomotive which had pushed the Emigrant train up the mountain, was returning to that station, when near Kittanning Point, the engineer observed something lying on the track which he mistook for a coat, but which, on approaching nearer he found to be a man lying between the cross-ties, the ballast at that place being low, and allowing the body to be almost hid between the ties. He immediately reversed his engine and the fireman applied the breaks, but could not check it until the driving wheels had passed over the object. On examination it was found to be a man, and that his head had been almost severed from his body, it having evidently been lying on the rail. The body was discovered to be that of Cornelius Maher, a mithe deceased a few minutes previous to the not appear to be as promising now, as at an accident, testifid that he was under the influearlier period of the season. A correspond- ence of liquor, and it is supposed that he either fell between the ties and was unable to get up, or that he sat down and fell What a lesson to those who are in the habit of using intoxicating liquors. Will it be heeded? A verdict in accordance with the above facts was rendered by the jury, entirely exculpating the engineer from any blame in the matter.

We learn from the Williamsport (Pa.) Independent Press that the ground selected for the Encampment, which is to be held at that place September 7th, contains one hundred and thirty acres, and is on the farm of Hon. R. C. Grier, about one mile west of Wlliamsport. It is generally believed that this will be the largest Encampment ever held

PHILADELPHIA MARKETS. Monday, August 30.—Breadstuffs are about the same

Monday, August 30.—Breadstuffs are about the same; the Flour market remains quiet and there is very little demand for export, but, with light receipts and stocks, holders are firm in their views, and sales only include 500 bbls straight superfine, made from new wheat, taken last evening, at \$5.50, and 300 bbls extra, the latter to the trade, at \$5.75@6.50 \$\beta\$ bbl, as to brand. The retailers and bakers are buying moderately within the above range of prices, and extra family and fancy lots at \$6.75@7.50 per bbl. Rye Flour and Corn Meal continue scarce, and a sale of the former was made at \$\psi\$ per bbl; the latter is held at the same price. Wheat—there is rather more doing, and really prime lots brought better prices, sales reaching \$1,000 bushels, in lots, at \$1.20 to \$1.30 for reds, and \$1.35 to \$1.42 for white, as in quality, in store and affoat, mostly at the highest figures. Rye is dull at 81c for old and 71c for new, Corn is also dull to-day at previous quoted rates, and yellow is offered at 92c affoat, without finding buyers, 4,600 bus, only fair quality. Penn. sold on terms kept private. Oats continue in steady demand, with further sales of 2,000 bus, new Southern at 42c.

UNTINGDON WARM SPRINGS.

The WARM SPRINGS, at the base of Warrior's Ridge, five miles North of Huntingdon, overlooking Standing-Stone Creek, and environed by romantic hills and woodlands, have been leased by the former proprietor of the Leamer House. The extensive Hotel buildings, Bath houses, &c., erected at great expense by Geth. A. P. Wuson, have been completed—and the Grotes have been beautifully laid out and adorned. The Hotel Parlors and Chambers are airy and comfortably furnished; attitute prospect, from the Verandahs, for Beauty, cannot be excelled.

For half a century, these Springs have been elebrated for their Medicinal qualities, and the Great Virtue of the waters in Rheumatic or Chronic affections. The temperature of the water being 601/2 degrees renders the Bathing delightful and invigorating. In the surrounding woods and mountains Game abounds, and the finest fish are caught in Stone creek.

Persons in pursuit of health or pleasure will find this a most delightful and healthful retreat; and its nearness to the Pennsylvania Railroad, and the cheapness of the rates charged guests, give it a decided advantage over any other watering place in the State. The Proprietor has had years of experience in the business, and no pains or trouble will be sparred to make guests comfortable.

PHACKS run from Huntingdon to Warm Springs on the arrival of the different Railroad trains—fare 25 cents. Families accommodated at moderate rates.

JOHN R. HERD, Preprictor.

WARM SPRINGS, near Huntingdon, June 30, 1858.

DANK NOTICE.—The undersigned, citizens of the county of Huntingdon, hereby give notice that they intend to make application to the next Legislature for a charter for the creation of a corporate body, with banking or discounting privileges, to be styled "The Huntingdon County Bank," to be located in the borough of Huntingdon, County of Huntingdon and State of Pennsylvania, with a capital of One Hundred Thousand Dollars, with the specific object of issuing Bank paper and doing all other things ordinarily pertaining to a Bank of issue.

CCIENTIFIC AMERICAN.—PROS-PECTUS.—Volume Fourteen begins September 11, 1858. Mechanics. Inventors, Manufacturers and Farmers, the Scientific American has now reached its Fourteenth Year, and will enter upon a New Volume on the 11th of September. It is the only weekly publication of the kind now issued in this country, and it has a very extensive circulation in all the States of the Union. It is not, as some might suppose from its title, a dry, abstruse work on technical science; on the contrary, it so deals with the great events going on in the scientific, mechanical and industrial worlds, as to please and instruct every one. If the Mechanic or Artizan wishes to know the best machine in use, or how to make any substance employed in his business—if the Housewife wishes to get a recipe for making a good color, &c.—if the Inventor wishes to know what is going on in the way of improvements—if the Manufacture. ness—if the Housewite wishes to get a recipe for making a good color, &c.—if the Inventor wishes to know what is going on in the way of improvements—if the Manufacturer wishes to keep posted with the times, and to employ the best facilities in his business—if the Man of Leisure and Study wishes to keep himself familiar with the progress made in the chemical laboratory, or in the construction of telegraphs, steamships, railroads, respers, mowers, and a thousand other machines and appliances, both of peace and war—all these desiderata can be found in the Scientific American, and not discwhere. They are here presented in a reliable and interesting form, adapted to the comprehension of minds unlearned in the higher branches af science and art.
