The Globe.

WILLIAM LEWIS,

—PERSEVERE—

Editor and Proprietor.

VOL. XV.

HUNTINGDON, PA., NOVEMBER 30, 1859.

NO. 23.

Original Poetry.

"ALL MUST DIE."

BY RIDGER.
All must die, O father,
To obey thy just command;
Then while we live let us prepare
To sit on God's right hand.
All must die, we know,
And body turn to clay;
Then let us search the Scriptures
And serve God while we may.
All must meet thy judgment,
And stand before thy bar;
To hear the "Record" of their deeds
By Christ the Ruling Star.
Then let us to Him bring others,
Or rather let us try;
For God has truly told us,
"One and all must die."

A Select Story.

A HISTORICAL ROMANCE.

It was the hour of midnight. The silvery echo of the beautiful time piece had ceased to mar the stillness, and even its soft tones had not disturbed the reveries of fair Amy Robarts.

CHAPTER III.
Twilight had stolen softly through the apartments of the maiden queen, and given to its richness a dreamy languor. Elizabeth reclined, as when we first met her, upon the same velvet couch.

CHAPTER IV.
"Nay, sweet one, drink; the ruby drops will summon the red to those pale cheeks, and thou wilt be again my Amy of old."

CHAPTER II.
The hour of three chimed sweetly through the apartments, as Leicester entered the presence of his injured wife.

A Good Story in a New Dress.

"I tell it as 'twas told to me."
A very long, long time ago, in the western part of England, there lived an aged couple whose time had passed away since early youth in the every day round of farm life, and who had never been known to have the least ill feeling towards each other since the time when old Parson Arnold had united them in the bands of wedlock, twenty-five years before.

CHAPTER III.
Twilight had stolen softly through the apartments of the maiden queen, and given to its richness a dreamy languor. Elizabeth reclined, as when we first met her, upon the same velvet couch.

CHAPTER IV.
"Nay, sweet one, drink; the ruby drops will summon the red to those pale cheeks, and thou wilt be again my Amy of old."

CHAPTER II.
The hour of three chimed sweetly through the apartments, as Leicester entered the presence of his injured wife.

For the Farmer.

Parched Corn and Honey for Hogs.

A correspondent of the Highland Democrat, published at Peekskill, in this State, furnished that paper with the following communication:—
A few years ago I chanced in Albany to meet a farmer who is noted for raising unusually heavy hogs.

CHAPTER III.
Twilight had stolen softly through the apartments of the maiden queen, and given to its richness a dreamy languor. Elizabeth reclined, as when we first met her, upon the same velvet couch.

CHAPTER IV.
"Nay, sweet one, drink; the ruby drops will summon the red to those pale cheeks, and thou wilt be again my Amy of old."

CHAPTER II.
The hour of three chimed sweetly through the apartments, as Leicester entered the presence of his injured wife.

A Variety.

"Let us all be Friends."

No sort of quarrelling pays. It is always more profitable to have the good will and good opinion of any man than to count him an enemy. The humblest man has some influence, and it is better to have that on our side than against us.

CHAPTER III.

"Nay, sweet one, drink; the ruby drops will summon the red to those pale cheeks, and thou wilt be again my Amy of old."

CHAPTER II.
The hour of three chimed sweetly through the apartments, as Leicester entered the presence of his injured wife.

Questions in Geography.

"Joseph, where is Africa?"
"On the map, sir."
"I mean in what continent—Eastern or Western?"

"Well, the land of Africa is in the Eastern continent, but the people, sir, are all of 'em down South."

"What are the products?"
"Of Africa, or down South?"
"I mean of Africa, you blockhead."

"Well, sir, it has not got any, and it never had any."

"How do the African people live?"
"By drawing."

"Drawing what—water?"
"No, sir, by drawing their breath."

"Sit down Joseph."

"Samuel, what is the equator?"
"Why, sir, it is the horizontal pole running perpendicularly through the imaginations of astronomers and old geographers."

"Go to your seat, Samuel."

"William, what do you mean by an eclipse?"
"An eclipse is a thing as appears when the moon gets on a bust, and runs again the sun, consequently the sun blackens the moon's face."

DUTIES OF A MOTHER.—She should be firm, gentle, kind, always ready to attend to her child. She should never laugh at him—at what he does that is cunning—never allow him to think of his looks, except to be neat and clean in all his habits.

They are none of the best servants that mind their wages more than their work, and they are none of the best Christians that mind their comforts and their incomes more than that homage and duty which they owe to God.

Don't hesitate upon a good resolution.

How to Farm Profitably with Little Capital.
I have noticed a very money-getting farmer in my neighborhood, who never keeps any live stock, except a couple of cows, and who never buys any feeding stuffs or manures. He grows no root crops (except an acre or two for his cows); he makes no long fallow. He keeps his land clean and fertile by plowing in green crops, which require no hoeing and labor, and only one plowing. I know he makes money, for he often purchases land; and if it is out of order, his first crop is green winter tares, plowed in and followed by buckwheat or mustard, also plowed in green. It is surprising how soon this system destroys all the weeds, and leaves the land clean and fertile.

If when he first takes the land it is much exhausted, he then does sprinkle a little guano on, to start the first green crop. By this system his expenditure is confined to rent, tithes and taxes, horse labor, and a very moderate amount of manual labor. There is no investment in live stock, food, manures, casualties, or attendance and housing of cattle. Such a man would require very little shelter or buildings. It is far cheaper than the long fallow system. He generally sows strong growing green crops, which will master or overcome the weeds.

It is the opinion of some knowing hands, that this farmer manages to get better profits than his neighbors who adopt the ordinary system.

The weakest part of this system appears to be in the disposal of the straw. On inquiry, I find that he has much difficulty in getting it trodden down or rotted. It would certainly pay him much better to steam it as straw chaff, with a little rape cake, for a few bullocks, or for his horses, so as to economize his hay and improve his manure heap. Occasionally, if his horses are not otherwise wanted, he makes a half fallow after his tares before he sows mustard or rape.

If this system of farming were generally adopted, there would not be much meat or manure produced. It appears to me only justifiable where there is a scarcity of capital or a deficiency of farm buildings.

The difficult question in agriculture is, how to get the best return for your straw, your root and your green crops. My own practice has convinced me that this can best be done by consuming much of the straw whilst feeding the root and green crops. This cannot be effected without steaming or cooking the straw, cut up, of course, into fine chaff, and mixed with other materials (as well illustrated by Mr. Horsfall,) and given warm to the animal.

When dry straw chaff is given, the animals will not consume enough, but linger after the roots. When the straw chaff is steamed with about 3 lbs. of rape cake, 1 lb. of malt combs, and 1 lb. of bran, they fill themselves well, lie down, and are comparatively indifferent about roots. The cost of this is trivial, for where steam power is used, the waste steam circulating amongst and under the coppers will keep the food hot. This gives a good opportunity of testing the qualities of rape cake; for when dissolved with the straw chaff, the smell of mustard or other improper admixtures is strongly perceptible. These remarks apply to sheep as well as bullocks. I observe that when the cooked straw chaff is put into the manger very hot they do not object to it; but, like ourselves, just give it time to be eatable cool.—The Sayings and Doings of Mr. Alderman Mechi.
