Malignant enmity has been disarmed; the fuel for sectional excitement has been taken from the incendiaries, and if we do not mistake the ready perceive that to adhere to extreme measures will insure their defeat in the Presidential contest of the present year.

Southern politicians of the Democratic party, begin to show a disposition to yield their interpretation of the principle of popular sovereignty, and to adopt as their candidate the party, not only in Pennsylvania, but one whom they have labored for two years past to show was sympathizing with their Northern opponents. It every day becomes more probable that Senator Douglas will be the candidate of the Charleston Convention. On the other hand, the more sagacious leaders of the Republican party perceive that it would be hopeless to attempt to elect any one who has been committed to the extreme measures of that party, and that to succeed they it would thrill the hearts of the Democratic must take a candidate who is not tainted with sectionalism, and who has not been connected with incendiary movements or publications. #### A Pen Portrait of Douglas.

A Washington correspondent, who heard the recent speech of Mr. Douglas in the Uni-

ted States Senate, thus writes of him : The Little Giant, as he has well been styled, is seen to advantage on the floor. Looking down on him, his want of height is not observed, while the easy dignity of his manner stamps him as the natural lord of any scene through which he moves. Short, thick set, and built with great muscularity of body, his massive and leonine head rivets undivided attention. It is a head of the antique, with something of the infinite in its expression of power; a head most difficult to describebut one better worth description, in a phrenological aspect, than any other in the coun-

Douglas has a brain of unusual size, covered with heavy and lengthy masses of dark brown hair, rather inclined to curl, thickly sprinkled with silver. His forehead is high, open, and splendidly developed—based on dark, shaggy eyebrows and of enormous width. His eyes, large and deeply set, are of the darkest and most piercing blue. His nose is short, the eyebrows lapping down over it where it joins the forehead; while the nos-trils—broad, muscular and full of power are framed in two deeply-cut channels, which slope down, and off on either side, until they low, they become exhausted. Such it is to be strike the corners of the mouth. The mouth part of the face, is full of eddying dimplesthe muscles and nerves showing great nobility, and every thought having some external reflection in the sensitive and expressive features. Add to these a rich brown complexion, very clear and healthful; shaved cheeks; a handsome and massive throat ; small white ears, almost hidden under the tangle of brown gray hair; eyes which ray out electric vivacity whenever the eyebrows are lifted; small white hands; small feet; a full chest and broad shoulders; a prominent and full under lip, which, in repose, is frequently lapped over the upper one; and with these points duly blended together, you will have a picture of the Little Giant as good as can be given under the hurry and excitement of this

etter. As a speaker, Mr. Douglas seems to disdain ornament, and marches right on against the body of his subject with irresistable power and directness. His rhetorical assault has nothing of the cavalry slash in its impressiveness, rather resembling a charge of heavy infantry with fixed bayonet and calling forcibly to mind the attack of those "six thousand English veterans" immortalized by Thomas Davis :---

"Steady they step adown the slope, Steady they climb the hill :

Steady they load-steady they fire-Marching right onward still."

Ilis voice is a rich and musical baritone, rather monotonous in its passages of statement, but swelling into occasional clarionblasts towards the close of each important period. He is heard with breathless attention, except when now and again the galleries feel tempted to applaud—these demonstrations appearing to give particular uneasiness to the Secession and Republican Senators, and drawing upon us, once or twice, angry threats that "the galleries shall be cleared if these unscemly disturbances are repeated."

Just in the middle of his speech, the Congressmen on the floor-about one hundred and fifty-received notice that a vote was about being taken in the House; and this at once produced a stampede which caused Mr. Whatever may be the result of the coming Douglas to suspend for the space of a few minutes. As fast as they had answered their names they returned-the B's first, the C's following and so on through the alphabet .--Mr. Seward against whom a great part of the Little Giant's speech is directed, sits uneasily in his chair, stroking his long face with his hands, smiling and appearing to pay close attention. It is to be hoped that he will reply when the Illinois Senator has concluded. The speech of Mr. Douglas is apparently received by all sides with great favor-even the ladies suspending the fluttering of their fans lest that might prevent their hearing .---It is a triumph, such as has seldom been witnessed in the Senate; and when he takes his seat there is a long deep sigh all through the Chamber, as if those present had been afraid to breathe deeply while the address was in

#### The Gold of Nebraska. [From the Philadelphia Argus.]

From information derived from the West, of the most reliable character, we feel ourselves warranted in saying that we have not a doubt but that the gold fields on the eastern slope of the Rocky Mountains will prove as rich, if not richer, than those of California. The conviction that the whole region near the head of the Sweet Water River, the North Fork, Lawrence River, Horse Creek, Crow Creek, Thompson's Creek, South Fork, and every stream on the eastern slope of the mountains from the head of the Missouri River to over the Pennsylvania line. In the course the Southern line of Kansas, abounds in gold, has deepened into a reality. Notwithstanding the ill-timed, injudicious,

senseless, and disastrous expeditions of last year, (which should be a warning for the future) the value of this mining district is now established.

We are informed by Mr. Schoonover, the Indian agent, who spent eighteen months in Up-perand Western Nebraska, that the goldwealth of the region in the neighborhood of Sweet | and throwing a rope around his neck, were Water River is inexhaustible, and that it only to all appearances about to put their threats requires time and labor to develope that mineral region, before which the gold fields of California will eventually sink into compara-men from the Pennsylvania side of the line tive insignificance.

The great valley of the Missouri proper is the finest agricultural country in the world, and must eventually become the Egypt of the United States, while the Western borders of Nebraska and Kansas possess a mineral wealth that it is absolutely astounding to contemplate.

In relation to this matter, we copy the following from the Nebraskian published at Omaha:

"Mining this season will be reduced to a business. Men of capial and enterprise can, and will, now employ their means in developing the canons and gulches of the Eastern slope of the Rocky Mountain ranges upon such systems and such improvements as will make it eminently profitable to themselves and of incalculable advantage to the country. The pioneer difficulties have disappeared, and a trip from Omaha to Denver is no longer regarded as a journey of hardships or duration. We have positive intelligence that with the opening of spring and the spring trade the enterprising and responsible Western Stage Company, the most certain and responsible of all transportation companies in the West, will stock the road and transport passengers and their baggage from the Omaha to Denver in five days. The wayfarer will make the journey in good comfortable coaches, enjoying the best of fare as he goes, and certain of good accommodations when he reaches his journey's end.

"In addition to this, the United States Express Company have already despatched an agent from this city to Denver and intermediate points, with a view to perfecting arrangements for connecting Omaha and Denver with that copy of speedy and safe transportation of valuables so indispensible to commercial intercourse."

#### A Voice from New York!

The indications are that Judge Douglas will lead all other candidates in the Convention who have been named for the Presidency. The New York Sun, an independent Democratic paper, thus speculates upon the chances of Mr. Douglas :

## Attempt to Lynch a Pennsylvanian in Virginia.

Great excitement was occasioned in the western part of Washington county, Pa., a few days ago, by an attempt on the part of a number of citizens of Marshall county, Va., to hang a young man named Albert Patterson, of West Finley township, Washington county, for giving too free an expression of his sentiments upon John Brown and Gov. Wise. It appears that Patterson had been invited to a wood-chopping in the village of West Union, in Marshall county, Va., just of the evening, among other topics of conver-sation, the Harper's Ferry raid was introduced, Mr. Patterson remarking in that connection, that he considered "Old Brown a fool and Gov. Wise no better."

At this the young Virginians present became greatly enraged, declaring vengeance against him for his treasonable declaration, and calling out "let's hang him," &c. Accordingly three of them seized hold of him into execution : but fortunately for Mr. Patwere passing, on their way to singing school in the immediate vicinity, and hearing the struggle, rushed into the house and relieved him. Had this timely assistance not been afforded, there is no telling what might have been the result, as Mr. P., when released from his assailants, had already been choked until he was black in the face.

When the occurrence was mentioned at the singing school, which was only at the other end of the village, it gave rise to considerable excitement, and a number of West Finley boys-neighbors of Mr. Patterson who is a peaceable and inoffensive young man-being present, it was with some difficulty they were prevented from taking summary vengeance upon the perpetrators of the outrage. Fortunately, however, predent counsels prevailed, and in all probability a sanguinary conflict prevented.

### Louisiana and Douglas.

The New Orleans True Delta of the 28th ult., in a long and able article on "the next President," says :

In Louisiana nine of ten men unconnected with Federal and State office are in favor of Stephen A. Douglas for President of these United States; and they are so from no mere personal feeling or prepossession, but solely because they are more satisfied with his past record and present position than of that or any other public man whose name could with propriety be associated with the distinguished place. His great intellect, his intrepid moral courage, his past never-to-be-forgotten services to the South and the Union; the fact that above all others he is the first and sole choice of every Northern and Western loyalist in the Union; that in the South itself no single man can be named in opposition to him, or is presented as worthy to compete single-handed against him for popular preference; all conspire to root in the enlightened mind of Louisiana what it becomes its people to do upon this national occasion, and they will not disappoint the expectations their past history inspires. Already in this city the needful preparations for sending true men to Charleston are completed, and if the people of the country parishes will only be half as active and zealous as their brethren here are sure to be, an undivided expression of opinion in

The N.Y. Courier and Enquirer indignantly denies the recent story from Washington, that there is an arrangement for Mr. Seward to retire from the contest and leave the course free
