FIRST OF APRIL CHANGES .- Those of tion to this matter will save trouble regular receipt of their papers.

BAGGAGE CAR AND CONTENTS BURNED. -The baggage car of the passenger train due here from the west at 11 P. M., was thrown off the track about three miles above this place on Wednesday night last by coming in contact with a steer. The stove in the car of camphene were upset by the jarring, fire. The car and the baggage of some sixty passengers, together with several through mails were destroyed. Some six or seven hundred dollars in hard money was taken from the ashes during Thursday and Friday, by employees of the road and a number of boys from town. The loss to the Company will be heavy as the baggage will have to be paid for.

THE WORKINGMEN'S ADVOCATE.-This is the name of the new paper which made its appearance on Thursday last. It is printed on the materials formerly used in the publication of " The Union," and makes a respectable appearance. This first number announces that it is established as the organ of a now party to be recognized as the Workingmen's Party of Huntingdon county. Both the editors, (W. heretofore acted with the Opposition | last week. party, and we cannot discover by the At a public meeting held in the John Laporte, wagon maker, Franklin reading of their adjusticle that they Court House, on Tuesday evening the Wm. THE POLITICIAN.—It is a pretty true saying that the politician who lives by the Union, the Constitution and the saying that the politician who lives by the Union, the Constitution and the John Bumgariner, farmer, Union, his "profession" must kiss the foot of enforcement of the laws, and in favor James M. Clark, agent, Carbon. every man in the Commonwealth .--He who would climb the ladder of polities must first go down from his position as a man, to begin to come up as the other thing. Intrigue, deceit, treachery, are too often absolute requirements to accomplish an individual in this business. The following honest, and in whom we can place imdescription, from Irving's Salimagun- plicit confidence. di, is as true at this day as ever it was: "To rise in this country a man must first descend. The aspiring politician may be compared to that indefatigable insect called the tumbler, which buries itself in filth, and works ignobly in them by the voice of the people in the the dirt, until it forms a little ball, primary meetings. which it rolls laboriously along like Diogenes in his tub—sometimes head, sometimes tail, foremost - pilfering ty should be represented in the estab from every rat and mud hole, and increasing its ball of greatness by the contributions of the kennel. > A VETERAN.—There resides in Shirley township, an old man Ephraim Hockenberry, who had seen General George Washington on several occasions-at Stony Point, Philadelphia, and other places. He is eighty-eight years of age, and in indigent circumstances. There are very few men living now who have seen the "Father of his Country." Sixty years have now elapsed since his death. Soon there will be none to say-"I have seen Washington."-Shir. Herald.

On the 2nd inst., the house of John Gilleland, of Springfield township; was burned with most of its contents, our subscribers who intend changing and also the house of Mr. Joshua their places of residence on or about Johns. 1,200,000 ACRES

Of Rich Farming Lands in Tracts of Forty Acres and Upward, on Long Credit and at Low Prices. MECHANICS, FARMERS, AND WORKINGMEN, The attention of the enterprising and industrious por-tion of the community is directed to the following state-ments and liberal inducements offered them by the

ILLINOIS CENTRAL RAILROAD COMPANY, Which, as they'will perceive, will enable them, by proper energy, personance, and industry, to provide comfortable and permanent homes for themselves and families, with comparatively speaking, very little capital. LANDS OF ILLINOIS.

LANDS OF ILLINOIS.

No State in the valley of the Mississippi offers so great an inducement to the settler as the State of Illinois.—

The state of the conditions of climate and soil so admirably combine to produce those two great staples, compand wheat, as the mainles of Illinois. RICH ROLLING PRAIRIE LANDS.

The deep rich loam of the prairies is cultivated with such wohderful facility that the farmers of the Eastern and Middle States are moving to Illinois in great numbers. The area of Illinois is about equal to that of England, and the soil is so rich that it will support twenty millions of EASTERN AND SOUTHERN MARKETS. These lands are contiguous to a railroad seven hundred miles in length, which connects with other roads and nav-igable lakes and rivers, thus affording an unbroken com municatation with the Castern and Southern markets.

APPLICATION OF CAPITAL. Thus far capital and labor have been applied to develop ing the soil; the great resources of the State in coal and iron are almost untonohed. The invariable rule that the mechanic arts floutish best where food and firel are cheapest, will follow at an early day in Illinois, and in the course of the next ten years the natural laws and necessites of the case warrant the belief that at least five hundred thousand people will be engaged in the State of Illinois in the various manuacturing employments.

RAILROAD SYSTEM OF ILLINOIS. RAILROAD SYSTEM OF ILLINOIS.

Over \$100,000,000 of private capital have been expended on the railroad system of Illinois. Inasmuch as part of the income from several of these works, with a valuable public fund in lands, go to duminish the State expenses the taxes are light, and must consequently every day de

The State debt'is only \$10,105,398 14, and within the ast three years has been reduced \$2.959.748 80; and we may reasonably expect that in ten years it will become vetues. PRESENT POPULATION.

The State is rapidly filling up with population; 863, 26 persons having been added since 1860, making the population 1,719,436—a ratio of 102 per cent, in ten years. AGRICULTURAL PRODUCTS.

The agricultural products of Illinois are greater that those of any other State. The products sent out during the pasty-car-exceeded 1,000,000 tons. The wheat crop of 1800 approaches 35,000,000 tonslets, while the corn croj pictls not less than 140,000,000 tonslots.

PERIMETERS than 1-40,000,000 busings.

PERIMETER OF SOIL.

Nowhere can the industrious farmer secure such immodiate results for his laber as upon these prairie soils, they being composed of a deep rich loam, the fertility of which is unsurpassed by any on the globe. TO ACTUAL CULTIVATORS.

Since 1854 the Company have sold 1,300,000 acres. They sell only to actual cultivators, and every contract contains an agreement to cultivate. The road has been constructed through these lands at an expense of \$30,000,000. In 1850, the population of the 49 counties through which it passes was only 385.085, since which 479.293 have been added, making the whole population 814,891—a gain of 143 per cent.

EVIDENCES OF PROSPERITY.

As an oxidence of the thrift of the people, it may be As an evidence of the thrift of the people, it may be stated that 600,000 tons of freight, including 8,600,000 bus of grain and 250,000 burcles of flour, were forwarded over the line last year.

EBECATION. \* Merhanics and workingmen will find the free school system encouraged by the State and endowed with a large revenue, for the support of schools. Their children can live in sight of the church and school house, and grow up with the prosperity of the leading state in the Great Western Empire,

ROHRER'S PRACTICAL CALCU-

A Book of Plain Rules and Calculations for Business Operations, by Martin M. Robrer, Practical Surveyor and Conregencer. New Edition, published by J. B. Lippin cott d. Co., Philadelphia. This work contains 204 pages, and upwards of 500 Rules and Examples, entirely and thoroughly practical, such as arise overy day in the common pursuits of Business. It has attendy passed through a number of editions in rapid succession, and is pionounced by all classes of business men to bo the handlest book of reference, pertaining to calculations, that has ever been published.

Every example in the book is worked out in full and stated in a plain manner, so that when a parallel case arises, those referring to the work will find no difficulty in solving it; in a word, the general arrangement of the CALCULATOR is simple, that any one who knows how to add, subtract, multiply and divide, can easily solve any ordinary example that arises in business, or arrive at the true result of any estimate required.

The chief aim of the author has been to eschew theory and philosophy in figures, niming only at facts and simplicity, believing that business men care little about spending time in discussing the philosophy of rules, or the scence of figures, deeming it sufficient for their purpose to be able at a moment, by reference; to ariye at the true result. The CALCULATOR differs in this respect from all other Arithmetics of the day and kindred works—it is a key to practical business calculations—it is, in the hands of the business man, what the key to mathematical works This work contains 204 pages, and upwards of 500 Rule id Examples, entirely and thoroughly practical, such a
