They have both had many years experience in the business and they feel confident in being able to give general satisfaction all who may give them work.

They will make or repair any kind of tools, wagon work loves sheefing, and all other kind of Iron work.

Thielr work will be well done and cheaper than can be had in town.

Huntingdon, April 2, 1861.—3m.* ROHRER'S PRACTICAL CALCU-And the Sacred Places Surrounding the SPLENDID STOCK HOLY CITY. AS THEY APPEARED IN ANCIENT TIMES. GROCERIES! GROCERIES!! R. JOHN McCULLOCH, offers his The above work is commended to the favorable notice of clergymen, and those having charge of Sunday-echools, Bible-classes, and public institutions.

It is about 6 feet long and 6 feet wide, colored and varnished, and mounted on cauvas with rollers.

It has been constructed from the most reliable and authentic sources, and will be found an invaluable aid to those engaged in lecturing on the Holy Land, or in imparting instruction to school classes on the subject to which it refers.

It sims to give an exact idea of the city as it appeared in ancient times. It is taken as a "bird's cyo" or "bulloon" view, the beholder being, in imagination, placed at a considerable elevation, so as to take a comprehensive view of the city and the whole country for some distance around. Conveyancer. New Edition, published by J. B. Lippuscott & Co., Philadelphia.

This work contains 204 pages, and upwards of 500 Rules
and Examples, entirely and thoroughly practical, such as
arise every day in the common pursuits of Business. It
h,
his already passed through a number of editions in rapid
succession, and is pronounced by all classes of business
men to be the handlest book of reference, partaining to
calculations, that has ever been published.

Every example in the book is worked out in full, and
stated in a plain manner, so that when a parallel case arises, those referring to the work will find no difficulty in
solving it: in a word, the general arrangement of the
OALGULATOR is simple, that any one who knows how to
add, subtract, multiply and divide, can easily solve any ordinary example that arises in business, or arrive at the
true result of any estimate required.

The chief aim of the author has boon to eschew theory
and philosophy in figures, siming only at facts and simplidity, believing that business nen care little about spending time in discussing the philosophy of rules, or the
science of figures, deeming it sufficient for their purpose
to be able at a moment, by reference, to arrive at the true
result. The CALCULATOR differs in this respect from all
other Arithmetics of the day and kindred works—it is a
key to practical business calculations—it is, in the hands
of the business man, what the key-to mathematical works
in the hands of the teacher in the school room—it facilitates time and insures correctness. professional services to the citizens of Huntingdo and vicinity. Office on Hill street, one door cast of Reed Drug Store. Aug. 28, '55. ments and liberal inducements offered them by the

Nowhere can the industrious farmer secure such immediate results for his laber as upon those parties soils, they being composed of a deep rich loam, the fertility of which is unsurpassed by any on the globe.

To Actual Cultivators.

Since 1854 the Company have sold 1,300,000 acres. They sell only to actual cultivators, and every continued contains an agreement to cultivate. The road has been continued through these lands at an expense of \$30,000,000. In 1850, the population of the 48 counties through which it passes was only 335,598, since which 479,203 have been added, making the whole population 814,501—a gain of 149 per cent.

As an evidence of the third of the people, it may be stated that 600,000 tons of freight, including 8,600,000 bus. of grain and 280,000 barrels of fluer, were forwarded over the line last year.
