On the shore, dimly seen through the mists of the deep, Where the foes haughty host in dread silence reposes, What is that which the breeze, o're the towering steep, As it siruly blows, half conceals, built discloses? Now it catches the gleen of the morning's first beam; In full glory reflected, now shines on the stream—"In the star-spangled banner! And where is that band who so vauntingly swore
That the havoe of war, and the battle's confusion,
A home and a country should leave us no more?
Theff blood has wash'd out their foul footstep's pollution
No refuge could save the hireling and slave,
From the terror of flight or the gloom of the grave!
And the star-spangled banner in triumph doth wave,
O'er the land of the free, and the home of the brave! Oh! thus be it ever, when freemen shall stand Between their loved home and war's desolation! Blessed with victory and peace, may the Reaven-rescu

A Book of Plain Rules and Calculations for Busines: O rations, by Martin M. Rohrer, Practical Surveyor a Conveyancer. New Edition, published by J. B. Lipps cott & Co., Philadelphia.

This work. R. JOHN McCULLOCH, offers, his. Conveyancer. New Edition, published by J. B. Lipping-cout & Co., Philadarphica.

This work contains 204 pages, and upwards of 500 Rules and Examples, entirely and thoroughly practical, such as arise every day in the common pursuits of Business. It has already passed through a number of editions in rapid succession, and is pronounced by all classes of business men to be the handlest book of reference, pertaining to calculations, that has ever been published.

Every example in the book is worked out in full and stated in a plain manner, so that when a parallel case arises, those referring to the work will find no difficulty in solving it; in a word, the general arrangement of the CALCULATOR is simple, that any one who knows how to add, subtract multiply and divide, can easily solve any ordinary example that arises in business, or arrive at the true result of any estimate required.

The chief aim of the author has been to espher theory, and philosophy in figures, diming only at facts and simplicity, believing that business men care little about spending time in discussing the philosophy of rules, or the science of figures, deeming it sufficient for their purpose to be able at a moment, by reference, to arrive at the trees to be able at a moment, by reference, to arrive at the true result. The CALCULATOR differs in this respect from all other Arithmetics of the day and kindred works—it is a key to practical business men, what the key to mathematical works in the hands of the teacher in the school room—it facilitates time and insures correctness.
