Istructions given in the art of Photography
R. NEWELL, GALIFRY OF ART, 721 Arch Street, Philadelphia COMMENDATIONS /
From Hon. Lewis D. Campbell, M. C., Ohlo. My family and friends all concur in the opinion that the (Newell) picture is more life-like than any thing they sever saw. My likeness has been repeatedly taken by different Artists in various ways, but I have never yet had now thich presents so true to nature, all the features an expressions of countenance as thus.

From Hon. E. Joy Morris, late Minister to Italy,

The exquisite fluish, beauty and softness of your por-raits conjoined with then durability of color and faith-hilness as likenesses, cumon fail to commend them to the attention and patronage of all who appreciate true art. Frem Col. James Page. Having occasion for a portrait, I procured one from Mr. Robert Newell, of the city of Philadelphia, a miniature in Oil Colors, under the new process discovered by hm, and take great pleasure in expressing the satisfaction given me, not only by the accuracy of the likeness, but its artistic finish in all respects, and recommends him to the patronage of those disposed to encourage the beautiful art. ROHRER'S PRACTICAL CALCU-A Dook of Plain Rules and Calculations for Business Operations, by Murtin M. Rohrer, Practical Surveyor and Conveyancer. New Edition, published by J. B. Lippincott & Co., Philadelphia. contegence. New Estaton, puotines of J. B. Lippurcett & Co., Philadelphia.

This work contains 204 pages, and upwards of 500 Rules and Examples, entirely and thoroughly practical, such as arise every day in the common pursuits of Business. It has already passed through a number of editions in rapid succession, and is pronounced by all classes of business men to be the handiest book of reference, per talaing to calculations, that has ever been published.

Every example in the book is worked out in full and stated in a plain manner, so that when a parallel case arises, those referring to the work will find no difficulty in solving it; in a word, the general arrangement of the CALCULATOR is simple, that any one who knows how to add, subtract, multiply and divide, can easily solve any ordinary example that arises in business, or arrive at the true result of any estimate requires.

The chief aim of the author has been to eschew theory and philosophy in figures, aiming only at facts and simplicity, believing that business men care little about spending time in discussing the philosophy of rules, or the
