The above work is commonded to the favorable notice of clergymen, and those having charge of Sunday-schools, stible-classes, and public institutions.

It is about 9 feet long and 6 feet wide, colored and varnished, and mounted on carvas with rollers.

It has been constructed from the most reliable and authentic sources, and will be found an invaluable aid to those engaged in lecturing on the Holy Land, or in imparting instruction to school classes on the subject to which it refers.

It aims to give an exact idea of the city as it appeared in ancient times. It is taken as a "bird's eye" or "balloon" view, the beholder being, in imagination placed at a considerable elevation, so as to take a comprehensive view of the city and the whole country for some distance around. PRACTICAL CALCULATOR.
PRACTICAL CALCULATOR.

Conceyancer. New Edition, published by J. B. Lippincott & Co. Philatelphia.

This work contains 204 pages, and upwards of 500 Rules
and Examples, entirely and thoroughly practical, such as
arise every day in the common pursuits of husiness. It
has already passed through a number of cilitions in rapid
succession, and is pronounced by all classes of business
men to be the handlest book of reference, partising by
calcinations, that has ever been published.

Every example in the book is worked out in full and
stated in a plain manner, so that when a parallel case arises, those referring to the work will find no difficulty in
solving it; in a word, the general arrangement of the
CALCULATOR is simple, that any one who knows how to
add, subtract, multiply and divide, can easily solve any ordinary example that arises in business, or arrive at the
true result of any estimate required.

The chief nim of the author has been to exchew theory
and philosophy in figures, aiming only at facts and simplicity, betteving that business men care little about sponding time in discussing the philosophy of rules, or the
science of figures, deening it sufficient for their purpose,
to be able at a moment, by reference, to arrive at the true
result. The CALOULATOR differs in this respect from all
other Arithmetics of the day and kindred works—it is a
key to practical business calculations—it is, in the hands
of the business man, what the key to mathematical works
in the hands of the teacher in the school room—it facilitates time and insures correctness.

THE WORK TREATS OF THE

Measurement of Land, of Lumber, of Brick and Brick
Work, of Stone and Stone work, of grain and grain bina,
of coul and coal bins, of wood, of solids, of liquids, of circular, square or irregular vessels, of cisterna and sats, of
roofing, of plasterer's, painter's, glazler's, paver's, planbor's, paper langer's and upholsterer's work. It treats of
currency and of fureign and domestic exchange, of the
decimal system, of reduction and its extended application
to business, of simple and compound interest, and their
entire application to business transactions, with to laws
and usages governing the same, together with numerous
commercial forms—of legal tender, of partial payment on
notes, of banking and bank discount, of equation of payment and of partnership accounts, of assessmont of taxs,
of weights and measures, of square and cubic measure, of
the square root and its application to business of surfaces,
of excavation, and of many other important practical
matters not within the scope of an advortisement to mention.
