It alms to give an exact idea of the city as it appeared in ancient times. It is taken as "bitd's eye" or "bullono" view, the beholder being, in inagination, placed at a considerable elevation, so as to take a comprehensive riew of the city and the whole country for some distance around.

The view is accompanied with an Outline Key, in which the different localities are numbered, and a Descriptive Manual containing all the information necessary to maniple one to use the view to advantage in teaching or locatoring.
