Huntington, March 11, 1602-66.
Executor. TOHN F. RAMEY, County Surveyor Doweparteer. New Edition, published by T. B., Lippins cott & Co., Philadelphia.

This work contains 204 pages, and upwards of 500 Bules and Examples, entitely and thoroughly practical, such as arise every day in the common pursuits of Business. It has already passed through a number of editions in rapht succession, and is pronounced by all classes of jusiness must be the handlest book of references, pertaining to calculations, that has ever been published.

Every example in the book is worked out in full and stated in a plain manner, so that when a parallel case arise, at those referring to the work will find no difficulty in solving it in a word, the general arrangement of the CALCULATOR is simple, that any one who knows how to add, subtract, multiply and divide, can easily adve any ordinary example that arises in business, or arive at the tree result of any estimator required.

The chief aim of the author has been to eschew theory and philosophy in figures, siming only at facts and simplicity, believing that business men care lattle about apending time in discussing the philosophy of rules, or the science of figures, deening it sufficient for their purposes to be able at a monent, by reference, to arrive at the treatment. The CALCULATOR differs in this respect from all other Arithmetics of the day and kinded works—it is a key to practical business calculations—it is, in the hands of the business man, what the key to mathematical works in the hands of the teacher in the school room—it facilitates time and insures correctness.
