This work contains 204 pages, and upwards of 500 Ruley and Examples, entirely and thou oughly practical, such as artises every day in the common pursuits of Business. Has artised years of the common pursuits of Business. This artises were personally and Classes of Duslaws men to be the handlest book of reference, pertaining to calculations, that has ever been published.

Every example in the book is worked out in full and stated in a plain manner, so that when a parallel case arrises, those referring to the work will find no difficulty in solving it: in a word, the general arrangement of the CALCULATOR is simple, that any one who knows how to add, subtract, multiply and divide, can easily solve any ordinary example that arises in business, or arrive at the true result of any estimate required.

The cluef aim of the authar has been to eschew theory and philo-only in figures, aiming only at facts and simplicity, believing that business men care liftle about spending time in discussing the philosophy of rules, or the scence of figures, deeming it sufficient for their purpose to be able at a moment, by reference, to arrive at the true result. The CALCULATOR (filters in this respect from all other Arthmetics of the day and kinded works—it is a key to pnactical business calculations—it is, in the hands of the business man, what the key to mathematical werks in the hands of the teacher in the school room—it facilitates time and insures correctness.
