Celebrated "Corrugated Metal" Pens

PENS, made by C. BARNARD, are the best Commercial and School Pens, without exception to any. They are used by all the principal Banks and Governmen Departments, Public and Private Schools; also, by the most prominent Commercial Houses throughout the United States and Counted.

But a short time has elapsed since

O. BARNARD'S PENS have been introduced into the United States, still a marked preference is given them over all others for the following reasons: The 'Corrugated Mosta' PENS do not corrode; they will not splatter or cut through the thinnest paper; they have an easy gliding motion, a certainty of equally diffusing the ink, softeness of point, and great durability.

The following testimonials, selected from numerous others, are respectfully submitted;

i have used the Metallic Pens of Mr. C. Baragal and highly approve of them.

C. BARSTOW,

Tresident of St. Nicholas Bank, New York. We have used the Pens of Mr. Barnard, and flud then to be as he represents, and teke pleasure in reponuncing them to the public.

Of all Pens I have ever used, Mr. Barnard's have given me more satisfaction, and I can recommend them to the public as being entirely anti-correstion. E. POIRER, New York. After six mouths' constant use of C. Barnard's Anti-Corrosivo Pen, we can confidently recommend it as the best metallic pen we have ever used, finding from the above experience that it does not actually corroll S. ROHRER'S PRACTICAL CALCU-D CHREET'S PRACTICAL CALCULATOR.

A Book of Plain Rules and Culculations for Business Operations, by Martin M. Roher, Practical Surveyor and Conveyorance. New Edition, published by J. B. Lippin, cott & Co., Plaidelphia.

This work contains 204 pages, and upwards of a 00 Rule and Examples, entirely and thoroughly practical, such has already passed through a number of editions in rapit, succession, and is pronounced by sil classes of busineds, men to be the handlest book of reference, pertaining sq. calculations, that has ever been published.

Every example in the book is worked out in full and stated in a plain manner, so that when a parallel case arises, those referring to the work will find no difficulty in solving it; in a word, the general arrangement of the CALCULATOR is simple, that any one who knows how to add, subtract multiply and divide, can easily solve any ordinary example that arises in business, or arrive at the true result of any estimato required.

The chief aim of the author has been to eschew theory and philosophy in figures, aiming only at facts and simplicity, believing that business men care little about spanding time in discussing the philosophy of rules, or the science of figures, deening it sufficient for their purpose to lea able at a moment, by reference, to arrive at the true result. The CALCULATOR differs in this respect from all other Arithmetics of the day and kindred works—it is a key to practical business calculations—it is, in the hands of the bascher in the school room—it facilitates time and insures correctness.

THE WORK TREATS OF THE

Measurement of Land, of Lumbor, of Brick and Brick Work, cf 5 those and Stone work, of grain and grain blies.
