The following testimonials, selected from numerous there, are respectfully submitted:

I have used the Metallic Pens of Mr. C. Barnard and ighly approve of them.

C. BARSTOW, Testidnat of St. Nicholas Bank, New York. We have used the Pens of Mr. Panuard, and find then to be as he represents, and take pleasure in recommending them to the public.

A Book of Plain Rules and Culculations for Business Operations, by Mortin M. Rohrer, Practical Surveyor and Concepturer. Now Edition, published by J. B. Lippin cott & Co., Philadelphia.

This work contains 201 pages, and upwards of 000 Rules and Examples, entirely and thoroughly practical. washis arise every day in the common pursuits of Basiness, the has already possed through a number of editions in 129 succession, and is pronounced by all classes of busined men to be the handlest book of reference, pertaining calculations, that has ever been published.

Every example in the book is worked out in full and stated in a plain manner, so that when a parallel case artess, those referring to the work will find no difficulty in solving it; in a word, the general arrangement of the CALCULATOR is simple, that any one who knows how to, and, subtract, multiply and divide, can easily solv any ordinary example that arises in business, or arrive at the true result of any estimate required.

The chief aim of the author has been to eschew theory and philosophy in figure, aiming only at facts and simplicity, believing that business men care little about spending time in discussing the philosophy of rings, or the science of figures, deeming it sufficient for their purpose to be able at a moment by reference, to arrive at the true result. The CALCULATOR differs in this respect from all; other Arithmetics of the day and kinderd works—it is a key to practical business calculations—it is, in the hands, of the business man what the key to mathematical works in the lands of the teacher in the school room—it facilitates time and insures correctness.

THE WORK TREATS OF THE Measurement of Land. of Lumber, of Brick and Brick, Work of Stone and Stone work, of grain and grain blong, of coal and coal bins, of wood, of solids, of liquids of circ. cular, square or irregular vessels, of cisterns and wats, of roofing, of plasteer's, painter's, plaster's, paver's, plant or's. paper hanger's and uphol-teres's work. It treats of currency and of foreign and domestic exchange, of the decimal system, of reduction and its extonded application, to business, of simple and compound interest, and their-entire application to business to a simple and compound interest, and their-entire application to business to a succession, and the laws, and usages governing the same, together with manuscruss commercial forms—of legal tender, of partial payment en, notes, of banking and bank discount, of equation of payment said of partnership accounts, of assessment of faxes, of weights and measures, of square and cubic measure, of the square root and its application to basiness of surfaces, of exavation, and of many other important practical matters not within the scope of an advertisement to meution.
