FLAX! FLAX!! FLAX!!! THE UNDERSIGNED HAS SEcured the latest improved machinery for breaking and acutching Flax. It is now in successful operation. I desire it to be understood that I am prepared to buy all the flax that the farmers raise, above their household wants, and if they desire I will prepare what they want for their own use. This machinery will dress in two days more flax than one man can in the ordinary way in thirty days. The flax after it is pulled and seperated from the stock, should be spread on a meadow, thinly and regularly, to be exposed to the dews for a week or ten days notil the stock assumes a silver groy color, the under side should then be turned up and treated in the same way. On a dry day it can then be tied in bundles and is ready for the mill. It is not necessary to dry it by fire or smoketi over an oven, as this is only trouble for nothing. An acre of good flax is worth from thirty to thirty-dve dollars without counting the seed. Sumae will also be bought.
