THE HIGH PRICES RULING FOR Cotton Goods has compelled public attention to be more specially directed to the culture of Flax. It can be made by some attention, one of the most valuable products a farmer cau produce; an acre readily producing 50 to 60 Dollars worth of fibre and seed. Great care should be taken by growers to have their Flax spread very thin whon rolling; when watered sufficiently on one side, it should be turned, and subject to exposure until all the stalks get a grey color, and the lint readily separates from the wood by a gentle rub.

It should on a very dry day be fied in bundles, and is then ready for the mill. As a general thing too much seed is sown on an acre. Unless the ground is very rich CALL at the new CLOTHING STOR of GUTMAN & CO., if you want a goed article.

The Government requires all daties on imports to be paid in Coin; these duties have, for a long time past, amounted to over a Quarter of a Million of Dollars daily, a sum nearly three times greater than that required in the payment of the interest on all the 5-20's and other permanent Loans.
