ROHRER'S PRACTICAL CALCU

Book of Plain Rules and Calculations for Business Operations, by Marlin M. Rohrer, Practical Surveyor and Conveyancer. New Edition, published by J. B. Lippin cott & Co., Philadelphia. Consequencer. New Edition, published by J. B. Lippincott & Co., Philadelphia,

This work contains 204 pages, and upwards of 500 Rules
and Examples, entirely and thoroughly practical "ch as
arise every day in the common pursuits of Business." It
has already passed through a number of editions in rapid
succession, and is pronounced by all classes of business
mon to be the handlest book of reference, pertaining to
calculations, that has ever been published.

Every example in the book is worked out in full and
stated in a plain mannor, so that when a parallel case arisact those referring to the work will find no difficulty in
solving it; in a word the general arrangement of the
CALOULATOR is simple, that any one who knows how to
add, subtract, multiply and divide, can easily solve any ordinary example that arises in business, or arrive at the
true result of any estimate required.

The chief sim of the author has been to eschew theory
and philosophy in figures, siming only at facts and simplicity, believing that business mon care little about spending time in discussing the philosophy of rules, or the
science of figures, deeming it sufficient for their purpose
to be able at a moment, by reference, to arrive at the true
result. The CALOULATOR differs in this respect from all
other Arthmetics of the day and kindred works—it is a
key to practical business calculations—it is, in the hands
of the business man, what the key to mathematical works
in the lands of the teacher in the school room—it facilit
tates time and insures correctness.

THE WORK TREATS OF THE

Measurement of Land, of Lumber, of Brick and Brick Work, of Stone and Stone work, of grain and grain bins of coal and coal bins, of wood, of soilds, of liquids of circular, aquare or irregular reasels, of ciatorns and vare, of roofing, of plasterer's, painter's, glazier's, paver's, plumb or's, paper hanger's and upholsterer's work. It treats of currency and of foreign and domestic exchange, of the declinal system, of reduction and its extended application to business, of simple and compound interest, and their entire application to business transactions, with the laws and usages governing the same, togother with numcrous commercial forms—of legal tender, of partial payment on notes, of banking and bank discount, of equation of payment and of partnership accounts, of assessment of taxes of weights and measures, of square and cubic measure, of the square root and its application to business of surfaces, of excavation, and of many other important practical matters not within the scope of an advertisement to mention.

IT IS JURT THE BOOK FOR THE

IT IS JUST THE BOOK FOR THE IT IS JUST THE BOOK FOR THE
Farmer, the merchant, the mechanic the artisan, or the
professional man. It has proven a valuable auxiliary to
the lawyer. The justice of the peace, the conveyancer, and
red estate broker, to the assessor, the banker, the clerk
to the civil engineer and the surveyor, to the carpenter
cad brickleyer, to the stonemson and the plasterer,?
the paper hanger and upholsterer, to the paver and the
tiler, &c. &c.; each and all will find it adapted to their va
rious wants better than any book published.
