June 18, 1802. SCHOOL BOOKS,

This work contains 204 pages, and nywards of \$60 Rules and Examples, entirely and thoroughly practical "wh as svise every day in the common pursuits of Busilesses. 'I has already passed through a number of celltions in rapid accession, and is pronounced by all classes of business men to be the handlest book of reference, pertaining to calculations, that has ever been published.

Every example in the book is worked out in full and stated in a plain manner, so that when a parallol case arises, those referring to the work will find no difficulty in solving it; in a word, the general arrangement of the CALCULATOR is simple, that any one who knows how to add, subtract, multiply and divide, can easily solve any ordinary example that arises in business, or arrive at 1e true rosult of any estimato required.

The chief aim of the author has been to eschow theory and philosophy in figures, alming only at facts and simplicity, believing that business ene care little about apending time in discussing the philosophy of rules, or the science of figures, deeming it sufficient for their purpose to be able at a moment, by reference, to arrive at the true reault. The GALCULATOR differs in this respect from all other Arithmetics of the day and kindred works—if is a key to practical business calculations—it is, in the hands of the business man, what the key to mathematical works in the hands of the teacher in the school room—it facilitates time and insures correctness.
