The saving of garments will alone pay a large per centage on its cost. We think the machine much more than "pays for itself every year" in the saving of garments! There are several kinds, nearly alike in general construction, but we consider it important that the Wringer be fitted with Cogs, otherwise a mass of garments may clog the rollers, and the rollers upon the crank-shaft slip and tear the clothes, or the rubber break loose from the shaft. Our own is one of the first make, and it is as good as New after nearly four years. Every Wringer with Cog Wheels is War-

The property this Powder possesses in increasing the quantity of Milk in Cowe, gives it an importance and value which should place it in the hands of every person keeping a Cow. By actual experiment it has proven that it will increase the quantity of Milk and Oream twenty per cent., and make the Butter firm and sweet. In fattening Cattle, it gives them an appetite, loosens their hide and makes them thrive much faster.

ROHRER'S PRACTICAL CALCU-

Book of Plain Rules and Calculations for Business Operations, by Martin M. Rohrer, Practical Surveyor and Conveyancer. New Edition, published by J. B. Lippinott & Co., Philadelphia. Conveyancer. New Edition, published by J. B. Lippincott & Co., Philadelphia.

This work contains 204 pages, and upwards of 500 Rules and Examples, entirely and thoroughly practical whas arise overy day in the common pursuits of Business. It has already passed through a number of editions in rapid succession, and is pronounced by all classes of business men to be the handlest book of reference, pertaining to calculations, that has erre been published.

Every example in the book is worked out in full and stated in a plain manner, so that when a parallel case arises, those referring to the work will find no difficulty in solving it; in a word, the general arrangement of the OALCULATOR is simple, that any one who knows how to add, subtract, multiply and divide, can easily solve any ordinary example that arises in business, or arrive at it et rue result of any estimate required.

The chief aim of the author has been to exchew theory and philosophy in figures, aiming only at facts and simplicity, believing that business mon care little about spending time in discussing the philosophy of rules, of the science of figures, deeming it sufficient for their purpose to be able at a moment, by reference, to arrive at the true result. The OALCULATOR differs in this respect from all other Arithmetics of the day and kindred works—if is a key to practical business calculations—it is, in the hands of the business man, what the key to mathematical works in the hands of the teacher in the school room—it facilitates time and insures correctness.
