Green Grad The Control FLAX. FLAX.

HE HIGH PRICES RULING FOR Cotton Goods has compelled public attention to be more especially directed to the culture of Flax. It can be made by some attention, one of the most valuable products a farmer can produce; an acre readily producing 50 to 60 Dollars worth of fibre and seed. Great care should be taken by growers to have their Flax spread very thin when rolling; when watered sufficiently on one side, it should be turned, and subject to exposure until sall the stalks get a grey color, and the lint readily soparate from the wood by a gentle rab.

It should on a very dry day be tred in bundles, and is then ready for the mill. As a general thing too much seed is sown on an acro. Unless the ground is very rich one Bushel per acre is sufficient. If the ground is very strong one and one fourth bushelis ample.

ALEXANDRIA BREWERY. THE undersigned having purchased from T. Newell his interest in the Alexandria Brewery, the business will hereafter be carried on under the firm of E. O. COLDER & CO., and old customers and the public generally are informed that all orders will receive prompt attention.
