This work contains 204 pages, and appears of 500 Rules and Examples, entirely and theronguly practical rechandles are severy day in the common pursuits of Business. It has already passed through a number of editions in rapid succession, and is pronounced by all disasses of business men to be the handiest book of recomplex, pertaining to calculations, that has ever been published to the calculations, that has ever been published to the fall and stated in a plain manner, so that when a parallel case artices, those referring to the work will find a difficulty in solving it; in a word, the general arrangement of the CALCULATOR is simple, that any one who know how to ald, subtract, multiply and diride, can easily zive any or true result of any estimate required.

The chief aim of the author has been to escher theory and philosophy in figures, aiming only at facts and simplicity, believing that business mer care little shout spinading time in discussing the philosophy of rules, or the science of figures, deening it sufficient for their purpose to be able at a moment, by reference, to arrive at the true result. The CALCULATOR ildiffers in this respect from all other Arithmetics of the day and kindred works—il is a key to practical business calculations—il is, in the hands of the teacher in the school, room—if facili tates time and insures correctness.
