rectors of the Ponnsylvania Central Railroad propose to make a survey of a route from Tyrone to near Blairsville, by which the great tunnel on the mountain will be avoided, and several miles saved in the distance between the points named. The reason for this movement is said to be an apprehension that the tunnel may cave in. How the Late Fraud Was Discovered.

The late New York election fraud was detected by accident. The Baltimore American tells how in the following paragraph: "A delay occurring in the receipt of these proxies of votes in some of these counties of New York, an agent of the Union Central Committee of Clinton county was dispatched to this city to look after the matter, and distribute tickets among the soldiers in camp and hospital. The gentlemen whom we will call Jones for the time, found that something was wrong in the voting, and that lowing letter of a soldier, which reamong other things, the oath necessary to the power of attorney was not being administered. He proceeded to the office of Govenor Seymour's Commissioner, M. J. "The intelligent contraband, laboring earnestly for the cause of McClellan and Seymour, Vallandingham and Ben Wood, was seen scated at a desk, busily engaged signing votes in the interest of the peace-at-any-terms party. Mr. Jones' attention was called from the 'nigger' to a large blank book, with the remark that that record book contains 2,000 names of men who have been in the hospital once' where they are now, or whether dead or alive; I do not know, but they are all good for a democratic vote. As Mr. Jones was about to depart from the office he was urgently requsted to help in the work by the Commissioner, and being fully impressed with the rottenness and fraud of the entire arrangement, he consented. Major General Wallace was agent of Governor Seymour to the supervisors of the election returns, when they were opened."

SHORTENING THE ROUTE,-The Di- repulsing twice their numbers when ssaulted, or of putting them to flight when attacking on the offensive.

This action on the part of the Govrnment in making this contract is highly commendable, but had it occurred earlier in the war we should have been spared many disasters. The English Government has taken

a contrary course. Recognizing the efficiency of the breech-loading principle it has issued orders through Lord le Grey, for proposals to alter the Enfield rifle into a breech-loading weapon, at an expense not to exceed is the Springfield musket we use, and the results will probably be to spoil both weapons—to ruin a good rifle and make a poor breech loader. Our course and are on the safe side, for the record of the Spencer rifle is already made, and, not to perpetrate a witti cism, will now be repeated.—Scientific American, Oct. 29.

#### The Horrors of a Rebel Prison. The Eric Dispatch publishes the folveals a new feature in the horrors of Rebel prisons:

IN CAMP AT ATLANTA, GA., ) September, 24, 1864. Dear Brother: I am as well as can

enough to explain the place to you, but I have thought, if there was such a place as hell on earth, that was one of them, for some were praying, others preaching and others damning them for making a noise. Some were dying, others cursing their Maker-some murdering, others gambling—some stealing, and others calling for God to help them, and others calling for some one to come and pray for them.

Such a place I never want to see again as long as I live. \* \* \* I am so weak that I can't write long at a time. \* \* \* Yours truly.

## Semmes Again Afloat.

The last European steamer brings news that the pirate Semmes is again at sea, in command of a swift and strong steamer named the Ranger. The Liverpool correspondent of the Londen Daily News says; "Captain Semmes, of whom since the sinking of the Alahama we have heard so little, apprised of the facts of the case, and and that little so erroneous, sailed with his usual promptness at once set from the Mersey on Sunday last (Octo work to bring matters to a conclu- tober 9th.) on board the bark Laurel, sion. This vessel is sup posed to be a new screw steamer which was lying at Madeira on the 3d instant, and was there known under the name of the Ranger. The Ranger is large and very swift. To show that Captain Semmes does not go unattended, we may here state that he took with him on board the Laurel eight separate officers and one hundred men, most of 7 10 P.M., and arrives at Altoona at 8 50 P. WHAT EVERYBODY RNOWS, viz:—
That Iron well galvanized will not rust;
That a simple machine is better than a complicated one
That a wringer should be self-adjusting, durable, and
efficient;
That Thumb-Screws and Fastenings cause delay and
trouble to regulate and keep in order;
That wood soaked in hot water will swell, shrink and plit; That wood bearings for the shaft to run in will wear That two contings to the analytic transition out;
That the Putnam Wringer, with or without cog wheels will not tear the clothes;
That cog-wheel regulators are not essential;
That the Putnam Wringer has all the advantages, and not one of the disadvantages above named;
That all who have tested it, pronounce it the best Wringer green made;
That it will wring a Thread or a Bed Quilt without alteration.

That it will wring a Thread or a Bed Quilt without atteration.

We might fill the paper with testimonials, but insert only a faw to convince the skeptical, if such there be; and we say to all, test Putnam's Wringer. Test it thoroughly with any and all others, and if not entirely satis factory, return it.

No. C. LEFFERTS, No. 100 Berkman be.

New York, January, 1861.

We have tested Putnam's Clothes Wringer by practical working, and know that it will do. 'It is cheap; it is simple; it requires no room, whether at work or at rest; a child can operate it; it does its duty thoroughly; it saves time and it saves wear and tear. We entractly advise all who have much washing to do, with all intelligent persons who have any, to buy this Wringer. It will pay for itself in a year at most.

HON. HORACE GREBLEY.

HE HIGH PRICES RULING FOR otton Goods has compelled public attention to be more specially directed to the culture of Flax. It can be made by some attention, one of the most valuable products a farmer can produce; an acre readily producing 60 to 60 Dollars worth of fibre and seed. Great care should be taken by growers to have their Plax spread very thin when rolling; when watered sufficiently on one side, it hould be turned, and subject to exposure until all the talks get a grey color, and the lint readily separates from the wood by a gentle rub.

It should on a very der day be tied in bundles, and in then ready for the mill. As a general thing too much seed is sown on an acre. Unless the ground is very rich one Bashel per scro is sufficient. If the ground is very strong one and one fourth bushel is ample. Dec 18, 1892.
