WHAT EVERYBODY KNOWS, viz:—

That Iron well galvanized will not rust;

That a simple machine is better than a complicated one That a wringer should be self-adjusting, durable, and dictent: florient;
That Thumb-Screws and Fastenings cause delay and rouble to regulate and keep in order;
That wood soaked in hot water will swell, shrink and split;
That wood bearings for the shaft to run in will wear ut; That the Putnam Wringer, with or without cog wheels will not tear the clothes; will not tear the clothes;

That copywheel regulators are not essential;

That the Putnam Wringer has all the advantages, and not one of the disadvantages above named;

That all who have tested it, 1-concurred it the best Wringer ever made;

That it will wring a Thread or a Bed Quilt without alteration.

That it will wring a Thread or a Bed Quilt without alteration.

We might fill the paper with testimonials, but Insert only a few to convince the skeptical, if such there be; and we say to all, test. Putnam's Wringer. Test it thoroughly with any and all others, end if not entirely satis factory, return it.

GENTLEMEN: I know from practical experience that iron well galvanized with zine will not oxidize or rust one particle. The Putnam Wringer is as near perfect as possible, and I can chearfully recommend it to be the best in use.

Interest of the above statement to all particulars.

Now York, January, 1884.

We have tested Putnam's Clothes Wringer by practical working, and know that it will do. It is cheap; it is simple; if requires no room, whether at work or at rest; a child can operate it; it does its duty theroughly; it saves time and its aves wear and tear. We carnestly advise all who have much washing to do, with all intelligent persons who have any, to buy this Wringer. It will pay for itself in a year at most.
