WHAT EVERYBODY KNOWS, viz:—
That Iron well galvaulzed will not rust;
That a simple machine is better than a complicated, one
That a wringer should be self-adjusting, durable, and fficient; : That Thumb-Screws and Fastenings cause delay and ouble to regulate and keep in order; That wood scaked in hot water will swell, shrink and

plit; That wood bearings for the shaft to run in will wear out;
That the Putnam Wringer, with or without cog wheels
will not tear the clothes;
That cog wheel regulators are not essential;
That the Putnam Wringer has all the advantages, and
not one of the disadvantages above named;
That all who have tested it, pronounce it the best
Wringer ever made;

That it will wring a Thread or a Bed Quilt without al eration.

We might fill the paper with testimonials, but insert only a few to convince the skeptical, if such there he; and we say to all, test Putnam's Wringer. Test it thoroughly with any sud all others, and if not outliedy satisfactory, return it.

This work contains 204 pages, and upwards of 500 Rules and Examples, entirely, and thoroughly practical. The same arise every day in the common pursuits of Business. It has already passed through a number of editions in rapid succession, and is pronounced by all classes of business men to be the handlest book of reference, pertaining to calculations, that has ever been published.

Every example in the book is worked out in full in a stated in a plain manner, so that whon a parallel case arises, those referring to the work will find how difficulty in solving it; in a word, the general arrangement of the CALCULATOR is simple, that any one who knows how to, add, subtract, multiply and divide, can easily solve any ordinary example that bearies in husiness; nor arrive at itter true result of any estimate required.

The chief aim of the author has been to eschem theory and philosophy in figures, aiming only at facts and simplicity, believing, that business mor care little about spending time in discussing the philosophy of rules, or the science of figures, deeming it sufficient for their purpose to be able at a moment, by reference, to arrive at it, true result: The OALCULATOR differs in this temples from all other Arithmetics of the day and kindred works—it is a key to practical business man, what the key to mathematical works—in the hands of the business man, what the key to mathematical works—in the hands of the teacher is the school toom—it facilitates time and insures correctness.

Measurement of Land, of Limber, of Brick and Brick Work, of Stone and Stone work, of grain and grain bins of coal and coal bins, of wood, of solids, of liquids of circular, square or irregular vessels, of cisterns and vats, of roofing, of plasterer's, palner's, player, paver's, plumber's, payer langer's and upholaterer's work. It treats of currency and of foreign and domestic exchange, of the decimal system, of roduction and tis extended application to business, of simple and compound interest, and their entire application to business triangencions, with the laws and usages governing the same, together with numcrous commercial forms—of legal tender, of partial payment on notes, of banking and bank discount, of equation of payment and of partnership accounts, of, assegment of taxes, of weights and measures, of square and cubic measure, of the square root and its application to business of surfaces, of excavation, and of many other important practical matters not within the scope of, an advortisement to men.
