Facts About the 7-30s-The Advantage they Offer.

Their Absolute Security.-Nearly all active credits are now based on Government securities, and banks hold them as the very best and strongest investment they can make. If it were possible to contemplate the financial failure of the Government, no bank would be any safer. If money is loaned on individual notes or bond and mortgage, it will be payable in the same currency as the Government pays with, and no better. The Government never has failed to meet its engagements, and the national debt is a first mortgage upon the whole property of the country. While other stocks fluctuate from ten to fifty, or even a greater per cent. Government stocks are always comparatively firm. Their value is fixed and reliable, beyond all other securities; for while a thousand speculative bubbles rise and burst, as a rule they are never below par, and are often above.

Its Liberal Interest .- The general rate of interest is six per cent, payable annually. This is seven and threetenths, payable semi-anuually. If you lend on mortgage, there must be a searching of titles lawyers' fees, stamp duties and delays, and you will finally have returned to you only the same kind of money you would receive from invest in this loan, you have no trouble. Any bank or banker will obtain it for you without charge. To each note or bond are affixed five "coupons" or interest tickets, due at the expiration of each successive half-year. The holder of a note has simply to cut off one of these coupons, present it to the nearest bank or Government Agency, and receive his interest; the note itself need not be presented at all. Or a coupon thus payable will everywhere be equivalent, when due, to money. If do it with. If you wish to sell, it will bring within a fraction of cost and interest to any moment. It will be very handy to have in the house.

It is Convertible into a six per cent. gold-bearing bond. At the expiration ing payment in full or of funding his notes in a six per cent gold-interest bond, the principal payable in not less than five, nor more than twenty years from its date, as the Government may elect. These bonds are held at such a premium as to make this privilege now worth two or three per cent. per annum, and adds so much to the interest. Notes of the same class, issued three years ago, are now selling at a rate that fully proves the correctness of this statoment.

Taxation.—But aside from all the adston's army are gratifying, and that vantages we have enumerated, a specific superior of North Carolina are docial Act of Congress exempts all bonds ing their duty. It is a National Savings Bank .-While this loan presents great advantages to large capitalists, it offers special inducements to those who wish to make a safe and profitable investment of small savings. It is in every way the best Savings' Bank; for every institution of this kind must somehow invest its deposits profitably in order to pay interest and expense. They will invest largely in this loan, as the best investment. But from the gross A train will go through to day to interest which they receive, they must Goldsboro. The prisoners captured by deduct largely for the expenses of the sums over \$500. The person who invests directly with Government will receive almost 50 per cent more. Thus the man who deposits \$1000 in a private Savings' Bank receives 50 dollarsa take a few days' rest, and Sherman year interest; if he deposits the same may make a brief visit to Gen. Grant. receives 73 dollars. For those who wish to find a safe, convenient, and profitable means of investing the surplus earnings which they have reserved for their old age or for the benefit of for their old age or for the benefit of way to the front, and long wagon their children, there's nothing which trains arriving, to be loaded with sup-

The Highest Motive.-The war is evidently drawing to a close, but while layed. Unless Johnston desires to it lasts the Treasury must have money provoke a battle unequal and disasterto meet its cost, and every motive that ous for his own part, he may remain patriotism can inspire should induce for a week, at least, in tolerable secuthe people to supply its wants without rity. THE SAFEST INVESTMENT .- The experience of the past two weeks has been instructive to capitalists: it has taught them that Government Stocks are the only stable investment. While everything else has declined ruinously, they have been as firm as a rock; while faith in everything else has diminished, faith in U.S. Securities have grown daily. The result is, everybody regards them the safest investment; in fact the only safe investment at the present time, and will continue to be so regarded.
