THE HIGH PRICES—RULING FOR Cotton Goods has compelled public attention to be drawn especially directed to the culture of Flax. It can be made by some attention, one of the most valuable products a farmer can produce; an acre readily producing 50 to 60 Dollars worth of flax and seed. Great care should be taken by growers. Have their Flax spread very thin when rolling; when watered sufficiently on one side, it should be turned, and exposed to exposure until all the stalks get a grey color, and the flax readily separates from the wood by a gentle rub.

It should on a very dry day be dried in bundles, and be then ready for the mill. As a general thing too much seed is sown on an acre. Unless the ground is very rich one bushel per acre is sufficient. If the ground is very strong one and one fourth bushel is ample. July 16, 1865.
