THE HIGH PRICES RULING FOR Cotton Geods has compelled public attention to be more especially directed to the culture of Flax. It can be made by some attention, one of the most valuable products a farmer can produce; an acre readily producing 50 to 60 Dollars worth of fibre and seed. Great care should be taken by growers have their Flax spread very thin when rolling; when watered sufficiently on one side, it should be turned, and subject to exposure until all the stalks get a grey color, and the lint readily separate

from the wood by a gentle rub. It should on a very dry day be tied in bundles, and is then ready for the mill. As a general thing too much COUNTRY DEALERS can
