FLAX. FLAX.

The high prices ruling for Cetton Goods has compelled public attention to be more especially directed to the culture of Flax. It can be made by some attention, one of the most valuable products a farmer can produce; an acre readily producing 50 to 60 Dollars worth of fibre and seed. Great care should be taken by growers have their Flax spread very thin when rolling; when watered sufficiently on one side, it should be turned, and subject to exposure until all the stalks get a grey color, and the lint readily separat

from the wood by a gentle rub, It should on a very dry day be fied in bundles, and is Diseases of the Nervous, Seminal, Urin-then ready for the mill. As a general thing too much ary and Sexual Systems, then ready for the mill. As a general thing too much seed is sown on an acre. Unless the ground is very rich one Bushel per nero is sufficient.
