FLAX. FLAX.

HE HIGH PRICES RULING FOR Cotton Goods has compelled public attention to be morespecially directed to the culture of Flax. It can be made by some attention, one of the most valuable products a farmer can produce; an acre readily producing 50 to 60 Dollars worth of fibre and seed. Great care should be taken by growers have their Flax spread very thin when rolling; when watered sufficiently on one side, it should be turned, and subject to exposure until all the stalks get a groy color, and the lint readily separates from the wood by a gentle rub.

It should on a very dry day be tied in bundles, and is hen ready for the mill. As a general thing too much seed is sown on an acro. Unless the ground is very rich one Bushel per acro is sufficient. If the ground is very strong one and one fourth bushel is ample.
