FLAX, FLAX.

HE HIGH PRICES RULING FOR Cotton Goods has compelled public attention to be more especially directed to the culture of Flax. It can be made by some attention, one of the most valuable products a farmer can produce; an acre readily producing 50 to 60 Dollars worth of fibre and seed. Great care should be taken by growers have their Flax spread very thin

stalks get a grey color, and the lint readily separates from the wood by a gentle rub. It should on a very dry day be tied in bundles, and is then ready for the mill. As a general thing too much seed is sown on an acre. Unless the ground is very rich one Bushel per acre is sufficient. If the ground is very

strong one and one fourth bushel is ample.
