NEW SKIRT FOR 1865-6. The great invention of the age in HOOP SKIRTS.

J. W. BRADLEY'S New Patent Duplex or double, ELLIPTIC SPRING SKIRT. This invention consists of Duplex (or two) Billiptic pure This invention consists of pupier (or two) Billiptic pure refined steel springs, ingeniously braided tightly and firm-ly together, edge to edge, making the foughest, most flex-ible, sinstit and durable spring ever used. They seldom bend or break, like the single springs, and consequently preserve their perfect and beautiful shape more than twice as long as any single spring skirt that ever has or can be made.

as leng as any single spring skirt that ever has or can be made.

"The wonderful flexibility and great comfort and pleasure to any lady wearing the Duplor Siliptic Skirt will be oxperienced particularly in all crowded assemblies, openas, carriages, ralirond cars, church pews, arm chairs, for promeunde and house dress, as the skirt can be folded when in use to occupy a small space as cashly and conveniently as a silk or muslin dress.

A hady having enjoyed the pleasure, comfort and great convenience of wearing the duples ciliptic steel spring skirt for a single day will never afterwards willingly dispense with their use. For children, misses and young ladies they are superior to all others.

The hoops are covered with 2 ply double twisted thread and will wear twice as long as the single yarm covering, which is used on all single steel hoop skirts. The three bottom rods on every skirt are also double steel, and twice or double covered to prevent the covering from wearing off the rods when dragging down stairs, stone steps, &c., which they are constantly subject when in use.

All are made of the now and eigant corded tapes, and are the best quality in every part, giving to the wearer the most graceful and perfect shape possible, and are unquestionably the lightest, most desirable, confortable, and commical skirt ever made.
