NEW SKIRT FOR 1865-6. The great invention of the age in HOOP SKIRTS. J. W. BRADLEY'S New Patent Duplex or double, ELLIPTIC SPRING SKIRT. This invention consists of Duplex (or two) Billiptic pure refined steel springs, ingeniously branded tightly and firm-ity together, edge to edge, making the toughest, most flex-ible, clastic and durable spring ever used. They seldom bend or break, like the single springs, and consequently preserve their perfect and beautiful shape more than twice as long as any single spring skirt that ever has or can be made.

made.

The wonderful flexibility and great comfort and pleasure
to any lady wearing the Duplex Elliptic Skirt will be experienced particularly in all crowded assemblic, operas
carriages, railroad cars, church pews, arm chuirs, for promenade and house dress, as the skirt can be folded when
in use to eccupy a small space as easily and conveniently
as a silk or muslin dress. as a silk or musiin dress.

A lady having enjoyed the pleasuré, comfort and great
convenience of wearing the duplex elliptic steel spring
kitr for a single day will never afterwards willingly dispense with their use. For children, misses and young skirt for a single day will never alterwards willingly dispense with their use. For children, misses and young ladies they are superfor to all others.

The hoops are covered with 2 ply double twisted thread and will wear twice as long as the single yarn covering, which is used on all single steel hoop skirts. The three bottom rods on every skirt are also double steel, and twice or double covered to prevent the covering from wearing off the rods when dragging down stairs, stone steps, &c., which they are constantly subject when in us.

All are nade of the new and eligant corded tapes, and are the best quality in avery part, giving to the wearer the most graceful and perfect sharpe possible, and are unquestionably the lightest, most desirable, comfortable, and conomical skirt ever made.
