and where leaves will grow beyond it. In pruning a grape, it is customary to leave half an inch to an inch, under the supposition that it will prevent

4. Never prune a tree when the sap will keep the saw wet, as it will in March, April and May, and even in February, if there is a succession of four or five days of moderate weather and bright sun.

5. From the 15th to the 30th June and after the leaves have fallen, and until the tree freezes are the proper times to prune. Never prune during the spring months, notwithstanding the practice is so common. 6. Cover all large wounds with gum

shellae dissolved in alcohol, or with some paint about the color of the bark. If paint is used carefully on the wound only, it will do no barm.

Trees are usually grafted in April or May, but they should not be pruned at John F. Herron that time. There are two or three reasons for this:

1. The sap is thin, and will run out, which injures the tree

of the scions, and others belonging to W Gansimore, farmer, Warriorsmark Barton Green, merchant, Barree Elijah Gillam, farmer, Barree the original tree, may be taken away. If there are many, however, it would be better to leave a portion of them J W Isenberg, blacksmith, West until the following June. We have seen trees that stood in a favored spot and were beautiful when ten years old.

Having a bourtiful current of Palalain.

Builta Technology, diacksmith, West Jared Johnston, farmer, West Benjamin Kyler, Tarmer, Cass Thomas Keitn, farmer, Hopewell Physics Technology. and were beautiful when ten years old.
Having a beautiful supply of Baldwins, Philip Locke, farmer, Springfield that the work were wrafted with Williams Jacob Musser, farmer, Brady. Rarly and the River. At the time of grafting, the operator took the liberty to prane them, and they now stand as Henry C Robison, farmer, Dublin monuments of his folly, the seven George Smith, farmer, Cass meanest trees out of several hundred J B Summers, farmer, Hopewell that stand around them.

### White Washing.

How to PREPARE WHITEWASH .-Slake quick lime in water a few days before using it. It will then be completely soluble, and free from the coarse particles that exist when first made. A still better article is Spanish | Thomas Cisney, farmer, Tell whiting, which may be bought at a A Carothers, innkeeper, Cromwell cheap rate. Mix a little calcined plas- Luden Dean, laborer, Union ter, one fourth as much the whiting, and | Aaron W Evans, J P, Cassville it will look all the better. A little glue William S Entrekin, farmer, Hopewell will render the wash hard for walls. | Daniel Fetterboof, farmer, Morris The glue should be dissolved separately Robert Giffora, farmer, Shirley If you want to color the wash any George Garber, farmer, Cromwell apothecary or painter can tell you William Gutshall, farmer, Springfield what you want. A wash mixed with Charles Green, farmer, Oneida glue or calcined plaster should be used Daniel Goodman, farmer, Huntingdon immediately

How to Apply it.-Always have William Hess, farmer, Springfield your work finished behind you, i. c., draw your brush from your work, you William S Harper, farmer, Dublin will then leave it smooth. Go over Daniel Knode, farmer, Porter will then leave it smooth. Go over the second coat across the first coat.—
This will take out the streaks and leave it smooth when dry. A good brush is absolutely necessary to make work look well. Always soak the brush in moderately warm water be fore using it, and clean it thoroughly when your work is done. Avoid having your wash too thick. It is a wash and not a paste that you want. When the water evaporates, a thin coating of pure lime is left, which perfectly coof pure lime is left, which perfectly covers the old surface; this soon absorbs

Samuel Neal, farmer, Oneida carbonic acid from the air, and re- Abraham Pheasant, farmer, Cass mains unchanged until acted upon by Joseph G Park, farmer, Cass smoke or dust.

To prepare a wash for fences and Peter Peightal, farmer, Penn the outside walls of buildings, put one peck of lime in a barrel, and pour on a little water so as to down the lime, as David Stever, farmer, Cass it is called. Let it swell and crack and Samuel Tussey, farmer, Morris gradually add the water till it is of the L D Tate, weaver, Jackson right consistency, then add four quarts of coarse salt dissolved in water. This David Wallsmith, farmer, Oneida will render the coat hard, and not so liable to wash off. A convenient way to whitewash slats for a fence before to whitewash slats for a fence before they are nailed on, is to have a box a little longer than the slats, fill it with the wash, and with a pair of tongs dip them into it. Keep the barrel covered when not in use.

TRAVERSE JURORS—SECOND WIEK.

W Addleman, farmer, Warriorsmark George Bell, drover, Barree John H Benford, carpenter, Coalmont Jonathan S Briggs, farmer, Tell when not in use.

when not in use.

In patching a piece of plastering, always cut out a square piece from the old plaster, and see that the mortar fills up the space even with the old.—

John II Donaldson, farmer, Hopewell John II Donaldson, farmer, Hopewell We never like to see an irregular blotch overhead, when it can be so casily avoided .- Maine Farmer.

CULTIVATION OF ONIONS.—Mr. Keith, John Hutchison, farmer, Warriormark CULTIVATION OF ONIONS.—Mr. Keith, of Tompkins county, sends to the American Agriculturist an account of his management of this crop. His onion patch is near his hog pen, and receives an abundant supply of manure from that source. He manures and plows in the Fall, and in the Spring gives a thorough barrowing. After raking off the bed it is covered with straw, which is burned over. The seed is sown in rows 18 inches apart, and the bed then receives a dressing of four the bed then receives a dressing of four quarts of ashes, and an equal quantity of hen manure, to every two rods of ground. This application is repeated four times before the onions begin to bottom to any extent. He reports his crop for the last year at three husbals. crop for the last year at three bushels | Andrew Shore, farmer, Shirley of good onions to every rod of ground.

To KEEP RATS FROM EATING HARN-ESS.—"Philomen," of Champaign Co., writes: "I have a remedy that has William Wible, farmer, Springfield nover failed with me. It is simply salting the rats regularly. I do this by laying salt on the sills and ties of the stable, if that is the place they most frequent; but in fact, they will hunt for it. It will occur to any farmer that sees this remedy, that harness is most cut where the greatest a-mount of sweat has dried, an indication that salt contained in it is what they want.

Fresh Flower and Garden Seeds, for sale at Lewis' Book Store.

COURT AFFAIRS. APRIL TERM, 1866.

HINTENGOON, PA.

Hints to Pruning.

1. Never use an axe or hatchet in pruning. The blows struck jar the fibres, and the whole work, with such tools, is too violent and harsh.

2. Take off the limbs as nearly as possible on a level with the branches which you cut from. It will beal much quicker and smoother.

3. Never leave a stub—that is, do not leave a part of the branch between the place where a spur comes out and will heal over. The reason for this is, that no action exists in a portion of the branch left, unless there is a joint, a place where a spur comes out and where leaves will grow beyond it. TROCLAMATION .- WHEREAS, b

PROCLAMATION.--WHEREAS, by a precept to me directed by the Judges of the Constant Pleas of the country of Hundrian. PROCLA MATION.—WHEREAS, by a precept to me directed by the Judges of the Contion Pleas of the county of Huntingdom, bearing test the 20th of January, A. D. 1866. Usin commanded to hashe public Produnation throughout my whole ballwick, that a Court of Common Pieas will be held at the Court Househin the borough of Huntingdom, on the Trill bonday (and lith day) of APRIL, A. D. 1866, for the trial of all issues in said Court which remain undetermined before the said Judges, when and where all Judges, when Judges, and Court Lead one themand eight hundred and sixty-six; and the 20th year of American Independence.

This is an Internal and External Medicine, composed to Rows Horbs and Barks such as our forefathers need. There is a bountiful supply on the earth to cure all com-plaints, if we only knew what they were. This has been quelified for constant analy with the Medical Faculty for the first many very second.

plaints, if we only knew what they are to cure into our plaints, if we only knew what they were. This has been a judject for constant study with the Medical Parulty for a great many years, to find out the kinds best adapted to the above complaints—how to put them together, and what portions to use.

This wonderful remely needs no recommendation save the results which invariably follow its application.

25 This popular remedy is 1-st coming into use from the fact that it gives good satisfaction.

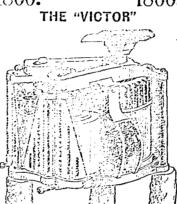

25 PHYSICIANS are invited to test its efficacy in all cass of filthermatism. Affections of the Spinal Column, and all Diseases of the Skin. Muscles and Glands. It has been used in thousands of instances under the personal supervision of the Inventers, and has never disappointed their expectations. All we ask for it is a trial—experimental proof—not the testimony of the men of straw, are the vonchers we desire to present to the public.

It would be well for many now lying in beds oftorture, if these facts could reach their sick chambers. It is more important to them than to the inventors that this should be the cave. "Truth is mighty and must prevail."

25 Keep it in your family, for sickness comes when you least expect it.
