Those of our readers who have money to spare, are advised to read company are true, and as for the supposition that the stock will, in all probability, advance double, treble, quadprice, that, in view of present prospects, is by no means unreasonable. Other companies, with not half the chances at the start have accomplished even more. Nor do we know of a single company that has machinery out or on the way, which is not considered by those who are acquainted with the business as sure to pay, if honestly managed. The risk of mismanagement must be borne in such investments-they cannot be avoided-but Beyond that, however, we do not believe there is a single doubt of success in any company which has or will have reduction and amalgamating works in Nevada.
