Touching the impeachment project the Albany Evening Journal says: "It is the concurrent testimony of impartial observers at Washington, that the policy of entering upon a for-mal attempt to impeach the President, is growing in favor. If so, it is not, we are sure, because men's judgments are convinced, but rather because too many fear to interpose against the most extreme proposition. It now requires more courage to be moderate than

Extremes of opinion and violence of proposition and language, are the madness of the hour. Because the country has passed through a great war, or revolution, everything revolutionary seems to be considered in order. The Constitution is no longer venerated as by our fathers. The English and French Press on Impeachment.

In France, both the imperialist and Liberal journals look on the impeachment movement as being revolutionary in its nature. Touching, as it does, the highest functionary of the State—aiming, as it does, at his forcible removal from office—based, as it is, on grounds so frivolous, and accompanied by accusations so gross-doubtful as seems the issue of the contest, and uncertain as appears the course of events subsequent to it-the affair is inexplicable to them on any other theory than that of the "revolution." jurisdiction over it is andisputed,) and As a consequence the gravity of the in Maine the Legislature has gone so movement is discerned, and the report far as to pass "orders" looking to the abolition of all distinction between the sexes in the matter of suffrage. The Saturday Review treats the proposed impeachment at length, and with signal ability. It analyzes the owers of the different branches of the lers of States, and tries to discover his culpability as set forth in the various charges brought against the whites charges brought against him:

"The President," it remarks, "stands on a present basis of Constitutional right; while Congress is acting in formal defiance of the Constitution, and seems inclined, according to the latest accounts, to set the Constitution aside altogether, and to assert for itself the omnipotence of a British Parlia-ment—the right of altering all laws, whether fundamental or incidental whother part of the original compact of Union or mere measures of Congressional legislation, by a simple maority of both Houses. * * * The ted, amount simply to this-that in the exercise of his executive power he has set at nought the wishes of Congress, and acted upon his own judgment; that he has carried out his own policy, and not the policy of a majority of the two Houses. And it is plain, not only that an impeachment on such a ground as this would be a gross abuse of a remedy intended for a very different purpose, but that it would totally alter the existing relations between the Executive and the Legislature, and subvert the present Constitution of the Federal Government. The Federal Constitution has explicitly made known the purpose for which this formidable weapon may be drawn. It was never meant to enable Congress to get rid of a political opponent. Had it been intended that Congress should be able to remove a President for political reasons, a machinery less cumbrous and less cruel would have been

supplied."
There is nothing particularly novel about these views of the leading jour-nals of Great Britain, and we do not quote them as affording any light to our politicians upon Constitutional Sunday morning, 20th insta questions. THE Delaware county Republican, one of the oldest papers in the State, speaking of the impeachment of the President, says:

"The foremost man in Congress in the measure of impeachment is Mr. Ashley, of Ohio, whose political record is by no means to our liking. We have some recollection of this gentleman in connection with certain active movements to defeat Mr. Lincoln for the presidency; and we remember the circulation of documents of the most defamatory character against that lamented statesman and patriot, which were scattered broadcast under Mr. Ashley's frank. We have no knowledge, on the other hand, of the gentleman's connection with any measure party or for the country."

The reader is presumed to retain distinct recollection of the jury "out West" somewhere, which, although the testimony against the man accused of stealing a hog was overwhelming, nevertheless pronounced him not guilty-a verdict that was subsequently explained by the simple remark, that nearly every man of the jury had some of the pork.
