BEALE'S Late Powell's Embrocation,

For all Diseases Incident to HORSES CATTLE, and the HUMAN FLESH, Requiring the use of an External Application.

Application.

This new Compound, prepared by a practical Chemist having a full knowledge of all the modical virtues of each ingredient that enters into its composition, is warranted to exceed anything of the kind ever yet offered to the Public as an external application for the diseases for which is is recommended. We are satisfied that it will work its own road into the confidence of all who use it, and those who try it once will never be without it, and therefore we rely on experience as the best test of its usefulness. It is pronounced by Farriers, and all who have tried it to be the best application ever used. This Embrocation has been put up for over eight years, and it is only through the increasing demand and urgent request of my friends and the Public that I send it forth as the grand remedial agent for the various diseases to which that noble and useful animal, the horse, is subject. Many remedies have been offered to the Public under different forms, some of these are injurious, others at best of little inse, and many wholly improphr to answer the of little inse, and many wholly improphr to answer the of little inse, and many wholly improphr to naswer the of little inse, and many valuable horses, and are unwilling to trust them to the care of designing and pretended Farriers. Their, wishes are an length fully gratified, by Dr. Reale being prevailed more of allow this valuable Embrocation (which has proved so effectious to the various discusses) to be prepared and brought out to the public.
