HUNTING DON, PA. Thoughts for the Anrmer. About the Weather.

If the sun rise red and fiery, expect

wind and rain. If at sun rising it be cloudy, and the clouds vanish away as the sun riseth higher, it is a sure sign of fair weath-

Likewise, if the sun setteth red, it is a sign of fair weather. If it set in a muddy, misty color, it is a sign of

If the moon shine clear, and not compassed about with mists, it will be fair weather.

If the moon be compassed about with a circle, like a great wheel, or is misty and dim, wind or rain follows, or snow within twenty four hours. The stars more bright than ordinary ni summer, signify great wind and

If they twinkle or blaze in winter, the wind north or east, is a sign of a great frost. When they are seen to fall or shoot, is a sign of a great rain and winds.

If the clouds are round and of a dapple-gray color, and the wind north or east, fair weather for two or three days after.

If the clouds appear like towers or rccks, signify great showers. If clouds that are small grow bigger and bigger, is a sign of much rain; but

if great clouds waste and grow less, is a sign of fair weather. WHAT IS PROGRESSIVE AGRICULTURE. -The New York Observer answers this question in a few words, but very

comprehensively, as follows:

Under its influence spring up tasty and convenient dwellings, adorned CARRIAGE & WAGON MAKERS with shrubs and flowers, and beautiful Will find a general assortment of material for their us within with the smiles of happy wives, tidy children in the lap of thoughtful age-broad hearts and acts, as well as words of welcome. Progressive agriculture builds barns and puts gutters on them, builds stables for cattle and raises roots to feed them. It grafts wild apple trees, by the meadow with pippins or greenings; it sets out new orchards and takes care of old ones. It drains low lands, cuts down bushes, buys a mower, house tools and wagons keeps good fences and practices soiling. It makes hens lay, chickens live, and prevents swine from rooting up meaddows. Progressive agriculture keeps on hand plenty of dry fuel, and brings in the oven wood for the women. It ploughs deeply, sows plentifully, harrows evenly, and prays for the bless-

ings of Heaven.

DRINKING AT MEALS .- When fat meats or sauces composed partly of butter are taken, and cold drink right after, the butter and fat are rendered concrete and separated from the rest of the aliment. This congested oily matter, being lighter than the remain ing contents of the stomach, swims on top of the food, often causing heavy, uneasg, painful sensations about the cardia and breast, and sometimes a feeling of scalding and anxiety. At other times, when the stomach regains its heat, the fatter matter is rejected by little and little, from weak stomachs, in oily repurgition, which is very disagreeable. In such cases, a little compound of hartshorn, with a glass of warm water an sugar, will convert the fat into soap and afford instant relief -Sir James Murray's Med-

judgment of our Farmers' Club, as to Rundell's First Premium HORSE PITCHFORK, the healthiness of stables in the basement of a barn ?"-W. H. Bishop. S. Edward Todd answered: stables in the basement of a barn are quite as healthy as stables above the

level of the ground, it they are kept properly ventilated and cleaned. The great objection of stables in a basement is there is not sufficient attention paid to ventilation. If well ventilated, however, such stables are always cooler in the summer for stock, and warmer in the winter than those that are constructed on a level with the ground."

Bar An exchange says: "A neighbor of ours set one hundred and fifty trees eighteen years ago, on good sandy loam land, and has tended them well. They are thrifty handsome trees, but he has not obtained fruit enough from them to supply a family of ten persons. We set as many trees at the same time, on a granite soil, have tended them well, and cropped the land heavily every year, and have gathered two hundred barrels in a season. Why GLASS, PAINTS, OIL & PUTTY, the difference? Who can tell? One is a granite soil, the other a rich sandy loam. Ours was high land, the neigh | COOK & PARLOR STOVES. bor's is on a level between hills and low lands."

SOMETHING NEW .- A neighbor of mine had a very rough cellar bottom and did not want to go to the expense of the cement, so he took his coal ashes and mixed it with water, to an ordinary thickness of mortar. It does not matter how many lumps of stones there are. Put it on about four inches thick; let it lie twenty four hours, then stamp it with a heavy block of wood three or four times a day, until it is perfectly hard. It is better than coment, as it will not crack or scale off. -Cor. American Farmer.
