IMPORTANT TO LAND OWNERS—ARE YOUR LANDS PATENTED.—We are informed by Milton S. Lytle, Esq., who has recently examined the records in the Land Office at Harrisburg, that there are in this county nearly two hundred tracts of unpatented lands, and that there is due the State, on these lands, the sum of more than fifty thousand dollars. This is caused by a defect on the part of the persons who purchased from the original Proprietaries or Commonwealth, to pay the balance due on the lands after issuing of the warrants. On none of these tracts is there a less amount than fifteen dollars, that being the office fee alone. On most of them a greater sum is due, the highest noticed for any tract in this county being about \$230. The present holders of these lands have not a clear title, the Commonwealth having a lien equal to the principal and interest unpaid. A strong force of clerks is now at work in the Surveyor General's office making abstracts of the lands in this situation, showing the names of the persons by whom the warrants were taken out, and the township in which each tract is located, the number of acres and the amount due. As soon as these are completed measures will be taken to collect these sums. It would be well for every land owner to make inquiry whether his lands are patented, and if not, he should take immediate steps to obtain a clear title. We understand that our informant has given some attention to this matter and that he is ready to obtain and give further information to those who may desire it. All the data he requires is the name of the person to whom the warrant was issued, its date and the township in which the lands lie. Land owners desiring to be more definitely informed, should address Milton S. Lytle, Esq., at this place, or correspond with the office of Stewart & Lytle.—Journal & American.

Address of the Committee on Washington City and Lake Erie Railroad.

The National Railroad Convention of November 12, 1867, which met at the Court House, in Huntingdon, appointed a Committee to attend to the preparatory affairs necessary to advance the object in view, who in furtherance thereof, by order of said Convention, the advantages to accrue from the proposed work are such as to make the early construction thereof a vital importance to the comfort and prosperity of the citizens along the proposed route, and deserving of National aid. The Eastern Division (48 miles in length), following the Conococheague and Anguwick Valleys, requiring neither tunnelling or heavy grades would shorten the distance by rail from the National Capital to Pittsburgh, and the Western States, upwards of eighty miles; open a good and convenient market for the products of Franklin, Fulton, and other interior counties of Pennsylvania; render productive the East Top Coal fields; give access to valuable iron ores along this route; and employment for numerous water powers now running waste. And with a second link in the proposed chain of railways (thirty miles in length), would shorten the distance from the lakes to Washington City, one hundred and fifty miles, and through thereon (for all future time) a large amount of products required to be exchanged between the South and North such as coffee, tobacco, rice, sugar, molasses, spices, fish, oysters, fruits and early vegetables of the Southern Atlantic Sea Board States, and the West Indies; and the wheat, flour, corn, bacon, butter, cheese, cattle, hogs, sheep, hamp, hemp, lumber, copper, iron and steel, and products of the North. From the falls of the Potomac to the falls of Niagara, a continuous avalanche of available water powers from lake and mountain, amidst coal, lumber and oil, wherewith to smelt the iron and copper ores of the Lake region; grind the wheat and corn of the North-west; and transmit into beautiful wares the crude products of all these regions.

A great National and Commercial Enterprise on the Sea Board; a score of entrepreneurs on the Lakes; two thousand miles of Lake navigation; thousands of miles of Ocean commerce; twenty thousand miles of railroad; a dozen trunk line railroads from East to West; each part and parcel of this National highway throwing its own accumulated tonnage, and building up one continuous workshop and warehouse from Ocean to our Inland Seas, where converge all that is necessary to make "West" and distribute most readily and cheaply the wares and products of the North, South, East and West.

PREPARATORY WORK.

Prepare bill and endeavor to obtain an Act of the Legislature of Pennsylvania, incorporating a Company to build the proposed work; engage competent action amongst parties interested therein by calling public meetings to adopt means in aid of the proposed work; raise money for parliamentary expenditures, and publishing proceedings in newspapers printed at Washington and elsewhere; memorialize the City Council, Wash., the American Association, the National Board of Railroad Companies, urging the advantages of a direct military and postal railway from the Commercial, political and military Emporium of the Union to our Northern frontier and the west of the Alleghenies; and the duty of Congress to aid a work that would add to the wealth of the nation, whilst building a great center of industry at the Capital of this reunited confederacy. All which your committee respectfully submit for consideration.

JOHN DOUGHERTY, Chairman of Committee.

Mr. Union, Dec. 24, 1867.

RECORD YOUR DEEDS.—The following extract from the law, in reference to the recording of deeds, may be read with advantage by many of our citizens, and is published for their information:

Whereas, by the different and secret ways of conveying lands, tenements and hereditaments, such as are ill disposed to have it in their power to commit frauds, by means whereof divers persons may be injured in their purchases and mortgages by prior and secret conveyances:

For the remedy whereof, be it enacted, That all deeds and conveyances which shall be made and executed within this province, or of concerning any lands, tenements or hereditaments in this province, or whereby the same may be in any way affected in law or equity, shall be recorded in the office for the recording Deeds in the county where such lands or hereditaments are lying and being within six months after the execution of such deeds and conveyances; and every such deed and conveyance that shall at any time after this publication be made and executed, and which shall not be recorded as aforesaid, shall be adjusted fraudulent and void against any purchaser or mortgage for valuable consideration, unless such deed or conveyance be recorded as aforesaid, before the recording of the deed or conveyance under which such subsequent purchaser or mortgage shall claim.

No deed or mortgage, or defensible deed in the nature of mortgages, to be made, shall be good or sufficient to convey or pass any freehold or inheritance, or to grant any estate therein for life or years, unless such deed be recorded within six months after the date thereof, where such lands lie, herein before directed.

CARELESS LETTER WRITERS.—According to the Post Master General's report, not less than a million letters were mailed last year, without signatures, and misdirected, or so badly directed that the address was totally unintelligible. These were destroyed. More than a million and a half others—1,611,686—were restored to their writers by the care of the dead-letter office. Thus it seems that at least two and a half million of letters were made, in an operation which one would think likely to enlist the sufficient care of the writer, the addressing of a letter. These letters contained nearly \$150,000 in money, bills of exchange, deeds, checks, &c., to the value of over \$500,000, and an over 40,000 contained photographs, jewelry, &c.

Blank Books for the desk and pocket, for sale at Lewis' Book Store.

Address of the Committee on Washington City and Lake Erie Railroad.

The National Railroad Convention of November 12, 1867, which met at the Court House, in Huntingdon, appointed a Committee to attend to the preparatory affairs necessary to advance the object in view, who in furtherance thereof, by order of said Convention, the advantages to accrue from the proposed work are such as to make the early construction thereof a vital importance to the comfort and prosperity of the citizens along the proposed route, and deserving of National aid.
