The Globe.

CONDITION OF THE BREADSTUFFS MAR-KET.—The Pittsburg Chronicle condenses an article from the Financial Chronicle, starting out with the proposition that our crops were unusually abundant, addresses itself to the question whether, in view of the moderate average result of the European harvests on hand and Breakes Tables, and the depleted condition of stocks of the European harvests of the European har both at home and abroad, the new supply would be more than adequate to bring up the stocks to the average standard to supply the current consumption. The negative view having been taken, breadstuffs have been held at high prices since harvest. The Financial Chronicle is strongly inclined to the opinion, although it will not commit itself, that high prices will not keep up. It presents a table showing that at Chicago, the chief grain entrepot, the present stocks are largely in excess of those at the same time in '67 There is an increase in the stock of wheat of 249,224 bushels; in corn, of 1,302,288 bushels, and in oats, of 174, 371 bushels; while in flour, barley and rye there is an immaterial decrease.-The entire stock of grain at Chicago is 55 per cent. above that of February. 1867. At the beginning of this month there were 925,148 bushels of wheat in store at Milwaukie, which is largely in excess of the stock at the same date last year." It is estimated that the stocks of wheat at the various points between New York and Milwaukie in-

ly fifty per cent.
In the West, too, the farmers still have a large balance of their crop on hand-the reserve being estimated from thirty to forty per cent.

clusive, aggregate 5,200,000 bushels, against 3,500,000 bushels at the same

period last year; an increase of near-

HIGH AND LOW BARNS. - A writer in the Rural New Yorker advocates the building of higher barns than those of the old style, which were built low on account of the difficulty of pitching to the top of a mow with a hand-fork.-Fourteen to sixteen feet was the usual height of posts for a hay and grain barn, and with this height it required a tall and stout man with a long handled fork to "pitch over the beam," and great scrambling of the boy on the mow to stow away so as to fill up under the roof. With the power-fork the product may be carried to any height, with a trifling effort.
One of the chief advantages of build-

ing high barns lies in the relative amount of material required to build one of a given capacity. The foundation and roof, with the same ground size, costs no more for a building forty feet than for one ten feet high; and the writer says that hay and grain will keep better packed deep than if put in shallow mows, though we think he does not make this quite clear. If the crop is well cured, perhaps the greater exclusion from the air may be an advantage to both hay and grain. How-ever this may be, it is obvious by in-creasing the height, a good range of stabling may be secured on both sides of the barn, with any desired amount of sterage room above them, with no additional expense for either foundation or roof. Sometimes the introduction of a new contrivance, apparently insignificant in itself, will revolutionize other arrangements upon an extensive scale, and if the horse-fork proves to be a decidedly desirable thing, it will nto genera revolutionize the model of barns over the country, and those about to build should investigate this new horse pitch-fork, before deciding upon a plan.

CHURNING IN WINTER .-- You can not get butter out of milk, if there is none in it. Feed the cows well, and thus secure good milk, and there is not much trouble in churning, even in winter .-Keep the cream in a warm room, till it turns somewhat sour. Let the churn be scalded before putting in the cream, so that it will be well heated through and not cool the cream. Let the cream be at a temperature of 65° to 70°, and there will not be much difficulty in making the butter come. We see it stated that if a little rennet is Choice GROCERIES added to the cream just before churning, it will help materially. We think this quite likely, as it would help to generate lactic acid. Do not put in too much.

HAYTI is one of those lively places which is not happy unless it is constantly having revolution. Salnave had hardly got himself fixed in the place from which Geffrard was compelled to fly when the compelled to fly the compelled to the salnation. pelled to fly, when a new revolution broke out which was only quelled by measures as "vigorous" as steel and lead could make them. Now again another revolution is spreading like wildfire, and the fighting has become general, Solemon having been pro-claimed President. Hayti is now enjoying the place formerly held by Mex-

J. P. Thomas, a barber, and Antoinette Rudger, both colored, were married in St. Vincent's church, Saint Liouis, on Wednesday. The ceremony occupied three hours and a half, and was imposing. The bride has \$400,000. The husband has nearly the same am't. He presented the bride a check for \$10,000 as a wedding gift. The bridal veil cost \$750, and the bride wore ear rings costing \$5,000.

Dr. Stone, the ominent New Orleans physician, and who had a larger prac-tice in fevers than perhaps any other physician, declared that plenty of peach orchards are worth a thousand quarantines for the public health. "No more scurvy," said the Doctor; cat stewed peaches, if you would keep off indigestion."

"I can not" is often a gentleman, while "I'll see" is generally a sneak.-Very few who promise to "see" ever mean what they promise. It is a way the heartless have of evading duty.
But it is cowardly and cruel. If you
do not intend to oblige a friend, say so. "Hope deferred maketh the heart sick."

THE trial, at Greensburg, Westmor-land county, of Samuel Hull, for the murder of Charles H. Parker, a Pennsylvania railroad conductor, was con-cluded on Tuesday evening. The jury rendered a verdict of guilty of mur-

der in the second degree. Many of the hotels built in Pithole during her palmy days have been pulled down and removed. The Benta House, built at an expense of \$80,000, was recently sold for \$500.

> No more Gray Locks DR. LEON'S

ELECTRIC HAIR RENEWER, Is pronunced by all who have used it the very best preparation for the Hair. It is a positive cure for Baldners, cradicates Dandruff and Humons, stops the hair form failing out, and speeddy restores Gray Locks to their original line and luxuriance.

It operates on the secretions and fills the glands with new life and coloring matter. Thin, dead, faded or gray hair will always be brought back by a few applications, to its youthful abundance, vitality and color.

It makes the hair soft, glossy, fragrant, pleasant to the touch and easy to arrange. Dry, wiry and intractable locks become moist, pliant and disposed to remain in any desired-position. As a Hair Dressing it has no equal.—The sales are enormous and it is a universal favorite with old and young of both sexes.

Sold by Druggiste throughout the United States. Address all orders to
