[From the N. Y. Tribune.]

WHAT I KNOW OF FARMING.

BY HORACE GREELEY.

XX.

BONES—PHOSPHATES—GUANO.

I hate to check improvement or chill the glow of Faith; yet I do so keenly apprehend that many of our people, especially among the Southern cottongrowers, are squandering money on Commercial Fertilizers, that I am bound to utter my note of warning, even though it should pass wholly unheeded. Let me make my position as clear as I can.

I live in a section which has been cultivated for more than two centuries, while its proximity to a great city has tempted to crop it incessantly, exhaustively. Wheat while its original surface soil of six or twelve inches of vegetable mold (mainly composed of decayed forestleaves) remained; then Corn and Oats; at length, Milk, Beef and Apples—have exhausted the hill-sides and gentler slopes of Westchester County, except where they have been kept in heart by judicious culture and liberal fertilizing; and even here, that subtle element Phosphorus, which enters minutely but necessarily into the composition of every animal and nearly every vegetable structure, has been gradually drawn away in Grain, in Milk, in Bones, and not restored to the soil by the application of ordinary manures. I am convinced that a field may be so manured as to grow three tuns of Hay per acre, yet so destitute of Phosphorus that a sound, healthy animal cannot be grown therefrom. For two centuries, the tillers of Westchester County knew nothing of Chemistry or Phosphorus, and allowed the unvalued bones of their animals to be exported to fatten British meadows without an effort to retain them. Hence, it has become absolutely essential that we buy and apply Phosphates, even though the price be high; for our land can no longer do without them. Wherever a steer or heifer can occasionally be caught gnawing or mumbling over an old bone, there Phosphates are indispensable, no matter at what cost.—Better pay $100 per tun for a dressing of one hundred pounds of Bone per acre than try to do without.

But no lands recently brought into cultivation—no lands where the bones of the animals fed thereon have been allowed, for unnumbered years past, to mingle with the soil—can be equally hungry for Phosphates; and I doubt that any cotton-field in the South will ever return an outlay of even $50 per tun for any Phosphatic fertilizer whatever. That *any* preparation of Bone, or whereof Bone is a principal element, will increase the succeeding crops, is undoubted; but that it will ever return its cost and a decent margin of profit, is yet to be demonstrated to my satisfaction.

No doubt, there are special cases in which the application even of Peruvian Guano at $90 per tun is advisable. A compost of Muck, Lime, &c, equally efficient, might be far cheaper; but months would be required to prepare and perfect it, and meantime the farmer would lose his crop, or fail to make one. If a tun of Guano, or of some expensive Phosphate, will give him six or eight acres of Clover where he would otherwise have little or none, and he needs that Clover to feed the team wherewith he is breaking up and fitting his farm to grow a good crop next year, he may wisely make the purchase and application, even though he may be able to compost for next year's use twice the value of fertilizers for the precise cost of this.—But I am so thorough in my devotion to "home industry," that I hold him an unskillful farmer who cannot, nine times in ten, make, mainly from materials to be found on or near his farm, a pile of compost for $100 that will add more to the enduring fertility of his farm than anything he can bring from a distance at a cost of $150.

Understand that this is a general rule, and subject, like all general rules, to exceptions. Gypsum, I think every farmer should buy; Lime also, if his soil needs it; Phosphates, in some shape, if past ignorance or folly has allowed that soil to be despoiled of them; Wood Ashes, if any one can be found so brainless as to sell them; Marl of course, where it is found within ten miles; Guano very rarely, and mainly when something is needed to make a crop before coarser and colder fertilizers can be brought into a condition of fitness for use; but the general rule I insist on is this: A good farmer will, in the course of twenty years, make at least $10 worth of fertilizers for every dollar's worth he buys from any dealer, unless it be the sweeping or other excretions of some not distant city.

I have used Guano frequently, and, though it has generally made its mark, I never yet felt sure that it returned me a profit over its cost. Phosphates have done better, especially where applied to Corn in the hill, either at the time of planting or later; yet my strong impression is that Flour of Bone, applied broadcast and freely, especially when Wheat or Oats are sown on a field that is to be laid down to grass, pays better and more surely than anything else I order from the City, Gypsum, and possibly Oyster-Shell Lime, excepted.

My experience can be no safe guide for others, since it is not proved that the anterior condition and needs of their soils are precisely like those of mine. I apprehend that Guano has not had a fair trial on my place—that carelessness in pulverizing or in application has caused it to "waste its sweetness on the desert air," or that a drouth following its application has prevented the due development of its virtues. And still my impression that Guano is the brandy of vegetation, supplying to plants stimulus rather than nutrition, is so clear and strong that it may not easily be effaced. It seems to me plainly absurd to send ten thousand miles for this stimulant, when this or any other great city annually poisons its own atmosphere and the adjacent waters with excretions which are of very similar character and value, and which Science and Capital might combine to utilize at less than half the cost of like elements in the form of Guano.

My object in this paper is to incite experiment and careful observation. No farmer should absolutely trust aught but his own senses. A Rhode Islander once assured me that he applied to four acres of thin, slaty gravel one hundred pounds per acre of Nitrate of Soda which cost him $4 per hundred, and obtained therefrom four additional tuns of good Hay, worth $15 per tun: Not profit (after allowing for the cost of making the Hay,) say $30. He might not be so fortunate on a second trial, and there may not be another four acres of the earth's surface where Nitarte of Soda would do so well; but, should I ever have a fair opportunity, I mean to see what a little of that Nitrate will do for me. I hope farmers may more and more be induced to conform practice to the Apostolic precept, "Prove all things: Hold fast that which is good." No one's success or failure in a particular instance should be conclusive with others, because of the infinite diversity of antecedent and attendent circumstances; but if every thrifty farmer would give to each of the commercial fertilizers — Lime, Gypsum, Guano, Raw Bone, Phosphates, Ashes, Salt, Marl, &c.—such a careful trial as he might, observing closely and recording carefully the results, we should soon have a mass of facts and results, wherefrom deductions might be drawn of signal practical value to the present and to future generations.

"This is what I call capital punishment," as the boy said when his mother shut him in the closet among the preserves.

"Bob," said a facetious farmer to his son, "we had a pretty hard day's work yesterday; now let's have a game of chopping wood."

McGUIRE'S

SPANISH HAIR DRESSER

FOR PROMOTING THE GROWTH, BEAUTIFYING THE HAIR,

And rendering it dark and glossy. No other compound possesses the peculiar properties which so exactly suit the various conditions of the human hair. The use of this oil as a hair dresser has been universal in every section of the country in the Spanish Main for centuries.—No preparation of art could give that elegant luxuriance and abundance of hair which have so often been the admiration of travelers in Spain. This oil is highly and delicately perfumed, forming an article unrivaled in excellence and upon which the Spanish people for many years have set its seal of enduring approval.

McGUIRE'S

Mexican Wild Flowers Shampoo Lotion

For removing dandruff and scurf from the head, whitening and perfuming the skin. This article is entirely different from anything of the kind ever offered in this country and is warranted free from all poisonous substances This valuable lotion was used by the Emperor Maximilian, and Empress Carlotta of Mexico, and universally used by Mexicans for three hundred years. As a wash for the head—it is cooling, cleansing and refreshing.—When thus used it at once relieves headache.

McGUIRE'S

WILD FLOWERS FOR THE TEETH.

All those who are in favor of white teeth and a pleasant and perfumed breath, should at once use McGuire's Wild Flowers for the Teeth. All these preparations are put up in the most elegant and ornamental manner. We make no exception in saying that they are an ornament to a lady's toilet table, and none complete without them.

Warranted satisfactory or money refunded. Dealers will bear this in mind. Sold by all respectable Druggists in the United States and Canadas. Address orders to

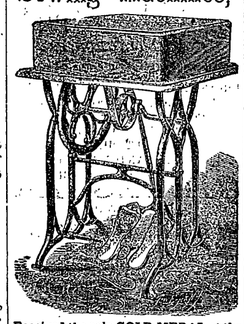
WHEELER & WILSON'S

HIGHEST PREMIUM

LOCK-STITCH

Sewing Machines,



Received the only GOLD MEDAL at the PARIS EXPOSITION, 1867.

They are adapted to all kinds of Family Sewing, and to the use of Seamstresses, Dressmakers, Tailors, Manufacturers of Shirts, Collars, Skirts, Cloaks, Mantillas, Clothing, Hats, Caps, Corsets, Linen Goods, Umbrellas, Parasols, etc. They work equally well upon silk, linen, woolen and cotton goods, with silk, cotton or linen thread. They will seam, quilt, gather, hem, full, cord, braid, bind, and perform every species of sewing, making a beautiful and perfect stitch, alike on both sides of the article sewed.

The qualities which recommend them are:
1. Beauty and excellence of stitch, alike on both sides of the fabric sewed.
2. Strength, firmness and durability of seam, that will not rip nor ravel.
3. Economy of Thread.
4. Attachments and wide range of application to purposes and materials.
5. Compactness and elegance of model and finish.
6. Simplicity and thoroughness of construction.
7. Speed, ease of operation and management, and quietness of movement.

Instructions free to all. Machines *kept in repair* one year free of charge.

U. B. LEWIS, Agent,

GET THE BEST

READY ROOFING

Suitable for all Buildings, Dwellings, Barns, Churches Factories, &c., and for all climates; equally adapted to flat or steep roofs, and can be applied by any ordinary workman.

THE READY ROOFING

Is more durable than tin, and does not cost one-half as much. It is cheaper than shingles, far more durable, and fire-proof. It is made of the heaviest fabric ever used for the purpose, and is put up in rolls ready for shipment to any part of the world. Send for circular and samples (sent free.)

We also manufacture

GRANITE CEMENT,

For repairing all kinds of leaky roofs, chimneys, sky lights, &c. This Roofing Cement forms a permanent adhesive coating over the whole surface of all roofs, whether tin, shingle or composition, completely closing up leakages, and being composed largely of ground granite, when sets and hardens; and soon becomes an artificial Slate or Stone covering.

ROOF PAINT,

For coating Tin and all kinds of metal and composition roofs. It will not run, crack, or peel off, but form a permanent and perfect protection, wherever placed. It is furnished at half the cost, and possesses twice the durability of the common oil paints used for such purposes.

County rights for sale.

Authorized WAR CLAIM AGENCY

HUNTINGDON, PA.

SOLDIERS' HEIRS, ATTENTION!

The act of Congress approved March 2, 1867, gives to Heirs of Soldiers who died prisoners of war,

COMMUTATION FOR RATIONS,

for the time the soldier was so held a prisoner, at the rate of twenty-five cents per day, to be paid in the following order: 1st. To the widow, if unmarried; 2d. To the children; 3d. To the parents, to both jointly if they are living, if either is dead, to the survivor; 4th. To the brothersand sisters.

The act of February 28, 1867, provides for the refunding of the $300 Commutation Money, where the same person was again drafted, and was required to enter the service or furnish a substitute.

DISCHARGED SOLDIERS,

The act of March 2, 1867, also makes provisions for the payment of the

$100 ADDITIONAL BOUNTY

to such soldiers as have accidentally lost their discharges

All persons having any claims under any of the above mentioned Acts, or any other kind of claim against the United States or State Governments, can have them promptly collected, by addressing the undersigned. Information and advice cheerfully given to soldiers or their friends, free of charge.

HUNTINGDON FOUNDRY.

EASTON BLAKE. M. MARION McNEIL.

BLAKE & McNEIL,

[Successors to J. M. CUNNINGHAM & SON,]

Iron and Brass Founders,

HUNTINGDON, PA.

IRON and BRASS CASTINGS made in a first-class Foundry. We have always on hand all kinds of Plow and Stove Castings, Wash, Kettles, Cellar-windows, Grates, Coal hole, Castings for pavements, Window weights, Castings all sizes and weights, Pipe joints, Sled and Sleigh soles, Wagon boxes, Machine Castings, for steam and water, grist, saw, sumac and plaster mills of all descriptions.

HEATERS AND IRON FENCES,

of the most improved style, oven doors and frames, door sills, and in fact everything made in this line.

We have a larger stock of patterns, and can furnish castings at short notice, and cheaper than they can be had in the country. Having a good drill, we are prepared to do drilling and fitting up of all kinds.

Office in Lleslors' New Building, Hill street, Huntingdon, Pa.

Mch. 17, 1869. BLAKE & McNEIL.

TO THE LADIES!

The subscribers have recently discovered a new article—the

ESSENCE OF STARCH.

In calling the attention of the ladies to our Starch they will find that it economizes labor, produces a

BEAUTIFUL GLOSS,

Much superior to common starch, and easier to iron. In fact if you want a beautiful gloss on your skirt, or your husband's shirt or collar, procure a box of our Essence of Starch. The cost is trifling, only 15 cents a box.

Try a box and be convinced. Every Family should have a box of the Essence of Starch. For sale by all Grocers and dealers in the United States. Manufactured only by SMITH, HAMMON & CO., sole proprietors, No. 1113 Harmer street, Philadelphia.

☞For sale at MASSEY & CO'S. Enterprise Headquarters. feb9

WM. LEWIS, Dealer in Books, Stationery and Music Instruments, corner of the diamond.
