Summary of War News.

Versailles advices say the position of the Germans has become extremely critical, and alarm prevails among all who understand the situation. Entrenchments are now being thrown up in the rear and flanks of the Prussian positions around Paris, so great is their dread of an attack by Trochu.

A special despatch says that Trochu on the 15th, made a magnificent sortie, inflicting terrific loss on the Germans:

There is great agitation concerning the designs of Russia, and it is believed there is imminent danger of a general European conflict.

Senator Wilson, of Massachusetts had an interview with President Grant last week, in which the latter said, he considered that on the whole the recent election had resulted satisfactorily to the Republicans. He did not think there was anything to cause alarm for the future. The people could not be successfully drawn aside from the maintenance of the great principles of the Republican party .-What they want, in his opinion, is the payment of the public debt, the reduction of taxes, and an economical administration of the Government. The party that refuses to be drawn away by side issues, and that pursues the policy here indicated. will, in the opinion of the President, elect its candidate in 1872.

CONSTITUTIONAL CONVENTION .- Senator George Connell, of Philadelphia, has prepared a bill providing for a Constitutional Convention, which he will present to the Legislature when it meets in January. The bill is said to be objectionable in that it fixes the pay of members at \$2 per day, and mileage, and makes provision for a session of nine months. No bill of the ealling of a Convention should be suffered to pass unless it has incorporated in it the minority or proportional plan of choosing delegates, so that a nomination by either party will be equal to an election, and the Convention be nearly a lie as are the people of the State. We want practical hightoned business men in that Convention, and no scheming politicians.

More Wan .- The startling informanew war is imminent between Russia on the one, hand, and England, Ausvessels of war from entering the Black Sea, and forbidding Russia from constructing or maintaining any naval or military arsenal upon its coast. The announcement has caused great excitement, and the affair is argued with so from his position as Minister to Eng. dead in the barn yard, near her residence much spirit between Gortshakoff, the land. TERRIBLE ACCIDENT .- On Monday afternoon of last week another terrible Cambria Iron Company's mine bank, resulting in the frightful injury of Michael Derham and Thomas Doolan .-These men bad charged and fired a blast, but owing to some apparent defeet in the fuse, no explosion took place at the proper time. Returning they attempted to remedy the defect by using the tamping needle, but at the first blow of the sledge a terrific explosion ensued. Doulan was most obliged to pay a certain per centage on the severely injured, having both hands literally blown off and one eye blown out, besides being terribly burned about the face and neck. DR. SCHENCK advises Consumptives

Having for the last thirty-five years devoted my whole time and attention to the study of lung disease and comsumption. I feel that I understand fully the course that ought to be pursued to restore a tolerably bad case of diseased lungs to healthy soundness. The first and most important step is for the patient to avoid taking cold and the best of full places on this continent for this purpose in winter, is Florida, well down in the state, where the temperature is recular, and not subject to such vari-

ampoint step is for the patient to avoid taking cold, and the best of all places on this continent for this purpose in winter, is Florida, well down in the State, where the temperature is regular, and not subject to such variations as in more Northern tatitudes. Palatka is a point I can recommend. A good hatel is kept there by Poterman. Last winter I saw several persons there whose lungs had been held, diveased, but who, number the healing influence of the climate and my medicines, w re getting well.

One hundred miles further down the river is a point I would prefer to Palatka. as the temperature is more even and the nir dry and busches. Vendonville and Enterprise are located there. I should give a decided preference to Medonville. It is two miles from river, or lake, and it seems almost impossible to take cold there. The tables in Florida might be better, and patients complete a similar to the subject of the cold there. the other hand, in New England, one third, at least of the population die of this terrible disease. In the middle States it does not prevail so largely, still there are many thousands of cases there. What a vast percentage of life would be saved if consumptives were as early alarmed in regard to taking iresh cold as they are about scallet fever, small pox, ac. But they are not. They take what they form a littlee old, which they are redulous enough to believe will wear of in a few day. Trypay no attention to it and hence it mays the foundation for another and another still, until the lungs are diseased beyond all hope for cure.

My advice to persons whose lungs are affected even slightly is, to lay in a stock of Schenck's Pulmone Sryup Schenck's Scaweed Tonic, and Schenck's Pulmone Sryup Schenck's Scaweed Tonic, and Schenck's Pulmone Sryup Schenck's Scaweed Tonic, and Schenck's gaquainted with their action. I know that where they are used in strict accordance with my directions they will do the work that is required. My plan is to give my three medicines, in accordance
with printed directions, except in some cases where a
fiver use of the Mandrake Pills is necessary. My object
is to give tone to the stomach—to get up a good appetitle. It is always a goon sign when a patient begus to
grow hungry. I have hopes of such. With a relish for
food and the gratification of that relish comes good blood
and with it more flesh, which is closely followed by a
healing of the hungs. Then the congli toosens and abates,
the creeping chilis and clammy night-sweats no longer

he avoids taking cold.

Now there are many consumptives who have not the
means to go to Florida. The question may be asked, is
there no hope for such; Certainly then is. My advice
