

Farm, and Household.

How to Make Neat's Foot Oil.

The hoofs are chopped off, and other portions are cracked and boiled thoroughly. From the surface of this boiled mass pure neat's foot oil is skimmed, which is unsurpassed by any other oleaginous matter for harness, shoes, etc.

How to Keep a Cellar Warm.

The mode of proceeding is given by the Scientific American, as follows: "The walls and ceiling were pasted over with four or five thicknesses of old newspapers, a curtain of the same material pasted over the small low windows at the top of the cellar."

Henry Ward Beecher on Interest.

No bluster draws sharper than interest does. Of all industries none is comparable to that of interest. It works all day and night, in fair weather and foul. It has no sound in its footsteps, but travels fast. It gnaws at a man's substance with its invisible teeth.

Medical Properties of Eggs.

The white of an egg has proved to be the most efficacious remedy for burns. Seven or eight successive applications of this substance soothes pain and effectually excludes the burn from their air.

Bone Felon.

Of all painful things, can there be any so excruciatingly painful as a bone felon? We know of none that flesh is heir to; and as this malady is quite frequent and the subject of much earnest consideration, we give the latest receipt for its cure, which is given by that authority the London Lancet.

To Cure Colic.

To cure colic in horses, take a piece of blanket, or any thick material, large enough to cover the horse from his fore to his hind legs, and from the spine to the floor as he lies, writing it out in hot water as hot as you can stand.

Cribbing Horses.

The cure is very simple and easily applied. Get some pulverized cayenne pepper and sprinkle plentifully on the edge of the trough to which your horse is hitched, so that he will suck it up with the first draught of air.

Never ask what one of the mutton breeds of sheep will weigh at three years old, but what he will weigh at twelve or fifteen months; and so of cattle and pigs.

There should be no exception to this rule, in all animals intended solely for the butcher, and more especially when they are to be kept on high-priced lands.

George E. Waring, says the American Agriculturist, that he thinks it quite possible to grow common horses as large, strong and durable at three years old as they are now at five.

Nebraska is taking a deep interest in the Cashmere Goat. Col. R. W. Furnas has two hundred of them, and thinks they will prove a profitable stock for the Western States.

Deep plowing and thorough cultivation are essential to secure good crops.

The Characteristics of a True Teacher.

A true teacher is one who loves his work, and goes about it with spirit and energy. Each day, as it comes, opens a new life and brings new attractions to him. He is constantly on the alert for information that may be of interest and value to his pupils.

The teacher I am trying to describe is always firm, and having once taken a stand, never yields, unless he finds he is in the wrong, and then he yields in such a way as to maintain the respect and confidence of the pupil.

Harmony of Action.

The following is taken from the Illinois Teacher. It is as timely here, in Huntingdon county: A frequent source of the dissatisfaction of parents with the management of schools arises from the lack of a common understanding and concert of action between them and the school authorities.
