## Farm and Housebold. How to Get Plenty of Fresh Eggs.

Mr. E. Dwight, of Hudson, Michigan, has discovered the secret, and makes it public through the Germantown Telegraph. He says: I fed my hens plenty of corn and got but few eggs. I reasoned upon the matter, and happened to think that the constituent part of milk and the white of eggs were much alike. Now it has long been known to milkmen that wheat middling and bran are about the best of feed to make a cow give milk; why not, then, the best to make the hens lay eggs? I tried it, and since then have no trouble. My mode of preparing the feed is to mix about five parts of bran with one of middlings. In the morning I wet up with water about four quarts of the mixture in a large tin pan, taking pains to have it rather dry, though all damp. to have it rather dry, though all damp.

This I set in a warm, sunny spot, south of their shed, and they walk up, take a few which we are determined to sell at the lowest easily the state of the state their shed, and they walk up, take dips, don't seem to fancy it like corn, and dips, don't seem to fancy it like corn, and the factor of the f better, but always coming round in a short time for a few more dips from the dish of

day but what one or more are standing by the pan and helping themselves. I am careful to mix for them just careful to mix for them just as much as WILLIAM I. STEEL, they will consume during the day. At night, just before they repair to the roost, SADDLE AND HARNESS MAKER I usually throw them a pint of shelled corn, well scattered, so that each one can get a few kernels. If your hens don't incline to eat this at first, sprinkle a little Indian meal on it. I would like all who

It is almost impossible to get a horse shod without having the frogs cut away. All veterinary surgeons, all horsemen, all leading blacksmiths, agree that the frogs HENRY & CO'S. should not be pared one particle-not even trimmed. No matter how pliable and soft the frogs is, cut it away smooth on all sides and in two days it will be dry and as hard Lath, Pickets, &c., constantly on hand as a chip. You might as well cut off all the leaves of trees and expect them to flourish as to pare away the frog and have a healthy foot. The rough spongy part of the frog is to the foot what leaves are to the tree—the lungs. Never have a red hot shoe put upon the foot to burn it level. If you can find a blackamith that is mechanic enough to level the foot without using red hot-iron, employ him. The burning process deadens the hoof and tends to contract it. If you do not think so, try the red-hot poker on your finger nail, and see how it will effect the growth of that There are many other important points in shoeing horses, but these two are of more importance than all the rest, level to the STEINWAY & SONS', apprehension of men not skilled in horses, and the most disregarded. STORING POTATOES .- As the time has

arrived for potatoes—the early sorts—to be harvested, I wish to say to those who have them to harvest, to put them into barrels as the best mode of disposing of them. There are those who have tried this for years, and cannot be persuaded to keep their potatoes in any other way. Dig and expose to the air till dry; then put up as directed, taking the barrels to the field. Store in the cellar, any part most convenient. The advantage is that they are have them to harvest, to put them into not exposed, as with open bins, which often vitiate it, and always leave a potato odor. You have nothing of this. Another advantage you can put where most convenint, and more at pleasure, with less difficulty, and and more at pleasure, with less difficulty, and life you want great Bargains go to SMITH'S NEW STORE. you place tier upon tier of barrels till up to the floor. When it is wished to use any, a barrel is opened and used, and so on with the rest, leaving no dirt, the ground remaining in the barrel. Or, if it is wished to sell, they are already put up. Any barrel will do, so that it is strong enough—a salt barrel is as good as any.

PRESERVING THE FLAVOR OF BUTTER. -The German Agriculturist says that a great portion of the fine flavor of fresh butter is destroyed by the usual mode of washing, and it recommends a thorough kneading for the removal of the buttermilk and a subsequent pressing in a linen cloth. Butter thus prepared, according to our authority, is pre-eminent for its sweetness of taste and flavor, qualities which are retained a long time. To improve manufactured butter we are advised by the same authority to work it thoroughly with fresh cold milk, and then to wash it in clear water, and it is said that even old and racid butter may be rendered palatable by washing it in water to which a few washing, and it recommends a thorough by washing it in water to which a few drops of a solution of chloride of lime is added.

AIRY VIEW ACADEMY!!!

PERRYVILLE, JUNIATA COUNTY, PENN'A.

CARPETS, DUST AND DISEASE .- An atmosphere impregnated with the dust which has gathered in carpets and remained there for a considerable length of time is positively unhealthy. The dust after being stagnant for some time, especially in warm weather, presents myriads of aniuncular to prevent the evil the carpets should be cleaned often. The dust should be throughly removed every month. The trouble of taking up, shaking and re-The trouble of taking up, shaking and replacing will be amply repaid, first, in the matter of health, secondly, in preserving the carpet. We advise the good housewives-there are many-to make a note of this .- Hearth and Home.

DESTROYING ANTS .- A French agriculturist reports that after trying every meth- PLASTER PARIS CORNICES, od known to him for the destruction of ants infesting some of his fruit trees, he succeded in effecting his purpose in the most complete manner by placing a mixture ORDER. VARIETY OF LEATHER AND

SHOE FINDINGS, HILL STREET. HUNTINGDON, PENN'A.

Jan. 4, 1871.

Miscellaneous.

THE AMERICAN WASHER! PRICE, \$ 5 50. The American Washer Saves Money, Time, and Drudgery.

The Fatigue of Washing Day no longer Droaded, but Economy, Efficiency, and Clean Clothing, Sure.

In calling public attention to this little machine, a few of the invaluable qualities, (not possessed by any other washing machine yet invented,) are here enumerated.

a few of the invaluable qualities, (not possessed by any other washing machine yet invented,) are here enumerated.

It is the smallest, most compact, most portable, most simple in construction, most easily operated. A child ten years old, with a few hours' practice, can thoroughly comprehend and effectually use it. There is no adjusting, no screws to annoy, no delay in adapting! It is always ready for use! It is a perfect little wonder! It is a miniature giant, doing more work and of a better quality, than the most elaborate and costly. One half of the labor is fully saved by its use, and the clothes will last one-half longer than by the old plan of the rub board. It will wash the largest blanket. Three shirts at a time, washing thoroughly! In a word, the ablution of any fabric, from a Quilt to a Lace Curtain or Cambrie Handkerchief, are equally within the capacity of this Little Gem! It can be fastened to any tub and taken off a will. \*

No matter how deep rooted a prejudice may exist against Washing Machines, the moment this little machine is seen to perform its wonders, all doubts of its cleansing effeacy and utility are banished, and the doubter and detracter at once become the fast friends of the machine.

We have testimonials without end, setting forth its numerous advantages over all others, and from lundreds who have thrown aside the unwidely, useless machines, which have signally failed to accomplish the object promised in prominent and loud-sounding advertisements.

It is an perfect for washing an a wringer is forwinging. The price is another paramount inducement to purchasers, has been placed so low through the surface of domesters phonekeeper, and there is naticite of domesters househeeper and there is naticite of domesters househeeper and there is naticite of domesters househeeper.

\$5.50

All that is asked for this Great Labor Saver, is fair trial. We guarantee each machine to do its Sole Agents for the United States, A. H. FRANCISCUS & CO.,
