We have just been informed, says the Franklin Patriot, that one of the largest and most enterprising farmers of this coun- try, last year, saved enough clover seed for his own sowing, sold enough to pay for all the dry goods used in his own family, and received \$25 in cash in addition. This is the way in which he did it. He put a wire bottom in a trough in which he fed his stock—the wires being two or three inches above the close bottom of the trough. The stock in pulling the clover hay from the racks would scatter the seeds almosts pure through the wire into the receptacle below. How easy and simple a way to save hundreds of dollars, now annually sent out of the country. This can be done also by making close floors in your barn lofts. This will be somewhat more expensive, but it will pay for itself in one season. To Stop Nose BLEEDING.—It is worth from the nose when it becomes excessive.
