Very few farmers consider all suggestions as to the preservation of health as not applying to them. Nothing will so much conduce to the adoption of a system of working the farm as a well prepared map, hung wacre the farmer can see it every day. It will be sure to set him to thinking and planning how best to pitch his crops, and how best to work to save work. And once the farmer adopts a system of farming, he starts on the road to success.

It matters not that the system is not the best that could be devised, so long as it is a system it is infinitely preferred to the hap-hazard practice of many farmers. Hor Water About Peach Trees.—
It has been recommended by those who have tried it, to apply a pail of hot water to the collar of penel trees in spring, and a top-dressing of ashes. It is claimed that this will prevent "yellows," and kill the borer, or arrest the work of the grub in its incipient stages. In support of this practice and its advantages we have the testimony of several prominent fruit gruwers.
