Keeping Butter.

SIMMONS' SIM While a well in this vicinity was being TAKE cleaned recently, a half pound of butter TAKE TAKE was found in the bottom, as good and sweet as when first made. How long it had been there no one knows. The present occupant of the premises has been fifteen years on the place, and the pump being in constant use, there had been no being in constant use, there had been no occasion befere to have it cleaned. The butter must have been there all the time, REGULATOR! butter must have been there all the time, REGULATOR! and how long before is not known. The outside was of a paler color than that within, but otherwise there was no

It is not unknown to good dairy folks that butter will keep well in cool, pure spring water, and some have taken advantage of the fact to preserve butter in close vessels under the surface. But we think it is not generally known that it would the provided the surface of the surface. But we think it is not generally known that it would have see level and to surface of the surface. But we think it is not generally known that it would have see level and to surface of the surface of th keep so long in actual contact with the water. It might be worth considering whether this hint about preserving butter might not be taken advantage of, so as to initiate a regular plan of preserving butter sweet and fresh, until market or other circumstances favor good prices. It is one of the weaknesses of the butter business that at some seasons prices are ruinously low, and the usual remedy of potting is not a very good one.

The water, of course must be cool and pure. At a high temperature, such as most water near the surface reaches, vegetable organisms grow that would soon communicate decay to organic matter in the water: but there are many places where a lagoon of the proper condition of pure well water could readily be con structed.

VINEGAR BITTERS. It may not be out of place here to remark that little hints such as these are continually occuring in almost every one's experience; but only soon to be forgotten. Yet often if the suggestion be listened to and the thread followed up, one might get on the track of some good idea that would rapidly make a fortune. We think that new inventions require much study; but the truth is, most of our best discoveries have been by accident. - Germantown Telegraph.

To Break a Pair of Steers.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of Vinegar Bitters?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a lite-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of Vinegar Bitters in healing the sick of every disease man is heir to. They are a gentle Purgative as well as Tonic, relieving Congestion or Inflamation of the Liver and Visceral Organs, in Bilieus Disease. The first step in my practice was to get the steers in a small yard, then into the stall, put a rope around the horns, tie them in the stall, and teach them to stand quietly when tied. All harshness was avoided. The next thing was to establish confidence between myself and the steers; which was done by patting, currying, and ters act on all these cases in a similar manne By purifying the Blood they remove the cast and by resolving zway the effects of the infiammittion (the tubuscular deposite) the affected par receive health, and a permanent cure is affected if men will enjoy good health, let them use Vir egar Bitters as a medicine, and avoid the use alcoholic stimulants in every form. feeding nubbins of corn. Wild steers would soon learn that they were not going to be hurt. They were then trained to be led simply; after which two were tied together by their horns, and were led around the yard, and along the highway, until they were as tractable as a gentle horse. Then a yoke was put on their necks, and two were allowed to run loose Druggists and General Agents, San Francise California, and cor. Washington and Charlton Sts New York. for a few hours every day in the yard while wearing the yoke. A sweep was then made by setting a post in he ground, allowing it to extend two or three feet above the surface, and the but end of the PROTECT YOUR BUILDINGS pole, twenty or more feet long, was placed in a horizontal position on the post, with an iron bolt or crowbar running through the pole to the top of the post. The steers were hitched to the small end of the pole, with a hand sled attached; and only about the cost of is FIRE-PROOF again they were trained to draw the driver, on

sleigh to the woods, and bring home a small load of wood.

the sled. After a few lessons on the

sweep, they were prepared to draw a light

On INC. PROOF sepaines sparks and live coals falling upon it, as may be easily teated by any one, and as appears from the fact that Insurance Companies make the same Tark that they do for lated Roofs. For tim and iron it has a squark of the same track that they do for lated Roofs. For tim and iron it has a squark of the same tracks of the same tracks of the same tracks of the same tracks and the same tracks of the same tracks o Boiled Corned Beef. Many a farmer's table is weekly spread with savory dishes composed of boi'ed corned beef and cabbage; yet often they are not as attractive as they should be, because they are not properly cooked and served. The beef should always be soaked over night, unless it has been recently salted : d if so, it should be well washed. Put the beef into boiling water, and as soon as it boils up, skim it well; remove the pot from the hottest part of the fire; and let it simmer constantly from four to six hours, according to the size of the piece half an hour per pound is a good rule, and it will apply to corned beef, tongues and

The chief reason of so much of our corned beef, being tough and not deliciously tender, is too rapid boiling, and for too short a time. If the meat is to be served have examined them, to be facilitied to their. Call and examine prices before purchasing elsewhere, as I will not be undersold, and cal afford to make large reductions in prices to buy cold, it is much better to let it stand in the pot after cooking until nearly cold; then take it out and press it under heavy weights, first pulling out the bones. This will give you a solid piece of neat, from which very thin slices can be cut, which prove a decided relish to the most fastidi-SPOKES, RIMS, PLOW & HANDLES

Adorn the Farm. While the farmer has his mind, in the main, on making improvements on his farm, which are of a practical use, which returns profit in cash, it will not be wise to forego those which pay in the gratifica tion they afford to the finer instincts of our nature. The farm should be made beautiful as well as fertile; it should have trees for ornament and shade as well as for growing fruit and timber. Grounds around the dwelling, walks leading to and from it, a garden ajoining, are needed to complete a farmer's home, and they should be so laid out, constructed and kept that they shall minister to the innate love of the beautiful and picturesque as well as meet the practical uses for which they are

designed. APPLE JELLY .- Apples make an excel ent jelly. The process is as follows:-They are pared, quartered, and the core letely removed, and put in a pot without water, closely covered, and put into an oven or over a fire. 'When pretty well stewed the juice is to be squeezed out through a cloth, to which a little white of an egg is added and then the sugar. Skim it previous to boiling, then reduce it to a proper consistency, and an excellent jelly will be the product.

The Peruvian Syrup, a Protested Solution of the Protoxide of Iron, is so combined as to have the character of an aliment, as easily digested and assimilated with the blood as the sim lest food. It increases the quantity of Nature's Own Vitilizing Agent, Iron in the blood, and cure as "thousand ills," simply by toning up, Invigorating, and Vitalizing the system. The enriched and vitalized blood permeates overy part of the body, epairing damages and waste, searching out morbid secretions, and leaving nothing for disease to feed upon. This is the secret of the wonderful su

A LOW STATE OF THE SYSTEM.

Being free from Alcohol in any form, its ener-tising effects are not followed by corresponding eaction, but are permanent, infusing strength, rigor, and new life into all parts of the system, and building up an Iron Constitution. Thousands have been changed by the use of this remedy, from weak, sickly, suffering creatures to strong, health, and happy men and women; and invitids cannot reasonably hesitate to give it a
