

The Huntingdon Journal.

Wednesday Morning, Dec. 17, 1873.

READING MATTER ON EVERY PAGE.
LOCAL AND PERSONAL.

Brief Mention—Home-Made and Stolen

OF INTEREST TO THE PUBLIC.—The book accounts of Dr. John McCulloch have been placed in my hands for collection. The number of these is so large that it is impracticable to notify each debtor personally. These against whom there are accounts on these books should call for settlement. In fact all who had the Doctor's services during his extensive practice at this place should see whether they have squared up with him. I will expect visits from all his old patients before the first of January next. After that date those who have not given their attention to this matter will receive notice of a different character. Settle and avoid laws, please.

MILTON S. LYTLE,
Attorney-at-Law,
Huntingdon, Pa.

High winds.
Muddy roads.
Fix up your ice house.
The weather is changeable.
An open winter is predicted.
The 21st inst. is the shortest day.
Altoona's "soiled doves" are in trouble.

Wolves are killing sheep in Clearfield county.
Perry county has a Superintendent who is all right.
The Harrisburg State Journal will not be received.

Well-turned ankles were visible during the high winds of Friday.
The epinephic has made its appearance in some parts of the State.
Drs. Thompson & McCarthy, of Mt. Union, have brushed up their cards.

The place to buy holiday goods is where they are advertised for sale.
Mr. D. S. Arlic is building a large ice-house on his Church street property.
William Lander, ex-sals for Europe in the Russia, to day. Bon voyage!

Part of "Dot Lette Sherman Band" contemplates working for Burchell & Son.
The lady teachers who attended the Institute were a very fine body of young ladies.

"Steward" keeps everything neat and trim about the depot. He makes a capital depot policeman.
William Hartley, late Democratic candidate for Auditor General, is negotiating for Lloyd's Bedford farm.

The best evidence of the resumption of business throughout the country is the disappearance of tramps.
We hope the Institute was a regular revival to the teachers. They needed something of the kind, badly.

There was more mud, in West Huntingdon, last week, than we have plastered the Tower of Babel.
Prof. Atkinson goes for Cuba. He thinks the fruit will be secured.

Dr. Shanks, of Mechanicsburg, the tallest doctor in the State, was in town last week. He is a perfect Colossus of Roads.
Rev. Clippinger preached a very fine funeral sermon, in the Donation church, in Barre township, on last Sunday afternoon.

In Harrisburg they fine the human swine who spit tobacco juice on church floors. In Huntingdon they should do likewise.
W. R. Baker is teaching in Warriorsmark through this winter. He has a good school but ought to have a better school house.

"Nickedoms Woecker" was at the Institute, but didn't find his work with the apple seed or egg success. He didn't show his hand!
The Coleman Sisters' Troupe, recently disbanded, has been reorganized, and at an early day will appear before a Harrisburg audience.

Shakespeare wrote: "Throw physic to the dogs! I'll none of it." Some of the teachers thought the sentiment originated with Prof. W. R. Baker.

Somebody suggested that "Nickedoms Woecker" might have something to say on some of the questions before the Institute. We will see.
Every school teacher in the county ought to subscribe for the JOURNAL. To make a successful teacher you must keep posted. Take the JOURNAL.

There was a larger number of teachers in attendance upon the Institute, last week, than at any previous session. Mr. McNeil feels very much encouraged, no doubt.
The members of the colored band propose holding a Fair and Festival, during the holidays, the proceeds of which are to go towards procuring the services of a teacher.

If our teachers were to gather up the local news of their respective localities, and send it to the county papers, it would add something to their stock of accomplishments.
They had a splendid little engine on the East Broad Top Railroad that has handled thirty-six P. R. cars, one-half of them freighted. It has eight driving wheels and is a perfect Hercules.

Squire Lightner, of Shirley, thinks the Democratic ticket in that section is gone to the demitition post—now since the late meeting of the Directors of the Poor. You shouldn't make such admissions, Squire.
A couple of Philadelphia's, George Moore and H. R. Conrad, captured a fine buck and bagged six rabbits and eight pheasants in the neighborhood of Coffee Run, last week. They report game abundant in that section.

Every teacher in the county should invest at least ten or fifteen dollars in literature, per annum. It cannot work without tools. Magazines and papers are as necessary to him as planes and saws are to a carpenter.
The Panic has subsided entirely. The cities are full of money but few customers. It is said to be a drug in the city banks, but until the country banks do something for their respective neighborhoods business must slack.

The Times may get out of joint as much as it has a mind to, but when they meet the editor at home, as we did the other day, he is as pleasant as a Dry Goods Clerk. He is monarch of all he surveys, down there. We almost envy him.
Daniel Sarley, an elderly and respected farmer of Penn township, went out to plow on Thursday last week, and on returning in the evening, search was made for him, when he was found lying dead in a furrow, his team standing near by.

It was very plain, at the Institute, on Thursday afternoon of last week, during Prof. Hunt's lecture, that the teachers of Huntingdon county do not read as many newspapers as they should. Step up and subscribe for the JOURNAL, only \$1 for six months.
Three gamblers tried their hands at three card monte on one of the eastern bound trains between this place and Altoona, last week, and had a spat with a conductor or two; and they wound up in Castle Hook, to be as they usually obtain left and departed.

Ho! FOR CHRISTMAS!—Go to Beck & Fleming's Bee Hive Grocery for your holiday goods. They have the largest and best assortment ever brought to this town, such as China and Bohemia ware, iron, woaden and tin toys of every description. Also, a large assortment of Bon Bons, Sugar Toys, and Confectioneries of all kinds.

LADIES' RELIEF SOCIETY.—At a meeting held Wednesday, Dec. 3rd, in the Women's Room, to devise means to aid the suffering poor, the following resolutions were unanimously adopted:

WHEREAS, In consequence of the prevailing financial difficulties, and the usual inclemencies of the season, there is a greater amount of suffering among the poor than heretofore. Therefore,

Resolved, That we form ourselves into a society to be known as the Ladies' Relief Society, for the purpose of relieving the wants of any needy assistance, and exerting ourselves to procure employment for them.

Resolved, That Committees be appointed and instructed to canvass our borough, and report to the proper officers, the names of those suffering or in need of relief, and to solicit of our citizens aid for this most worthy object.

Resolved, That our friends and neighbors are hereby requested to send among them any material useful to warm or sustain the body.

Resolved, That our proceedings, with the names of officers and Committees be published in our town papers, with a notice of our objects, and that the names of our citizens be placed in our aid list, and that we do our best to relieve the suffering poor.

Resolved, That we tender our thanks to the members of the Huntingdon Fire Co. and Town Council for the use of their very pleasant rooms.

Resolved, That Mrs. David Blair; Vice President, Mrs. John H. West, Mrs. Rev. A. D. Gole, Mrs. Rev. Hunter, Mrs. Rev. Zahner, Treasurer, Mrs. J. Simpson Africa; Secretary, Miss M. A. Welch.

Ward Committees.—1st Ward, Mrs. S. G. M. Smecker, Mrs. K. Allen Leland; 2d Ward, Mrs. A. M. Welch, Mrs. A. M. Welch; 3d Ward, Mrs. J. H. West, Mrs. J. A. Brown, Mrs. Flegle; 4th Ward, Mrs. Hunter, Mrs. Cochran, Mrs. K. Allen Leland; 5th Ward, Mrs. J. H. West, Mrs. J. A. Brown, Mrs. Flegle; 6th Ward, Mrs. Hunter, Mrs. Cochran, Mrs. K. Allen Leland.

Distributing Committee.—Mrs. W. A. Orison, Mrs. H. S. Wharton, Mrs. Catharine Willoughby, Mrs. R. R. Simpson, Mrs. J. W. McNeil, Mrs. Mary Miller, Miss C. West, Miss Jane Carothers, Miss Sadie Weaver.

Committee to procure and place mita boxes in the post-office and Henry & Co.'s store, by subscribing for the instruments which give them authority.

The Pennsylvania Furnace, Huntingdon county, suspended operations a week or two since for repairs, etc. It will resume work in about a month. In consequence of this suspension Tyrone Forge has shut down until the furnace begins to turn out metal again.

The foreman will spend the vacation, which will last about six weeks—in the wood choppings connected with the place, or by hunting deer on the Allegheny mountains.—*Hunting Herald.*

Last week, one day, a party of two or three pedagoes from the rural districts, sauntered out to see the sights, and in their travels halted before a locomotive in front of the Union depot. One of them, who had never seen a locomotive before, viewed the iron horse over and over again, and as the trio were about starting again on their tour of observation, he reluctantly turned away, remarking that it was "a tarnation complicated thing," and wanted to know "which end the horses were hooked."

Some times think, when we look around us, that the great principles, which underlie human efforts, are sadly at fault. Why some people will labor so much harder, and under degree so much more tribulation, in bringing about similar results, than others, we have never been able to understand. Whether it is owing to a misconception of the idea to be produced, or the proper comprehension of the labor required, are questions that we have never been able to settle in our own mind. In fact we are left in the fog. These reflections are not intended to be a reflection on the street, the brother Corman's sixth is a boy. Five girls, and one, boy! Jehoshaphat! At last!

FEELERS, PARS. The second invoice of Stable, Fish, Alaskan and Squirrel furs, at this place, arriving this week at Henry & Co.

BEVALLO ROBES AT GLAZIER'S. dec17-4t.

THE NEWTON HAMILTON BRIDGE.—Newton Hamilton and the surrounding country has all excitement on Thursday last, 4th of December, at which time the new bridge over the Juniata was formerly opened. In addition to the visitors mentioned before Messrs. Mitchell and Close, commissioners, Joseph McColloch, clerk, Gen. Ross, Ex. Com. Wilson, and many others were present. Presently at 10 o'clock, the bridge was opened to the south side of the river, where a wagon drawn by six horses, with hay-ladders attached to the vehicle, was first in line with our friend, David Jenkins, eq., on the saddle. Horse as commander-in-chief; ex-Senator Petriken mounted the off-wheel horse; Dr. G. W. Mitchell, and L. B. Ellsworth got on top of the wagon and the horses were started. Mr. and Bob Taylor, assumed position on the front horses. The wagon was packed with nearly one hundred passengers.

The team was then driven across the bridge, when an old-fashioned three cheers was given by those present. The procession next paraded through the principal streets of the town, and finally brought up at the weigh-scales, where a wagon and five stock recorded eleven and one-half tons.

The next thing in order was a hungry attack on the substantial eatables provided by the citizens and farmers, comprising everything choice and seasonable, which was served up in one of the storerooms. The adults being supplied, the juveniles were called to the front, and a proceeding for which they are always ready.

The crowd then proceeded to the Town Hall, where addresses were delivered by R. B. Petriken, T. M. Utley, eq., and Dr. G. W. Mitchell. They all congratulated the upper end on the completion of this important undertaking, and Mr. U. drew attention to the fact that this was the first free bridge ever erected over the Juniata in Mifflin county.

Three cakes, prepared for the occasion by the ladies, were presented to Senator Petriken, Dr. Mitchell, and Mr. Lamberson, contractor. The first person to cross on foot was John Miller, Sen., and the first to drive over David Jenkins.

The bridge has four spans, is 643 feet in length, 14 feet wide, is sufficiently elevated above high water, and is considered a substantial structure. Its cost in round numbers is \$18,000.

After the above was in type we received another account of the celebration, from which we make a few extracts:
We also had the pleasure of seeing some friends from the west end of the county, among whom were J. H. McFarlane, and Bob Taylor, a very fine and youthful looking widower, whose bride he had just taken, and who were very much pleased and hope to see again. Among other things it is said that the cake received by the Dr. had a great favoring on it than any of the others, and that the priest found the reader most detestable.

The evening entertainment was a grand affair. The first act was a singing of the first time of all was the closing up performance in attending "Morrison's ball," given at one of the principal hotels in his honor, as he was a most zealous advocate of the bridge. The ball was inaugurated by L. L. Ellsworth, Mr. Morrison in the role of the bridegroom, and the other worthy gentlemen, bravely continued it. All the good of the village was in attendance, and they returned to their homes with more grace and elegance than any pen can picture.—*Lewistown Gazette.*

MISS AFRICA TAKES THE LEAD FOR THE HOLIDAYS!—We have just looked over Miss Africa's splendid stock of holiday gifts and goods of every description, and they are superb. We have never seen a finer display of goods than she has. It looks to us as if Miss Africa intended to take the lead in her department. She certainly has a fine supply and she assures us that she intends to keep it up. We wish her success, for such a store is very much needed in this place. Just take a peep and satisfy yourselves. dec17-2t.

CONCERT.—Violinist, Gustav and Corbett, assisted by Madame Clara and the orchestra, will give a concert at the residence of Warton & Maguire's Hall, on Thursday evening, December 18th, 1873.

Any person sending us fifty cents will receive a copy of J. W. Welch's "Crowning Gift of Heaven," by return mail.

For the best Mince Meat call on M. L. Shanfer's meat market.

HUNTINGDON COUNTY TEACHERS' INSTITUTE.

The Huntingdon County Teachers' Institute convened in the Court House, at Huntingdon, on December 11th, 1873, at 2 o'clock. The meeting was opened by prayer. The subject of Orthography was then presented by S. D. Caldwell, who presented an excellent outline of the letters of the English alphabet.

J. J. Atkinson then concluded his essay on "Our young vocalists then sang "Through the forest bounding." The subject of Common Fractions was next presented in a most intelligent manner by E. H. White, who was followed by W. R. Baker, who continued his instruction in Decimal Fractions.

Prof. Raub then rose to answer the referred question, "What should a teacher do if a school closes up?" He answered it in plain English by saying that any director or board of directors should see to it that the school should be kept open, and that the room unoccupied, were unfit for the office of director, but the speaker hoped that the school should be kept open, and that the room unoccupied, were unfit for the office of director, but the speaker hoped that the school should be kept open, and that the room unoccupied, were unfit for the office of director.

Prof. Raub then took up the question referred to him, namely, "Does medicine, and surgery, generally, act upon the system relative to the benefits to be derived from educational meetings, such as Teachers' Institutes?" He answered it in a most intelligent manner, and the importance of daily attendance on the sessions.

Although matter is inactive in itself, yet it becomes active when it is combined with other matter, in a great many cases, a chemical action, which we cannot say that either one of them is independent of the other, still they are certainly an action when they come in contact with each other. He said medicine was an inert matter and when it was combined with other matter, it became active, and he said that the same was true of the human mind.

Prof. Raub then took up the subject of English Grammar. The sentence "The bird was shot" was presented as an example of a passive sentence, and he said that the verb "was shot" was a transitive verb, and that the object of the verb was "the bird." He then presented the sentence "The bird was shot" as an example of a passive sentence, and he said that the verb "was shot" was a transitive verb, and that the object of the verb was "the bird."

Prof. Raub then took up the subject of the signs and symbols of the metric system, and he said that the signs and symbols of the metric system were the same as those of the English system, and that the signs and symbols of the metric system were the same as those of the English system.

Prof. Raub then took up the subject of the signs and symbols of the metric system, and he said that the signs and symbols of the metric system were the same as those of the English system, and that the signs and symbols of the metric system were the same as those of the English system.
