Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sterra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What isshe cause of the unparalleled success of Vinegar Bitters?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a lite-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of Vinegar Bitters in healing the sick of every disease man is heir to. They are a gentle Purgative as well as Tonic, relieving Congestion or Inflamation of the Liver and Visceral Organs, in Bilious Diseases.

Neither premiums to subscribers nor discount to thus can be allowed unless the money is remitted irect to the publishers. No premiums given to Ilabs.

CLUBS.

A discount of twenty per cent. will be allowed to clubs of four or more persons. Thus: fourcepies of Blackwood or of one Review will be sent to one address for \$12.00; four copies of the four Reviews and Blackwood for \$48, and so on.

To clubs of ten or more, in addition to the above discount, a copy gratis will be allowed to the getter up of the club. Each number contains a Fine Steel Engraving on some subject of general interest—usually a portrait—and each year's volumes contain twelve or more of these engravings, which are executed in the best manner by the best artists. These engravings are of permanent value, and add greatly to the attractiveness of the Magazine.

EDITORIAL DEPARTMENTS.

The Editorial Departments are Literary Notices, dealing with the books published at home, Foreign Literary Notes, giving the freshest information aboutliterary matters shroad; Science, which supplements the longer articles with hiref paragraphs covering the whole scientific field; and in Varieties will be found choice readings, culled from new books and foreign journals. No other Eclectic publication attempts anything like these departments.

To this department, the ELECTIC gives larger space than any other magazine in the world not exclusively scientific. It not only presents from month to month an ample record of discovery and invention, but gathers from the whole field of foreign current literature the best articles of the most authoritative thinkers and writers; of such men as Profs. Huxley and Tyndall, Richard Protor, R. A., Prof. Owen, Dr. W. B. Carpenter, Max Muller, and Mr. J. Norman Lockyer, all of whom have been represented in recent issues of the Magazine.

The Eclectic also finds room for an array of in-BRITISH QUARTERLY REVIEW (Evange REPRINTED BY

AMERICAN CYCLOPÆDIA.

NEW REVISED EDITION.

The work originally published under the title.
THE NEW AMERICAN CYCLOF-EDIA was complete in 1863, since which time the wide circulatic which it has attained in all parts of the Unite States, and the signal developments which has taken place in every branch of science, literatus and art, have induced the editors and published to submit it to an exact and thorough revision and to issue a new edition entitled THE AMERICA CYCLOF-EDIA.

to submit it to an exact and unoruga, evaluations and to issue a new edition entitled The AMERICAN CYCLOPEDIA.

Within the last ten years the progress of discovery in every department of knowledge has made a new work of reference an imperative want.

The movement of political affairs has kept pace with the discoveries of science, and their fruitful application to the industrial and useful arts and the convenience and refinement of social life. Great wars and consequent revolutions have occurred, involving national changes of peculiar moment. The civil war of our own-country, which was at its height when the last volume of the old work appeared, has happily been ended, and a new course of commercial and industrial activity has been commenced.

Large accessions to our geographical knowledge have been made by the indefatigable explorers of Africa.

now to take their place in permanent and authentic history.

In preparing the present edition for the press, it has accordingly been the aim of the editors to bring dewn the information to the latest possible dates, and to furnish an accurate account of the most recent discoveries in science, of every fresh production in literature, and of the newest inventions in the practical arts, as well as to give a succinct and original record of the progress of political and historical events.

The work has been begun after long and careful preliminary labor, and with the most ample resources for carrying it on to a successful termination.

tion.

None of the original stereotype plates have been used, but every page has been printed on new type, forming in fact a new Cyclopædia, with the same plan and compass as its predecessor, but with a far greater pecuniary expenditure, and with such improvements in its composition as have been suggested by longer experience and enlarged

such improvements in us completed been suggested by longer experience and enlarged knowledge.

The illustrations which are introduced for the first time in the present edition have been added not for the sake of pictorial effect, but to give lucidity and force to the explanations in the text. They embrace all branches of science and of natural history, and depict the most famous and remarkable features of scenery, architecture and art, as well as the various processes of mechanics and manufacturers. Although intended for instruction rather than embellishment, no pains have been spared to insure their artistic excellence; the cost of their exceution is enormous, and it is believed they will find a welcome reception as an admirablefeature of the Cyelopadia, and worthy of its high character.

This work is sold to Subscribers only, payable on delivery of each volume. It will be completed in sixteen large octavo volumes, each containing about 800 pages, fully illustrated with several thousand Wood Engravings, and with numerous colored Lithographic Maps.

Investment of the data of the speed of time, have brought into public view a multitude of new men, whose names are in every one's mouth, and of whose lives every one is curious to know the particulars. Great battles have been fought and important sieges maintained, of which the details are as yet preserved only in the newspapers or in the transient publications of the day, but which ought now to take their place in permanent and authentic history.

The Peruvian Syrup, a Protected Solution of the Protoxide of Iron, is so combined as to have the character of an aliment, as easily digested and assimilated with the blood as the simplest food. It increases the quantity of Nature's Own Vitilizing Agent, Iron in the blood, and cure a "thousand ills," simply by toning up, Invigorating, and Vitalizing the system. The curriched and vitalized blood permeates every part of the body, repairing damages and waste, scarching out morbid secretions, and leaving nothing for disease to feed upon.
