

LOCAL AND PERSONAL.

Brief Mention—Home-made and Stolen.

Camp meetings. Politics this week. Blackberries are plenty. Our segars are splendid. Tramp-traps were last week. Trout fishing ends on the 15th inst.

The United Brethren Camp Meeting commences to-day. There is considerable Commonwealth business before the Court.

The transgressors of the Local Option Law are having a hard road to travel. The best brands of Tobacco and Segars can be had at the JOURNAL store.

Several perch of loose stone grace Fifth street, between Washington and Penn. The rains on Friday and Saturday were very much needed and did a world of good.

A vein of bituminous coal has been discovered in Altoona at a depth of twenty-seven feet. The canal bridges, on Sunday evening, would have been capital fields for missionary work.

The Silby Troupe express themselves well pleased with the reception they received at Bedford. A tax-payer, in Union township, wants to know something about the bounty tax of that township.

Everybody should take the daily JOURNAL during the Camp. Only thirty cents for ten numbers. The dogs which have been barking themselves hoarse at candidates for sheriff will have a respite now.

John A. Pollock, esq., is going to manufacture all kinds of agricultural implements, at his machine shop. We have an office indicator for sale that every man who has a place of business ought to have. Come and see it.

Genuine Michigan Fine-cut Chewing Tobacco, direct from the manufacturer, just received at the JOURNAL store. Try it. George Ellis and Harry Rohm, of Philadelphia, are spending the heated term in this place. They are clever fellows.

An eastern contemporary puts it thus:—"Worms, with peach skins around them, have made their appearance in market." Buchanan's new residence makes a splendid appearance. Gas has been extended from Washington up Seventh street to it.

Advertising is better now than it has been for years, at this season of the year, and those who advertise are doing the business. The Juniata Valley Camp Meeting Association will be short 150 tents. Subscribe for the Daily Camp Journal. Only 30 cents.

The hotel and pea-nut man did a good business on the day of the balloon ascension. We doubt whether it paid anybody, save the balloonist. The car works don't run on Sunday, nor do the proprietors want people to run there on that day. We stay away now. The policeman told us so.

Rev. J. A. Gehrett, of Adrian College, Mich., discoursed to the good people of Cassville, a few days ago. His sermon was appreciated by all. Success to the young Divine. An application will be made to this Court to set aside the present Board of School Directors, in this borough, for refusing to furnish proper school facilities. This looks like sensible business.

There was a considerable contest in the First Ward, on Saturday evening last, for delegates. The result was the election of one of each. There was no contest in the remaining Wards. Mr. Geo. A. Port, of the firm of Port & Friedley, is off for the West, for the purpose of purchasing a car load of cattle, which will be served at their markets on Fifth street and in West Huntingdon.

Leney Elliott went from the mow to the floor, in his father's stable, one day last week, according to the laws of gravitation, and he now mourns and laments several bruises and sprains, but no serious consequences. The Tyrone Herald says that on a fence rail, at a point near Warriorsburg, where the Lewisburg, Centre and Tyrone railroads cross the wagon road, this is legibly written: "If you look for the locomotive, but God knows who!"

Gas pipe has been laid on Fifth street from Washington to Allegheny. When Messrs. Gwin and Boyer get their parents down and pavement is laid from Fifth to Leister's, almost all the population west of Fifth will go down Fifth to the station. Prof. Kuhn, of Millwood Academy, was in to see us last week, and represents the prospects of the Academy as being good. We are glad to hear it. The extension of the Railroad to Orbisiana makes Shade Gap a very desirable point for a seat of learning of this class.

What sin hath the people of Huntingdon committed that they are not permitted to buy excursion tickets to Bedford, as other people along the line of the Pennsylvania Railroad? Why are they discriminated against, pray? Who is responsible for the discrimination, the Penn. or the B. & P. We want to know. The Potato Bugs did not put in an appearance at any one of the polling places, in this place, at the time advertised in their call, on Saturday evening last. They can't muster a corporal's guard in Huntingdon, and very few any place else. Everybody, of any soundness and political capacity, is deserting them. There is no prospect ahead outside the regular organization. Come, close up the ranks.

A Trough Creek correspondent writes: The travel to Coffee Run is brisk since the 4th. No doubt the centre of attraction is there. B. L. Baker, down near Newburg, has a very large lion, that is said to be as gentle as a lamb. The potato bugs are very numerous in Trough Creek Valley. Some have peculiar colored heads, and look as though their heads were blossoming for the tomb.—Rev. McMurray will preach at Trough Creek and Newburg, on the 16th inst.

The balloon ascension, in this place on last Wednesday, was one of the finest in the history of ballooning. The balloon raised perpendicularly over 6000 feet without drifting and hung suspended for fifteen minutes immediately above the town. It drifted first a few hundred feet north, and then south four or five miles where it landed on the Rysstrom Branch. J. Wilson Greenleaf accompanied Prof. Light. He manifested much pluck. They alighted as gently as they ascended.

The "Alliance" has commenced active operations against the violators of the liquor laws, seven of these individuals having been returned to court on Monday. We are requested to say that the following persons will receive names for membership in the "Alliance": viz: Ist Ward, J. Simpson Africa, Treasurer, and J. C. Simpson, President; 2d Ward, Rev. J. S. McMurray and Hugh Lindsay; 3d Ward, Henry Swoope and Alex. Elliott; 4th Ward, Rev. D. A. Messinger and H. C. Weaver.

100 Barrels Rosendale Cement for sale, at a low figure, at Henry & Co.'s.

THE BROAD TOP SEMI-BITUMINOUS COAL REGION—ITS LOCATION, PRODUCTION, OUTLET TO MARKET, ETC.—This region is located in Huntingdon, Bedford and Fulton counties, in the State of Pennsylvania, and occupies a peculiar geographical position among the coal fields of the State.

Bounded on the west by Terrace Mountain, and on the east by Sideling Hill, forming at the northern end a slender synclinal promontory its terminal point on the Juniata river below the town of Huntingdon. The coal field widens towards its southern boundary in Bedford and Fulton counties, ending in a number of terminal fingers.

The coal-measures are regular in structure, with gentle undulations, dividing the field into several synclinals or basins. The coal is semi-bituminous in its nature, and has been largely used for locomotive purposes, for generating steam in locomotives, marine and stationary engines, in rolling mills, puddling furnaces, and for-forges; with glass works, it is an especial favorite. It gives a white ash, is free burning, and easily ignited.

The succession of the measures is not different from that of Western Pennsylvania and Eastern Ohio. There is a base of carboniferous conglomerate lying upon the red shale, from 100 to 200 feet thick, massive, homogeneous, seldom conglomeratic, except as a whole. Over this is a series of lower coals, then the barren measures, and over all the Pittsburgh bed, the beginning of the upper series. The coals beds are mostly identified with those of the head waters of the Ohio, by their order in the series, by certain general characters, and by their relations to the two conglomerates, the one at the base of the whole system, the other at the base of the middle system of the barren measures, and known as the Mahoning Sandstone.

The area of this field is stated at eighty square miles, and the aggregate thickness of workable coal-seams is 26 feet, the larger seams range from five to ten feet in thickness, and the lesser seams from one to three. An outlet for the coal from this region is afforded by the Huntingdon and Broad Top Mountain Railroad (this was completed in 1856, and during the latter part of this year, 42,000 tons were forwarded from this region to various markets.) This line extends from the town of Huntingdon on the Pennsylvania Railroad, 203 miles west of Philadelphia, to Mt. Dallas in Bedford county a distance of 45 miles. At Saxton, 24 miles from Huntingdon, a branch road, ten miles in length, extends to Broad Top City; at Riddleburg, five miles beyond Saxton, is another branch into Fulton, five miles from the main road.

From Mt. Dallas the Bedford and Bridgeport Railroad, 38 1/2 miles in length, extends to the Maryland State line; from this point to Cumberland, Md., via the C. and P. R. R. is seven miles. This connection gives an outlet to the George Creek Cumberland coal to the interior markets of Pennsylvania, to Philadelphia and South Amboy, N. J. During 1873, 114,589 tons were forwarded from the Cumberland region by this connection. The Bedford and Bridgeport road is leased to the Pennsylvania Railroad, and operated by them.

The yearly production of this region, since the beginning, has been as follows: 1856.....42,000 1857.....315,990 1858.....78,813 1859.....265,720 1860.....105,478 1861.....244,412 1862.....188,000 1863.....298,298 1864.....360,778 1865.....310,425 1866.....319,825 1867.....397,473 1868.....386,645 1873.....350,245

Analyses made of samples of this coal by Mr. H. Roeper, in 1864, show the following results: I. II. III. Specific Gravity..... 1.210 1.3181 1.3511 Weight of cubic yd. in lbs..... 2212 2224 2248 Water..... 920 791 328 Vol. matter..... 15,300 18,340 14,675 Fixed Carbon..... 84,850 905 1,028 Ash..... 7,337 6,001 11,871 Fixed Carbon..... 75,472 78,463 72,915 100..... 100..... 100.....

An analysis made for the Pennsylvania Railroad Co., in 1859, gives the following results as compared with the Pittsburgh coal: Broad Top. Pittsburgh. Water..... 0.30 1.20 Vol. matter..... 17.55 21.45 Fixed Carbon..... 74.85 61.45 Ash..... 7.50 5.80 Specific Gravity..... 1.00..... 1.00..... 1.250 1.350 In regard to the prices obtained for this coal, we are informed that the following are the average rates, f. o. b. at Philadelphia, each year, for ten years past: 1863.....\$2.25 1864.....\$2.75 1865.....\$2.50 1866.....\$2.75 1867.....\$2.50 1868.....\$2.75 1869.....\$2.50 1870.....\$2.75 1871.....\$2.50 1872.....\$2.75 1873.....\$2.50

At present the rates average about \$4.75 at Philadelphia, and \$5.50 at South Amboy, N. J. The value of the colliery improvements is estimated at \$775,000, the number of miners and other persons employed averages 750, and the daily capacity for output is stated at 2,400 tons. The tolls and expenses of this coal to Philadelphia, on shipments destined for New York and the eastward are stated at \$3.15 per gross ton. The business of the Huntingdon and Broad Top Mountain Railroad, to June 27th, 1874, was 169,116 tons, of which 132,808 were from the Broad Top region, and 36,308 from the Cumberland region. The coke made from this coal we learn, is strong, porous, resonant, a fine steel grey in color, and not surpassed by the celebrated Connellsville. Recently, a machine has been used by the Furnaces of this region which crushes the coal as fine as rice, and by making use of the difference in the specific gravities of coal and slate, succeeds in producing an absolute separation of the carbon from the attendant impurities. The increased cost of washing the coal is stated to be not more than fifty to sixty cents per ton, while the increased value of the metal made with the coal so treated before being coked is, between five and six dollars.

There are also extensive beds of iron ore that are as yet comparatively only partially developed, the amount that exists being of considerable magnitude, and this region affords an excellent location for the erection of blast furnaces. The following table shows the names of the operators, the names of the collieries, and the business done at each for the year 1873: Cumberland John Whitehead & Co 10,392 Crawford do do 8,902 Powell Howard & Bradley 19,672 Barnejo Plano do do 7,984 Barret R. 100 Barrels Rosendale Cement for sale, at a low figure, at Henry & Co.'s.

TO THE WITNESSES IN THE CASSVILLE ORPHANS' SCHOOL INVESTIGATION.—Two weeks ago I published a notice in the JOURNAL that a list of the witnesses residing in Huntingdon, had been sent me by Hon. M. W. Oliver, and a remittance made to pay the same. Most of the witnesses have called, but I regret to say that the man designated by the name as are not found on the list. This has of course created some dissatisfaction on their part. The list is very inaccurate and the witnesses omitted were not those of one side but of both, in nearly equal proportions, while many witnesses are credited with two days who only attended one and vice versa. I proposed to make out a bill of costs for the prosecution and handed it to the Sergeant-at-Arms at the close of the case, but he informed me he had a list of the Huntingdon witnesses, and I had no bill. No bill appears to have been made by the counsel on the other side. I will forward to Mr. Oliver the names of the omitted witnesses, as far as made known to me but will not receive or distribute anything beyond the bill now on hand, as the collection and disbursement of these costs is not only a gratuitous, but thankless undertaking. The list of witnesses sent to me with my pay credited, amounted to \$160.93, the money sent me is \$100, deficit 60 cents. I do not see where the profit is to come in, especially if the newspapers charge me for these notices. It will, however, be quite as profitable to me as the "Cassville Investigation" itself in which I gave about these weeks of professional labor about half travelling and other expenses in the case to the amount of \$34.36 for which neither received nor expect to receive any compensation whatever, except the consciousness of having discharged, to the best of my ability, a public duty.

Above all I know about the appropriations or disbursements for the expenses of the investigation. I have made some effort to have the witnesses paid, but beyond this I neither cared nor inquired. I paid fully my own expenses without soliciting passes from the Committee or its officers, which is more than can be said, with truth, of the other side. THE LAST GUY CONCERN POSTPONED.—The announcement of the postponement of the last Guy concern of the Public Utility of this city, published in the JOURNAL, has been accepted with regret by those who were to have attended. The postponement is due to the fact that the Guy concern is to be held at the residence of the late Governor Brantlett's estate, which is not yet ready for occupancy. The Guy concern is to be held at the residence of the late Governor Brantlett's estate, which is not yet ready for occupancy. The Guy concern is to be held at the residence of the late Governor Brantlett's estate, which is not yet ready for occupancy.

Pat O'Brian to the Editor.

I'm glad that you list the thoroughbred to say that you have few rules. For Pat is not much but a bungle. Haven't never much wint till the school. I was read in a note little shanty; I heard of Gen. O'Brien's name. Or course that he had wint few scanty. It beloved her each shall till save.

I learned A. B. C. in old Webster, and soon I was able to spell. The school was in the winter, because I made progress so well. Nine months I was getting my latin. The arithmetic, then, was old Pike, I went through it near about rain. For figures were just what I liked. Kirkham was, then, all the grammar we had for till use in the school. We must parse it or else we'd be hammer'd, Right well, would old Plancher's rule.

Mike Murphy pronounced me a poet, and I was called the school teacher. But for fear that the people should know I cast me poor rhymes in the fire. Because that I never was more or less, than that I was a school teacher. I wrote a few lines for the press. Now Paddy has grown old and rusty, his head is all sprinkled with gray, but never a bit is he rusty. But fall of his humorous say.

A word or two now led me to the truth, No Irishman ever did better, Who had never a chance in his youth. Yours, with respect, PAT O'BRIAN.

Lines on the Death of Jennie.

Dear Jennie, you have left me now, Your face no more I see; With crowns of glory on your brow, Ere long I'll meet with thee.

How will you know your mother's prayer, How will you know your mother's care, I know that you and I will share The quiet joys of home.

How I've thought of Jennie, dear, Since she bade me adieu, How hard it was—yet never far, I yet will meet with you.

Now, Jennie, dear, your mother, yet, And o'er your grave I often fret, And I'll be with you yet.

How hard it was for me to part With Jennie, daughter, dear, I loved her with a tender heart, I drop a mother's tear.

Your mother here, almost alone, I'll be with you yet, I'll be with you yet, I'll be with you yet, I'll be with you yet.

While life shall last we'll meet no more; I wait, in grief, To see you in the golden shore To walk the golden shore.

IMPORTANT TO SCHOOL DIRECTORS.—The Harrisburg Telegraph says that the State Superintendent of Public Instruction has issued a circular to school superintendents directing them to withhold all school money coming from the State from all those districts in their counties which have no suitable out-houses attached to their school buildings. Separate apartments must in every case be provided. Wherever suitable buildings are erected by the first of September, the penalty imposed will be remitted.

SUGAR, SYRUP, TEA, COFFEE, SPICES, WOOD and Willowware for sale cheap, at Massey's Grocery.

FLEMING'S COMBINATION FENCE.—This is one of the most durable, ornamental and complete fences in use, and so cheap that every person can have one. A sample of this fence can be seen at the residence of Dr. R. A. Miller, Penn street. Cemetery Lots newly erected. A reduction is made on all church lots. Price, \$1.25 per foot. Call and see sample of work at Dr. Miller's. For further particulars call on Merrill & Cook, at the Franklin House.

Do YOU WANT A TOWN LOT?—S. P. Wrenn, at his store, No. 1307 Middle street, for credit, 50 cents worth of goods gives a chance to the holder of which he has a chance of drawing a Town Lot, in West Huntingdon, Fruit, Groceries, Meat, or some one of the 85 prizes on the list for distribution. The drawing to take place as soon as all the tickets are given out. Satisfaction guaranteed, June 10-3m

100 Bushels prime Timothy Seed for sale at HENRY & Co.'s. The undersigned, wishing to make a change in his business, on the 1st of September next, offers his entire stock of Dried Goods, Groceries, Clothing, Boots, Shoes, Queensware, Hardware, &c., at a very low price for cash. All wishing a bargain should call before purchasing elsewhere. W. H. MILLER, Orbisiana, July 15-4t.

A lot of prime Mackerel for sale cheap, at Massey's Grocery, 603 Washington street. M. L. STEINLEY, M. D., graduate of Jefferson Medical College, Philadelphia, having permanently located in Mapleton, offers his professional services to the citizens and community. All calls promptly answered, unless professionally engaged. [Aug. 5-1mo.]

WHITMAN'S Sweet Cocoa Paste, at Massey's. FRESH ARRIVAL OF MILLINERY GOODS.—Miss E. M. Africa has just returned from the east with a large and fashionable stock of bonnets, hats, notions, assortment of children's aprons, &c., &c. And every thing in her line. VOICE OF THE PEOPLE. E. B. T. R. AND ITS STATIONS. This road is rapidly approaching completion. The track is laid to the tunnel at Rays Hill, a distance of 1 1/2 miles, and will be completed in 1200 feet higher than Orbisiana. The steepest grade on the road is 140 feet to the mile; this extreme grade occurs in one portion of the line, and is not over 100 feet of the road. There are two tunnels—one under Sideling Hill, which is 900 feet long, the other at Rays Hill, 1100 feet long. The company have laid a low tunnel opposite to Orbisiana, which bids fair to become a populous location, and in conjunction with the latter, will, in the near future, afford a ready market for the farm and garden produce of the surrounding country. Leaving Orbisiana we next arrive at Three Springs at which place the company are erecting a spacious station, evidently anticipating considerable traffic at that point, and judging from the aspect of the village, its location and availability, they are not destined to be disappointed. The adjacent country is known to abound in hematite and fossiliferous. Men of capital are beginning to appreciate the advantages of Three Springs as a business center. Lands have been purchased, property has changed hands at advanced rates, buildings of a better class than ordinary are in course of construction, and the town is rapidly growing, and the older tenements are being improved and remodelled. Four well-travelled public roads, penetrating the country within a circuit of 10 miles, converge at Three Springs. And the mineral waters present an opportunity for establishing a summer resort which would vie with any in the State. The mineral springs are two in number, both of

THE MOST WONDERFUL DISCOVERY OF THE 19th CENTURY.

Dr. S. D. Howe's Arabian Milk Cure for Consumption, and all diseases of the Throat, Chest and Lungs. This wonderful medicine of the kind in the world, is a substitute for Cod Liver Oil, and is equally as good, and is equally as easy to take. It is equally as good, and is equally as easy to take. It is equally as good, and is equally as easy to take. It is equally as good, and is equally as easy to take.

THE IRON TRADE. New York, August 8.—There is a life in the market for iron, and the price is very high. The market is very high, and the price is very high. The market is very high, and the price is very high. The market is very high, and the price is very high.
