Advantages of Small Farms.

A correspondent writes to the Department of Agriculture from Van Buren, Iowa, that he is running a small farm of forty acres, with twenty under cultivation in fruit, vegetables, and small grain.

Success in tillage and husbandry depends on the capacity of the human brain, rather than on the size of one's plantation. One family, by skill, industry and economy, becomes rich by cultivating twenty acres only, while another family grows poor by the management of 2,000 under the plow.

Every person has but a limited quantity of force, physical and mental; and it is the most common of all mistakes to dilute and spread his force over too large a surface. It is not the diffusion of muscular strength, but its concentration that bores artesian wells, and draws a fountain of living water from the strata of rocks hundreds of feet in thickness to the surface for the use of uneducated man.

The cultivator of the earth needs time and opportunity for profitable study. How shall he command such an advantage? Not, surely, by holding more land, than he uses with any benefit to his family, or to mankind at large.

Pasturing Winter Grain. I once told a neighbor that goats required salt. He acquiesced, and soon after emptied the refuse of a pork barrel in which were several pounds of salt, in the pens. His hogs, hungry for salt, "went in," and some that got too much died.

These Diggers are Anti-Dyspeptic, a fine Tonic and an excellent appetizer. They are a sure preventive against many of the diseases arising from a weak stomach, &c.

VINEGAR BITTERS. PURELY VEGETABLE. FREE FROM ALCOHOL.

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower ranges of the Sierra Nevada mountains of California.

Dr. Walker's California Vinegar Bitters are sold all over the country in a similar manner. By purifying the Blood they remove the cause, and by removing away the elements of inflammation (the tubercular deposits) the affected parts receive health, and a permanent cure is effected.

It is the time for selecting seeds for spring planting. There are several ways of doing this—one from experience, which is always the best guide unless one wants to make experiments; another from the experience of others as given in the agricultural papers, farmers' clubs, etc.
